

P.5 TERM I TOPICAL BREAKDOWN

THEME: SETS

TOPIC 1: Set Concepts (10 periods) Subtopics:

1. Forming sets
2. Naming and describing sets
3. Equal sets
4. Equivalent sets
5. Distinguishing equal and equivalent sets
6. Empty sets
7. Intersection of sets
8. Intersection and union of sets
9. Representing sets on Venn diagrams
10. Identifying the intersection and union of sets using Venn diagrams

THEME: NUMERACY

TOPIC 2: Whole numbers (16 periods)

Subtopic 1: Numbers

1. Place value of digits up to 6 digits
2. Values of digits
3. Application of place values and values
4. Writing numbers in expanded form using place values
5. Writing numbers in expanded form using values
6. Writing numbers in expanded form using powers
7. Reading and writing the expanded numbers in words
8. Writing expanded numbers in short form
9. Reading and writing numbers in words
10. Writing numbers in figures

Subtopic 2: Rounding off whole numbers

11. Rounding off to the nearest tens, hundreds, and thousands (with or without a number line)
12. Rounding off to the nearest ten thousand

Subtopic 3: Roman Numerals

13. Reading and writing Roman numerals
14. Converting Hindu Arabic numerals to Roman numerals
15. Converting Roman numerals to Hindu Arabic
16. Word problems on Roman Numerals

TOPIC 3: OPERATION ON WHOLE NUMBERS

Subtopic 1: Addition of whole numbers

1. Addition of whole numbers up to 6 digits without regrouping
2. Addition of whole numbers with regrouping
3. Word problems on addition of whole numbers

Subtopic 2: Subtraction of whole numbers

4. Subtraction of whole numbers up to 6 digits without regrouping
5. Subtraction of whole numbers up to 6 digits with regrouping
6. Word problems on subtraction of whole numbers

Subtopic 3: Multiplication by 2 digit natural numbers

7. Multiplication of three digit numbers by a two digit number
8. Multiplication of four digit numbers by two digit numbers
9. Word problems on multiplication

Subtopic 4: Division of whole numbers by 2-digit numbers

10. Dividing by a two-digit number without a remainder
11. Dividing by a two digit number with a remainder
12. Word problems on division of whole numbers

Subtopic 5: Mixed Operations

13. Mixed operations on whole numbers
14. Word problems involving mixed operations

Subtopic 6: Numbers in base five

15. Grouping and counting in fives (base five)
16. Place values in base five
17. Values of digits in base five
18. Reading and writing in words
19. Changing base ten numerals to base five
20. Changing base five to base ten
21. Addition in base five
22. Completing tables and sequences
23. Subtraction in base five

TOPIC 3: OPERATION ON WHOLE NUMBERS

Subtopic 1: Addition of whole numbers

1. Addition of whole numbers up to 6 digits without regrouping
2. Addition of whole numbers with regrouping
3. Word problems on addition of whole numbers

Subtopic 2: Subtraction of whole numbers

4. Subtraction of whole numbers up to 6 digits without regrouping
5. Subtraction of whole numbers up to 6 digits with regrouping
6. Word problems on subtraction of whole numbers

Subtopic 3: Multiplication by 2 digit natural numbers

7. Multiplication of three digit numbers by a two digit number
8. Multiplication of four digit numbers by two digit numbers
9. Word problems on multiplication

Subtopic 4: Division of whole numbers by 2 digit numbers

10. Dividing by a two digit number without a remainder
11. Dividing by a two digit number with a remainder
12. Word problems on division of whole numbers

Subtopic 5: Mixed Operations

13. Mixed operations on whole numbers
14. Word problems involving mixed operations

Subtopic 6: Numbers in base five

15. Grouping and counting in fives (base five)
16. Place values in base five
17. Values of digits in base five
18. Reading and writing in words
19. Changing base ten numerals to base five
20. Changing base five to base ten
21. Addition in base five
22. Completing tables and sequences
23. Subtraction in base five
24. Topical test

