KAGADI JOINT MOCK EXAMINATIONS CONSULT
END OF TERM ONE EXAMINATIONS, 2026
Uganda Certificate of Education
INFORMATION AND COMMUNICATIONS TECHNOLOGY
Paper 1
(Theory)
2 hour 15 minutes

INSTRUCTIONS TO CANDIDATES:

*This paper consists of **two** sections; **A** and **B**. It has **five** examination items.*

*Section **A** has **one** compulsory item.*

*Section **B** has **two** parts; **I** and **II**. Respond to **one** item from each part.*

*Respond to **three** examination items in **all**.*

*Any additional item(s) responded to will **not** be scored.*

***All** responses **must** be written in the answer sheet(s) provided.*

SECTION A

This item is compulsory.

Item 1

Kagoma Mixed Secondary School has been operating most of its activities manually. Examination papers are handwritten or poorly typed using type writer, students' records are kept in paper files, and staff attendance is recorded in a manual register. As a result, examination papers often contain errors, learners' records are misplaced, and monitoring staff attendance has become difficult. The school recently received funds to introduce ICT in administration and academics.

However, the head teacher lacks knowledge of the appropriate ICT tools required to computerize these processes and is also concerned about how such tools can be protected and maintained to avoid frequent breakdowns and losses. The school management committee has agreed that guidance is needed before any purchases are made.

Task

Guide the head teacher on the appropriate ICT tools that can be used to computerize the school's operations and advise on how these tools can be safely maintained and protected.

SECTION B

*This section has two parts; I and II. Respond to **one** item from each part.*

Part I

*Respond to **one** item from this part.*

Item 2

Rita works as a records officer in a busy municipal office where most services have recently been digitised. She spends long hours seated at a computer entering data, preparing reports, and responding to emails without taking regular breaks. Over time, Rita has developed persistent back pain, eye strain, wrist pain, and frequent headaches.

In addition, the office store is filled with broken computers, damaged monitors, old keyboards, and faulty power backups that are no longer in use. These items have congested the working space and are posing health and environmental risks. The office administrator is concerned about staff well-being and the increasing accumulation of obsolete ICT equipment.

Office discomfort and digital clutter

Task

- (a) Prepare a write-up explaining to Rita how best she can handle her health challenge relating to her work environment.
- (b) Advise the administrator on proper methods of managing the obsolete and non- functional ICT equipment.

Item 3

During the Holidays, a secondary school computer laboratory was broken into at night and several computers, cables, and a server were stolen. Important digital records stored on the server were lost in the process. During the break-in, some computers were damaged and internal parts scattered on the laboratory floor. The following morning, the laboratory attendant collected the damaged components and dumped them at a nearby garbage pit, believing they could no longer be used. The school management later realised that poor security measures and lack of proper handling of damaged ICT equipment had worsened the situation. The administration is now worried about ICT security and the environmental risks caused by improper disposal of ICT equipment.

Disposing of old and damaged tech in flames

Task

- (a) Advise the school management on how best they could have handled the security situation at the laboratory.
- (c) Advise the school on proper methods of managing the damaged ICT equipment to avoid creating harmful e-waste.

Part II

*Respond to **one** item from this part.*

Item 4

The Ministry of Public Service advertised internship opportunities on its official website. Applicants were required to download an application form, type their application letter, scan academic documents, create an email account, and upload all the required documents through the website before the deadline.

Simon, a recent school leaver, was interested in applying but failed because he did not know how to access the website, prepare digital documents, or upload them online. He later realised that many opportunities now require online submissions through official portals.

Simon has approached you for guidance so that he does not miss similar opportunities in the future.

Task

Guide Simon on the step-by-step procedures and ICT tools he should use to access information, store documents, and submit his application through a website.

Item 5

A community development group plans to apply for funding from a national NGO. The application requires downloading an online form, filling it electronically, attaching supporting documents, and sending all the required files to the NGO's official email address before the deadline. Some group members live in different locations and must review the documents before submission. The group chairperson has limited ICT skills and finds it difficult to download the form, save files, attach documents, and send them correctly via email. Fearing that the group may miss the opportunity, the chairperson has approached you for help.

Task

Prepare a clear write-up explaining the ICT tools required and the step-by-step procedures for accessing information, storing documents, and submitting the application via email.
