Apex Examination Council

PRE-ENTRY EXAMINATIONS SET TWO 2026

Uganda certificate of education

CHEMISTRY

Paper 1 (Theory)

2 hours

INSTRUCTIONS TO STUDENTS:

- This paper consists of two sections A and B
- Section A has 2 compulsory examination items
- Section B has 4 examination items; Answer any two items from this section. Taking only one item from each of the parts I and II.
- Answer four (4) examination items in all.
- Answers to section A are to be written in the spaces provided.
- Answers to section B are to be written in the answer booklet(s) provided. Begin each item on a fresh new page.

Section A

(Answer all items in this section)

Item 1

A student noticed that his white shirt had become dirty. Determined to clean it, he went to the well to fetch water and began washing using a detergent X. despite repeated rising, sturbbon marks remained on the fabric, leaving him frustrated. He then tried another detergent Y which effectively removed the stains, leaving his shirt clean and fresh.

Task; using the knowledge of chemistry, you have attained,

Identify the category of the products X and Y.

……
……

Guide him to know how the products operates.

……
……
……
……
……
……
……
……
……

Point out some of the danger(s) arising while using the products.

……
……
……
……
……
……
……
……

Item 2

The Kampala capital city authority, KCCA, in their fnancial budget. They intend to construct recycling plant for plastic wastes in Kitezi landflls with the intention to generate hydroelectric power and also to prevent the drastic leakages of the plastic wastes into the environment, following the advice from the technical team about the uniqueness of the structural properties of these materials used. However, the community members have perceived this initiative with skepticism due to some bad influence from some politicians. You have been tasked to settle this matter.

Task: As a Chemistry student:

a) Explain the category of the materials in the landfill.

……
……
……..……

b) Advise the community members on the suitability of the materials that make them useful in daily life activities.

……
……
……
……
……
……
……
……
……

c) Advise on the danger of the materials to the environment.

SECTION B- PART I

Answer only one item from this part

Item 3

Due to a high demand of oxygen in referral hospitals in Uganda, an investor has been contacted by the government to set up an oxygen manufacturing plant in Namanve. However, the residents do not understand how the process will occur, its impacts on the environment and mitigation measure and social benefits

Task;

As a learner of chemistry, prepare a write up you will present to the residents of Namanve.

Item 4

Many people in villages make a living by manufacturing local waragi (ethanol). However, the government is against the business due to associated challenges. The district's LC5 chairperson wants to sensitize the community about the large-scale production process and its impact to enable them understands the government position. The district's LC5 chairperson has contacted you as a student with the knowledge of chemistry in your village to provide the relevant information.

Task. Make a write up to use upon meeting the community.

Part ii

Answer only one item from this section

Item 5

With the increasing demand of charcoal and firewood among the residents of Mpigi district, a large part of Mpanga forest was cleared. Consequently, the area started experiencing little rainfall and flooding. This has attracted the attention of the district chairman and thus organized sensitization workshops to address the challenges in the community.

Your school has been invited and you have been selected among the speakers with enough knowledge of chemistry knowledge.

Task

As a learner of chemistry make a write up of what you expect to be delivered in the meeting.

Item 6

The collapse of Masaka Highway in Busega was attributed to the heavy rainfall that led to flooding, weakening the road foundation. Additionally, the many human activities taking place in the swamp surrounding it such as industrialization and human settlement contributed to its shallowing hence erosion.

The environmental experts have embarked on the sensitizing the community with the goal of finding a solution to the current challenges and those likely to occur.

Task

As a learner of chemistry, make a write up of your expectations in the meeting.