TOPIC 4: Number patterns and sequences

Subtopic 1: Forming patterns and sequences

1. Increasing progression
2. Decreasing progression
3. Progression involving multiplication
4. Progression involving division
5. Finding the rate of progression

Subtopic 2: LCM and G.C.F

6. Finding factors of numbers
7. Finding common factors of numbers
8. Finding the highest common factor of numbers (and its application)
9. Multiples of numbers
10. Finding the lowest common multiple (L.C.M)

Subtopic 3: Types of numbers

11. Review on types of numbers (whole, counting, even and odd)
12. Prime numbers
13. Composite numbers
14. Triangular numbers
15. Square numbers
16. Rectangular patterns and sequences

THEME: NUMERACY

TOPIC: FRACTIONS

Subtopics:

1. Addition and subtraction with different denominators
2. Word problems
3. Addition of mixed fractions
4. Word problems on addition of mixed fractions
5. Subtraction of mixed fractions with different denominators
6. Multiplying proper fractions by proper fractions
7. Multiplying a whole number by a fraction and vice-versa
8. Reciprocals
9. Dividing whole numbers by fractions
10. Dividing a fraction by a whole number

Week	Period	Theme	Topic	Sub Topic	Competences	Content	Methods and Techniques	Special Needs	Activities	I.M.S	Indicators of Life Skills and Values	References	Remarks
1	1	SETS	SET CONCEPTS	Forming sets.	Subject: The learner forms set from big sets. Language: The learner reads and writes vocabulary correctly.	Forming sets. Examples: 1. Set E = {1, 2, 3, 4, 5, 6, 7}, form a set of multiples of 3 (M). M = {3, 6}	• Demonstration • Explanation • Guided discovery • Guided discussion	Forming sets from big sets	Forming sets from bigger sets	• Word cards • Flash cards	• Problem-solving • Creative thinking <u>Values</u> Love Share	• P5 Cur. Pg 93-94 • MK Bk 5	
	2			Naming and describing sets.	Subject: The learner draws, names and describes sets. Language: The learner names and describes sets.	Naming and describing sets. Examples: 1. Name and describe the set below.  P is a set of 5 vowel letters. (Set P= {a, e, i, o, u})	• Brainstorming • Question and answers • Think pair share	Naming and describing sets Arranging	Naming and describing sets Arranging	• Chart	• Critical thinking • Effective communication <u>Values</u> Love Care	• MK Pupil's Bk 5	
	3			Identifying equal sets.	Subject: The learner identifies equal sets. Language: The learner reads and writes vocabulary correctly.	Identifying equal sets. Examples: 1. Given that M = {1, 2, 3, 4} and N = {3, 1, 2, 4}. Describe the relationship between M and N. Sets M and N have the same number and elements in appearance. So, M = N.	Guided discussions Question and answers	Identifying equal sets	Identifying equal sets	A chart showing equal sets	<u>Values</u> • Fluency • Audibility • Sharing	New MK Pupils BK 5 pg 1-3	
	4			Identifying empty sets.	Subject: The learner identifies empty sets. Language: The learner reads and writes vocabulary correctly.	Identifying empty sets Example Use empty or not empty a) A set of girls with 5 eyes each b) A set of men with 2 eyes each c) A set of flying cows.	Demonstration Guided discovery Explanation	Identifying empty sets	Identifying empty sets	A chart showing examples of empty sets	Creative thinking Critical thinking Sharing	P5 Curr pg 93-94 New MK Pupils book 5 Pg 3-4	

