DUL A: COCDIRO

1. Gam apeny acel keken i kan.

(a) Kwan coc-ci ite gammo apeny ame olubo kun itio kede nyigkop a tye i kin 150-200.

Ituko odilo me galo wang i cukul wu, tyeni obin orwate kede tyen a atuku wad wu i kom odilo. I gum a rac tyen awotti ca te tur oko. Man okeelo lweny i kin owote ni kede owote atuku otur ca. Aman dong apwony a loo tuku okwai me miyo ngeec olil ame acwallo bot aedi akwako lweny man.

Apeny:

Coo coc ame mio aedi niang a ber giin ame otimmere i leek.

NYO

(b) Kwan coc-ci ite gammo apeny ame olubo kun itio kede nyigkop 150-200.

Ibin iwoto cammo aemme kede awotti moro ame imaro twatwal. Ite laro wunu aemme olio i yonge awotti i ceello te poto piny. Ite lweny kede naka i wanne.

Apeny:

Coo coc ame dwoggo mara i yi akina yin kede awotti.

DUL B: GONYNYO COC

2. Kwan coc i piny kan-ni ite gammo apeny ame olubo.

Pol otedero pe niang kite ame pii molo kede lobo i poto gi te miyo pe bedo amio.Iryongettoro ame pwonyo otedero kede kite me purro cem abup omio pappi coc mogo ame ocoo akwako kite ame pii molo kede lobo. Pappi pe niang Lebmunu, te miye keello papara man boti.

Apeny:

Kony pappi me niangngo coc man.

RELATIONSHIP BETWEEN DRAINAGE FEATURES AND LAND FORMS

Drainage features are found in land forms. These features can be compared to water put in a container, such as a bucket. The container being the landform, while the water, is the drainage feature.

Lake Victoria basin lies between the Eastern and Western Rift Valleys, and this part of the surface sunk to form a gently sloping depression, called a basin. The central part of the basin was filled up with water to form the lakes; named Victoria and Kyoga. The areas along the shores of Lake Victoria experience heavy rainfall, and the basin has many rivers flowing into it. This explains why this basin sometimes floods, and is a source of many rivers in East Africa. There are of course some rivers which enter Lake Victoria and those that flow out of it, and in so doing, it becomes a drainage feature.

Drainage features, therefore, include rivers, lakes, swamps and oceans; for example, the River Nile, which is the longest river in Africa, and Lake Victoria, the largest lake in Afirica. Lake Victoria is shared by the three East African countries of Uganda, Kenya and Tanzania. The process of erosion occurs everyday around you. It involves either water or wind removing soil over the surface of the earth.
