Paper 2

(Practical)

2 hours 30 minutes

INSTRUCTIONS TO CANDIDATES:

*This paper consists of **two** examination items. Respond to **both** items in this paper.*

*You are provided with support files in the folder **KAJEC S.4 Term 1 Support Files 2026** on the computer desktop. Use the support files where applicable to supplement the items.*

*You are provided with a **new blank Compact Disc (CD) / Digital Versatile Disk (DVD)**.*

*Use a **permanent marker** to write your name, random number and personal number on your CD/DVD.*

*You should continually **save** your work.*

*You **must** produce a **hard copy** for each of your work to accompany a **soft copy** on the Compact Disc (CD)/ Digital Versatile Disk (DVD).*

Item 1

The Great Lakes Farmers' Cooperative supports small-scale farmers by collecting produce, managing sales, and distributing profits. Recently, the cooperative has struggled to keep track of its 200+ members, their seasonal harvests (maize, beans, and coffee), and the fluctuating market prices. The board of directors is meeting next month to decide on the annual bonus for members, but the records are currently scattered across hand-written ledgers and various basic text files.

The board requires a digital system to manage member profiles, calculate total revenue per crop, and determine the dividend each farmer should receive based on their contribution. Furthermore, they need a professional way to communicate these financial results to the farmers during the Annual General Meeting (AGM).

Task

As an ICT consultant, help the Cooperative manager organize this data into a functional system. Produce a professional report and a visual summary for the AGM. Provide a soft copy on a CD/DVD and sample hard copies of your work, clearly indicating your name and personal number as the developer.

Item 2

Green Spark Electronics is a local startup that repairs solar panels and sells energy-efficient appliances. While their technical work is excellent, their brand visibility is very low. Most residents in the surrounding districts are unaware of their specific services, warranty policies, or the "Solar-for-Schools" initiative they recently launched.

The owner has noted that they lose many potential contracts to larger firms because they lack an online presence where clients can view their portfolio of completed projects, read customer testimonials, and request service quotes. The owner has provided a folder with the company **logo**, photos of their technicians at work, list of service rates, and other resources

Task

Help Green Spark Electronics establish a professional digital presence to reach more customers and provide easy access to their information. Design the required digital solution. Provide a soft copy on a CD/DVD and sample hard copies of your work, clearly indicating your name and personal number as the developer.