Week	Period	Topic	Sub Topic	COMPETENCES		Content	Methods & Techniques	Special needs	Suggested Activities	I.M	References
				Subject	language						
1	5	SET CONCEPTS	Identifying equivalent sets.	Subject: The learner; Identifies equivalent sets	The learner; reads and writes vocabularies correctly	Identifying equivalent sets. P = {a, e, i, 0, u} and Q = {i, v, x, l, c } Set P has the same number of elements as Q Therefore set P and Q are equivalent sets. P↔Q	• Question and answer • Brainstorming • Think-pair-share • Explanation	• Identifying and drawing intersection sets using Venn diagrams	• Identifying and drawing intersection sets using Venn diagrams. • Reading and writing vocabulary correctly.	• Word cards • Flash cards • Charts showing worked out examples	• P5 Curriculum • MK Pupil's Book 5-page 4-7
	6		Distinguishing equal and equivalent sets.	Subject: The learner; Identifies equivalent and equal sets	The learner names and describes sets	Examples P = {a, e, i, 0, u} and Q = {i, v, x, l, c } P and Q have the same number of elements, they are equivalent sets. A = {0, 1, 2, 3, 4, 5} and D = {0, 1, 2, 3, 4, 5} are equal sets, they have the same elements. Use symbols to compare the two sets.	• Demonstration	Identifying equivalent and equal sets	Identifying equivalent and equal sets		
	7		Intersection sets	Subject: The learner identifies and draws intersection sets using Venn diagrams.	The learner uses the symbol for intersection correctly	Identifying intersection sets (common members). Example Given that set A = {0, 1, 2, 3, 4, 5} and B = {0, 2, 4 } Identify the common members in both sets.		Identifying intersection set			

2	1		Union sets	Subject: The learner identifies and draws union sets using Venn diagrams. Language: The learner uses the symbol for union correctly.		Identifying union sets Example: K is made up of even numbers between 15 and 27. R is made up of numbers between 9 and 31 ending with zero. 2 a) What is k? K= 16,18,20,22,24,26 b) What is R? .	• Guided discovery • Guided discussion		• Identifying, drawing and using symbols for union sets. • Reading and writing vocabulary correctly.	• Charts • Flash cards	• Uganda Primary Maths
---	---	--	-------------------	---	--	---	---	--	---	---	--

WK	PD	THEME	TOPIC	SUB-TOPIC	COMPETENCES (SUBJECT)	COMPE-TENCES (LAN-GUAGE)	CONTENT	METH-ODS & TECH-NIQUES	LEARN-ING AC-TIVITIES	LIFE-SKILLS & VALUES	L/T AIDS	REF	RMKS
2	2	SETS	SET CON-CEPTS	Identify- ing In- tersec- tion sets using Venn di- agrams	The learner; iden- tifies the intersec- tion set symbol using Venn dia- grams correctly	The learner; draws the set symbol for intersec- tion set cor- rectly	Identifying Intersection sets using Venn diagrams Examples 1. $A = \{0, 1, 2, 3, 4, 5\}$ and $B = \{0, 2, 4, 6, 8\}$. Draw a Venn diagram to rep- resent $A \cap B$  $A \cap B = \{0, 2, 4\}$	-Question and an- swer -Brain storming -Think pair share -Explana- tion -Demon- stration	.Identify- ing inter- section sets .Drawing the set symbol for inter- section set cor- rectly	.Problem solving .Critical thinking .Effective communi- cation .Apprecia- tion	.Word cards .Flash cards .Charts showing worked out exam- ples	.Creative thinking curriculum page 93-94 .Uganda primary maths book 5 page 4-7	
	3			Identify- ing un- ion sets using Venn di- agrams	The learner; iden- tifies union sets using Venn dia- grams correctly	The learner; draws the set symbol for union set correctly	Identifying union sets us- ing Venn diagrams. Examples 1. K is made up of even num- bers between 15 and 27. R is made up of numbers between 19 and 31 ending with zero. a) What is K? b) What is R? c) Draw a Venn diagram to represent $K \cup R$? d) Find $n(K \cup R)$ $K = \{16, 18, 20, 22, 24, 26\}$ $R = \{10, 20, 30\}$  $K \cup R = \{16, 18, 22, 24, 26, 20, 10, 30\}$ $n(K \cup R) = 8$	.Guided discovery .Guided discus- sion	.Identify- ing union sets .Drawing the set symbol for union set cor- rectly us- ing Venn diagrams .Reading and writ- ing vo- cabulary correctly.	.Problem solving .Critical thinking .Effective communi- cation .Apprecia- tion	.Word cards .Flash cards .Charts showing worked out exam- ples	.Creative thinking curriculum page 93-94 .Uganda primary maths book 5 page 4-7	

