Item 1.

Mr. Matovu grows vegetables in containers around his home. During dry seasons, he waters these vegetables to supply them with enough water. One day, he was at work and told his son to water them. The son unfortunately poured a solution onto the vegetables that made all the leaves of the vegetables droop (wilt) and eventually dried.

One of the solutions **A** or **B** is wrong, which led to the drying of the vegetables.

Task

(a) Carry out a scientific investigation-using specimen T, to identify which solution was poured on the vegetables.

Item 2

Mr. Okello grows maize from which he gets school fees for his children after selling them. Last season, he made losses after certain organisms destroyed all the maize by cutting the stems. As he was still figuring out what he could do to the children at home, he discovered that the children were suffering from cholera and other group of organisms that possessed wings destroyed their books in the cupboards.

He became so furious and frustrated that he angrily collected all the organisms from his garden and house to burn them.

Some of the organisms collected included specimens **X, Y** and **Z**.

Task

a) Identify with reasons the group of animals to which specimens **X, Y** and **Z** belong.
