P640/2 FOOD AND NUTRITION

**SCORING GUIDE
FOR THE SAMPLE PAPER**

Item 1

a) PLANNING:

To attain the highest level of achievement, a candidate is expected to prepare a clear work plan showing sequenced food production tasks and estimated time allocations, justify choice of ingredients used in food production tasks and generate budgets for meals.

POSSIBLE RESPONSES

Sequenced all activities clearly and realistically- with logical flow and time-efficiency.

Created accurate and realistic budget with all required items listed and costed,

Chose nutritious, and suitable dishes for the students' meal/product of food value addition from onions, mangoes etc given.

Identified all necessary equipment, prepared, and organized them for use.

Planned ways of keeping work area clean, safe, and well-organized to meet hygiene standards.

Systematically calculated the vitamin content of the dish as instructed.

b) MEAL PREPARATION FOOD PROCESSING AND PRESERVATION:

To attain the highest level of achievement, a candidate is expected to

Prepare and cook traditional dishes from different regions, make different beverages (cold, hot, fermented non-alcoholic), demonstrate energy and time saving techniques during food preparation, make products from the developed recipes of doughs, pastries, cakes and batters, use numbers and measurements accurately in using recipes, prepare and cook different forms of protein based dishes with suitable accompaniments (carbohydrate dishes, soups, sauces, vegetables, fruits, desserts) to protein dishes to make balanced meals for different occasions, prepare reheated dishes to produce nourishing réchauffé dishes, apply appropriate heat transfer principles in cooking methods to prepare foods with the desired texture, aroma, colour and use various cooking equipment efficiently when preparing meals.

Choose and accurately compute quantities of food additives using appropriate measurements, proportions in food production, develop new solutions and tries out other innovative alternatives of food additives, use imagination to explore innovative food preservation and value addition techniques.

Process and preserve food (meat, fish, poultry, eggs and milk fruits, vegetables, pulses, nuts, spices and herbs to create new products, package and market processed products and adhere to food safety principles during processing and preservation

Possible Responses

Appropriate cookery procedures carried out consistently with accuracy, safety, and confidence throughout the activities. Suitable equipment for both meal preparation and food value addition selected and operated with confidence in handling; Excellent resource management demonstrate -minimal/no wastage of food materials and time used effectively. High standards of hygiene maintained throughout food preparation (clean up during and after meal preparations is done) Activities logically sequenced and well executed from start to finish. Appropriate food item, processing method, tools, and materials selected with clear rationale. Demonstrated excellent hygiene practices and adheres to all safety procedures throughout the food value addition process. Applied the appropriate food processing techniques (e.g., drying, fermenting, pickling) skillfully with accurate timing and procedure.

c) SERVING MEAL

To attain the highest level of achievement, a candidate is expected to show creativity in presenting and serving the products from yeast doughs, pastries, cakes and batters and serve meals appropriately.

Possible Responses

Attractively garnished or decorated dishes with enhanced visual appeal and showing attention to presentation.

Serving equipment properly used showing understanding of hygiene, technique, and portioning. Dishes are placed in correct positions, showing good knowledge of serving order and table arrangement.

d) PRODUCT QUALITY

To attain the highest level of achievement, a candidate is expected to make food products with desired taste, texture, aroma, colour and shape and of high-quality (well-preserved, appealing, safe and nutritious) and package processed food products suitably.

Possible Responses

Dishes/processed food products had a well-balanced, appealing flavor and taste appropriate to the dish/product type. Dishes/ processed food products had a texture ideal for the food type (e.g., crisp, smooth, firm) and consistent throughout. Dishes/processed food products had colour that is vibrant, appropriate, and enhance the appeal of the food. Dishes were at the correct and safe temperature for its type (hot or cold). Food was attractively shaped/presented (uniform, and appealing). Packaging of dishes and processed food product was done using clean, secure materials, appropriate for the food type, and in way that enhances presentation.