WK	PD	THEME	TOPIC	SUB-TOPIC	COMPETENCES (SUBJECT)	COMPE- TENCES (LAN- GUAGE)	CONTENT	METH- ODS & TECH- NIQUES	LEARNING ACTIVI- TIES	LIFE- SKILLS & VALUES	L/M	REF	RMKS
2	4		SETS	SET CONCEPTS	FINDING NUMBER OF ELEMENTS IN UNION AND INTERSECTION SETS	The learner; identifies the number of elements in union and intersection sets.	The learner; draws the set symbol for union and intersection sets. Identifying the number of members in the union and intersection sets. Examples 1. Set M = {1, 2, 3, 4, 5, 6, 7} and K = {2, 5, 6, 8, 9} Find; a) $n(M \cap K)$ b) $n(M \cup K)$ Solution) $M \cap K = \{2, 5, 6\}$ $n(M \cap K) = 3$ b) $M \cup K = \{1, 2, 3, 4, 5, 6, 7, 8, 9\}$ $n(M \cup K) = 9$	.Demonstration Explanation .Guided discovery .Question and answer .Think pair share .Guided discussion	.Finding number of members in the union and intersection sets.	.Creative thinking .Effective communication .Problem solving .Critical thinking	.Charts showing worked out examples .Word cards .Flash cards	.MK Creative books .Thinking curriculum Page 8-9	
	5				IDENTIFYING DIFFERENT SETS FROM VENN DIAGRAMS	The learner; finds the number of members in the union and intersection sets. .identifies different sets from Venn diagrams	The learner; reads and writes vocabulary correctly  (i) L (ii) W (iii) $L \cap W$ (iv) $L \cup W$ Solution i) $L = \{1, 2, 3, 4, 5\}$ ii) $W = \{1, 2, 3, 6, 7\}$ iii) $L \cap W = \{1, 2, 3\}$ iv) $L \cup W = \{1, 2, 3, 4, 5, 6, 7\}$	.Brain storming	.Identifying different sets from Venn diagrams. .Reading and writing vocabulary correctly	.Appreciation			

WK	PD	THEME	TOPIC	SUBTOPIC	COMPETENCES (SUBJECT)	COMPE-TENCES (LAN-GUAGE)	CONTENT	METHODS & TECH-NIQUES	LEARNING ACTIVITIES	LIFE-SKILLS & VALUES	L/T AIDS	REF	RMKS
2	6	NU-MER-ACY	WHOLE NUM-BERS	Place val-ues of up to 6 digits	The learner; Identifies place value of each digit in 6-digit hundred thousand numbers.	.reads and write values of digits correctly	Writing place val-ues of digits up to 6 digits Examples 1. Write the place value of each digit in the number 369,758 	.Guided dis-cussion .Demon-stration	.Writing place values of dig-its correctly	.Effective communi-cation .Problem solving .Creative thinking Sharing	.Place value charts .Abacus	.MK think-ing primary maths Pu-pils book 5 page 10-11	
	7			Values up to 6 digits	The learner -finds values of digits	-draws abacus and represent numbers cor-rectly	Finding values of digits up to 6 digits. Examples: Find the value of each digit the number 583,794. 	.Brain storming .Explana-tion .Guided dis-covery .Question and answer	.Finding value of digits cor-rectly .Drawing and representing on the aba-cus.	.Creative thinking .Apprecia-tion .sharing	.Abacus .Pupils cards		

