PROTECT THE ENVIRONMENT

Uganda is a land locked country surrounded by other countries like Kenya, Tanzania, South Sudan, DRC Congo. It is blessed with rivers, lakes, valleys and forests. We receive rainfall throughout the year. This makes people grow plenty of food. However recent report from National environmental Management Authority (NEMA) shows that there is a lot of degradation of the environment. People have cut the forests for timber, firewood, charcoal. This has led to global warming leading to famine.

Also due to population pressure, people have started degrading swamps, construction in these swamps is going on; the investors are setting up factories, Petro stations, housing estates in swamps. This has led to floods. Oh God! We need your intervention to curb the situation.

The fishermen have started using poison to catch fish. This has led not only destroying the water bodies but also other aquatic organisms have died. The water has become unfit for drinking. The Government must wake up to this menace. Strict laws must be put in place. We need a clean environment. This is the time.