WK	PD	THEME	TOPIC	SUBTOPIC	COMPE- TENCES (SUBJECT)	COMPE- TENCES (LAN- GUAGE)	CONTENT	METH- ODS & TECH- NIQUES	LEARNING ACTIVITIES	LIFE- SKILLS & VAL- UES	L/T AIDS	REF	RM KS									
3	1	Numer- acy	Whole num- bers	Operation on values of digits	The learner; adds and sub- tracts values of digits accu- rately	.reads and writes vocabulary cor- rectly.	Operation on val- ues of digits Examples 1. Find the sum of the value 2 and the value of 7 in the number 32,475 Value of 7 Value of 2 Sum <table><tr><td>7x10</td><td>2x1000</td><td>2000</td></tr><tr><td>70</td><td>2000</td><td>+ 70</td></tr><tr><td></td><td></td><td>2070</td></tr></table>	7x10	2x1000	2000	70	2000	+ 70			2070	.Explana- tion .Think pair share. .Guided discovery	.adding and subtracting numbers correctly.	.Effective communi- cation. .Problem solving Critical thinking <u>Values</u> Love Care	.Aba- cus Place value chart	.Creative MK pri- mary maths pu- pils book 5 page 13- 15	
	7x10			2x1000	2000																	
	70			2000	+ 70																	
		2070																				
2		Writing numbers in expanded form	.expands num- bers to 6 digit correctly.	.expands num- bers to their place values cor- rectly for adding and subtracting	Writing numbers in expanded form. Examples 1. Write 280,457 in expanded form us- ing values. (2 X 100,000) + (8 X 10,000) + (4 X 100) + (5 X 10) + (7 X 1) 200,000 + 80,000 + 400 + 50 + 7	.Brain storming .Demon- stration .Guided discovery .group dis- cussion .Question and an- swer	.Arranging numbers correctly. .Writing the expanded form cor- rectly. .adding and subtracting	Critical thinking Effective communi- cation <u>Values</u> Apprecia- tion coopera- tion	A chart show- ing ex- panded form	St. Ber- nard mtc Pupils Book 5 Pg 22-26												
3			Writing ex- panded numbers in short form	.finds the num- ber expanded;	.reads and writes vocabulary cor- rectly	Writing the expanded numbers in short form Examples: 1. What number has been ex- panded to give 4000 + 9000 + 800 + 20 + 5 2. Express (5 X 100,000) + (6 X 10,000) + (9 X 100) + (4 X 10) as a sin- gle number		.Finding the expanded numbers. .Reading and writing vocabulary correctly		A chart show- ing ex- panded num- bers	p.5 curricu- lum Pg 95											

WK	PD	THEME	TOPIC	SUB-TOPIC	COMPE-TENCES (SUBJECT)	COMPE-TENCES (LANGUAGE)	CONTENT	METH-ODS & TECH-NIQUES	LEARNING ACTIVITIES	LIFE-SKILLS & VAL-UES	L/T AIDS	REF	RMKS						
3	4	NU-MER-ACY	WHOLE NUM-BERS	Writing num-bers in words	The learner; arranges and writes num-bers for adding accurately	.reads and writes num-bers in words	Reading and writing numbers in words Examples 1. Write 36,948 in words. Thirty six thousand nine hundred forty-eight 2. Peter earns 730,689 shillings every month. Write his monthly income in words	.Demon-stration .Explana-tion .Think pair share	.Reading and writing numbers in words cor-rectly	.Effective communi-cation .Problem solving .Critical thinking	.Word cards .Crea-tive thinking book 5	.St Ber-nard maths pupils book 5 page 22-26							
	5			Writing number words in figures	Writes numbers in words cor-rectly.	-draws num-bers correctly	Writing words in figures Example 1. Write seven hundred sixty five thousand, two hundred twelve in words seven hundred sixty five thousand <table><tr><td>Seven hundred sixty-five thousand</td><td>765,000</td></tr><tr><td>Two hundred twelve</td><td>+ 212</td></tr><tr><td></td><td>765,212</td></tr></table>	Seven hundred sixty-five thousand	765,000	Two hundred twelve	+ 212		765,212	.Guided discovery .Question and an-swer	.Arranging and writing numbers vertically for adding .Drawing numbers correctly	.Appreci-ation .Sharing	.Place value charts	.Appre-ciation curricu-lum page 95	
	Seven hundred sixty-five thousand			765,000															
Two hundred twelve	+ 212																		
	765,212																		
6	Round-ing off whole num-bers	Rounding off whole num-bers to the nearest ten thousands cor-rectly	Reads, writes and uses the words correctly: Round off Round up Round down Approximately.	Rounding off whole numbers to the nearest ten thousands using a number line Examples 1. Round off 19567 to the nearest ten thousands.  So, 19567 is nearest to 20000 than 10000	.Brain storming .Guided discus-sion	.Rounding off whole numbers to the nearest ten thou-sand cor-rectly													

WK	PD	THEME	TOP IC	SUB- TOPIC	COMPE- TENCES (SUBJECT)	COMPE- TENCES (LAN- GUAGE)	CONTENT	METHODS & TECH- NIQUES	LEARNING ACTIVITIES	LIFE- SKILLS & VALUES	L/T AIDS	REF	RMKS
3	7	NUMERACY	WHOLE NUMBERS	Rounding off whole numbers to the nearest ten thousands	The learner; .rounds off whole and numbers to the nearest Ten thousands.	.reads and writes vocabulary correctly	Rounding off whole numbers to the nearest ten thousands Examples 1. Round off 438,752 to the nearest ten thousand. 4 3 8 7 5 2 Determinant place value (P.V.) is thousand. Required place value (R.P.V.) is Ten thousand. 430000 + 10000 440000	.Question and answer. .Demonstration. .Guided discovery .Guided discussion .Brain storming	.Rounding off whole numbers to the nearest ten thousand correctly. .Problem solving .Decision making .Effective communication	.Creative thinking .Place value charts .Flash cards	.MK Thinking primary maths Pupils book 5 page 20-22		
4	1			Reading and writing roman numerals	.changes Hindu Arabic numerals to Roman numerals correctly	.reads and writes Roman numerals correctly	Converting Hindu Arabic numerals to roman numerals Examples: Convert 35 to Roman Numerals 35 = 30 + 5 = XXX V 35= XXXV	.Explanation .Guided discovery	.Changing Hindu-Arabic and Arabic writing numerals to Roman numerals correctly	.Sharing .Appreciation			
	2				Converts Roman numerals to Hindu Arabic numerals correctly	.reads and writes vocabulary correctly.	Converting roman numerals to Hindu Arabic numerals Examples. Express XLVIII into Hindu Arabic numerals. XLVIII = XL VIII = 40 + 8 XLVIII = 48		.Converting Roman numerals to Hindu Arabic writing numerals in Roman numerals correctly.				

WK	PD	THEME	TOPIC	SUBTOPIC	COMPETENCES (SUBJECT)	COMPETENCES (LANGUAGE)	CONTENT	METHODS & TECHNIQUES	LEARNING ACTIVITIES	LIFE-SKILLS & VALUES	L/T AIDS	REF	RMKS
4	3	Numeracy	Operation on whole numbers	Addition of whole numbers without regrouping	The learner .adds whole numbers up to 6 digits with or without regrouping .solves word problems	The learner .Describing the meaning of addition verbally .Reading word problems loudly	Addition of whole numbers up to 6 digits without regrouping Example Work out: 413,213 to 136,401 $\begin{array}{r} 4\ 1\ 3,\ 2\ 1\ 3 \\ +\ 1\ 3\ 6,\ 4\ 0\ 1 \\ \hline 5\ 4\ 9,\ 6\ 1\ 4 \end{array}$	.Guided discovery .Guided discussion .Explanation .Demonstration .Brain storming	.Computing problems involving addition .solving simple word problems in real life situation	.Creative thinking .Effective communication .Problem solving .Appreciation .sharing .love	.Counters .Abacus	P5 Curriculum Pg 96	
	4			Addition of whole number with regrouping	.solves word problems correctly	.Reads word problems loudly	Addition of whole numbers with regrouping Example Add: 412,436 to 348,348 Arrange numbers vertically according to their place value and then add.						
	5			Word problems on addition of whole numbers	The learner; .solves the word problems correctly	The learner .reads and writes digits in their correct place value	Word problems on addition of whole numbers Example Find the sum of 165750 and 248675 $\begin{array}{r} 1\ 6\ 5\ 7\ 5\ 0 \\ +\ 2\ 4\ 8\ 6\ 7\ 5 \\ \hline 4\ 1\ 4,\ 4\ 2\ 5 \end{array}$		.Solving the word problems .Reading and writing digits in correct place values			P5 curriculum Pg 96	

WK	PD	THEME	TOPIC	SUB-TOPIC	COMPETENCES (SUBJECT)	COMPE-TENCES (LANGUAGE)	CONTENT	METHODS & TECHNIQUES	LEARNING AC-TIVITIES	LIFE-SKILLS & VALUES	L/T AIDS	REF	RMKS
4	6	Numer-acy	Opera-tion on whole num-bers	Subtrac-tion of whole numbers	The learner; • subtracts whole number terms up to 6 digits without or with regrouping • solves simple word problems	The learner; • uses other terms for subtraction such as decrease, take away, minus, less	Subtraction of whole numbers up to 6 digits without regrouping Example Work out: 854,796 - 513,264 854,796 -513,264 3 4 1 5 3 2	• Guided discovery • Guided discussion • Explanation • Demonstration • Brain storming	• Computing problems involving subtraction • Reading and solving simple problems in real life situation	• Effective Communication • Critical thinking • Problem solving <u>Values</u> Confidence Audibility Share	Counters Abacus	Pg 20-22 P.5 Curri. Page 96	
	7			Subtrac-tion of whole number up to 6-digits with re-grouping	The learner; Subtracts whole number up to 6-digits with re-grouping	Forms English sentences relating to subtraction.	Subtraction of whole number up to 6-digits with regrouping Example: Subtract: 943,062 - 357,184		Subtracting whole numbers upto six digits with regrouping	Problem solving Effective communication <u>Values</u> • Love • caring	counters	MK Bk 5 Pg 26-27	
	5			Word problems on subtraction of whole numbers	The learner • solves simple word problems correctly	• uses other terms for subtraction correctly	Word problems on subtraction of whole numbers Example Take away 648,215 - from 885,643.		• Solving simple word problems • using other terms for subtraction such as take away minus	Critical thinking <u>Values</u> Share love	counters	MK Book 5Pg 26-27	

WK	PD	THEME	TOPIC	SUB-TOPIC	COMPETENCES (SUBJECT)	COMPETENCES (LANGUAGE)	CONTENT	METH-ODS & TECH-NIQUES	LEARNING AC-TIVITIES	LIFESKILLS & VALUES	L/T AIDS	REF	RMKS
5	2	Numer-acy	Opera-tion on whole num-bers	Multipli-cation by 2 digit natural numbers	The learner: • multiplies num-bers up to 4 digits by 2 digit natural numbers • Interprets and solves word prob-lems	The learner • using correct mathemati-cal terms for multi-plication in sen-tences • playing games involving multiplication	Multiplication of three-digit numbers by a two-digit numbers Example Multiply 225 by 14 $\begin{array}{r} 225 \\ \times 14 \\ \hline 900 \\ + 2250 \\ \hline 3150 \end{array}$	- Guided discovery - Guided discus-sion - Expla-nation - Demon-stration - Brain storming	- Multiplying up to 4 digit numbers by 2-digit numbers - Reading and solving simple word problems in real life situation	- Effective Communica-tion - Problem-solving - Critical thinking	• Multi-plica-tion table	P5 Cur-ricu-lum Pg 97	
	3			Multiplica-tion of four digit num-bers by two digit num-bers	The learner multi-plies numbers up to 4 digits by 2 digit natural num-bers • interprets and solves word problems	The learner • uses correct mathemati-cal terms for multi-plication	Multiplication of four-digit numbers by two-digit numbers. Examples. Work out 4520 X 42 $\begin{array}{r} 4520 \\ \times 42 \\ \hline 9040 \\ + 180800 \\ \hline 189,840 \end{array}$		Multiplying num-bers by two digit numbers	Creative thinking <u>Values</u> sharing love Appreciation	Multi-plica-tion table	P5 cur-riculum pg 97	
	4			Multipli-cation by 2-digit natural numbers.	The learner • solves numbers involving word problems	The learner • reads vocabulary with correct infor-mation	Word problems on multiplication. Example Find the product of 1453 and 25		Multiplying up to 4 digit numbers by 2 digit numbers	Critical think-ing Cooperation <u>Values</u> Confidence share	Multipli-cation table	New MK bks Pg 28-29	

WK	PD	THEME	TOPIC	SUB-TOPIC	COMPETENCES (SUBJECT)	COMPETENCES (LANGUAGE)	CONTENT	METH-ODS & TECH-NIQUES	LEARNING AC-TIVITIES	LIFESKILLS & VALUES	L/T AIDS	REF	RMKS
5	5	Numer-acy	Opera-tion on whole num-bers	Multipli-cation by 2-digit natural numbers.	The learner: • multiplies num-bers up to 4 digits by 2 digit natural numbers • interprets and solves word prob-lems	The learner; • reads vocabu-lary with correct in-formation	Word prob-lems on mul-tiplication. Example Find the prod-uct of 1453 and 25 $\begin{array}{r} 1453 \\ \times 25 \\ \hline 7265 \\ + 29060 \\ \hline 36325 \end{array}$	Guided discovery Small group dis-cussion Think, pair share	• Multiplying up to 4-digit num-bers by 2-digit numbers • Read-ing and solving simple word problems	Effective Com-munication Problem-solving Critical thinking Values: sharing, love, Appreciation	Multiplication table counters	New MK bks Pg 28-29	
	6			Division of whole numbers by 2 digit numbers.	The learner • di-vides whole num-bers using 1-2 digit numbers with or without remain-ders • solves sim-ple word problems	The learner • uses mathematical terms for division eg Share, quotient, dividend in sen-tences • interpret-ing word problems	Division of whole num-bers by 2 digit num-bers. Example Divide 800 by 25 $\begin{array}{r} 25 \overline{)800} \end{array}$		• Working out di- vision sums • de- scribing each step • Reading and solving word problems in real life situations	Problem solving Team work <u>Values</u> Share love	• Effective Communica- tion • Prob- lem-solving • Critical think- ing • Values: sharing, love, Appreciation		New MK bks Pg 30

5	7	Numeracy	Operation on whole numbers	Division of whole numbers by 2-digit numbers	The learner • Divides whole number with a remainder • Solves simple word problems	The learner • Divides whole number with a remainder • Correctly using mathematical terms for division eg divided by, share quotient, dividend in sentence	Dividing by two-digit number with a remainder Example: Divide 13,276 by 60 $\begin{array}{r} 221 \\ 60 \overline{)13276} \\ \underline{60 \times 2 = 120} \\ 127 \\ \underline{60 \times 2 = 120} \\ 76 \\ \underline{60 \times 1 = 60} \\ 16 \end{array}$ $13276 \div 60 = 221 \text{ rem } 16$	- Guided discovery - Guided discussion - Explanation - Brain storming	- Working out division sums • describing each step - Reading and solving word problems in real life situation	- Working out division sums • describing each step - Reading and solving word problems in real life situation	Counters Bottle tops	- Effective Communication - Critical thinking - Creative thinking Values: sharing, Love, Appreciation	P5 Curriculum pg 97	
6	1			Word problems on division of whole numbers.	The learner • solves the word problems • divides, multiplies and subtracts	• interpreting problems involving the four basic operation	Word problems on division of whole numbers. Example: Find the quotient of 1,845 by 15. $\begin{array}{r} 123 \\ 15 \overline{)1845} \\ \underline{15 \times 1 = 15} \\ 34 \\ \underline{15 \times 2 = 30} \\ 45 \\ \underline{15 \times 3 = 45} \\ 0 \end{array}$ The quotient is 123	Interpreting problems involving the four basic operations	Interpreting problems involving the four basic operations	- Solving the word problems - Reading and writing the quotients	- Solving the word problems - Reading and writing the quotients	Team work Cooperation <u>Values</u> Friendship formation Sharing	P5 Curriculum pg 97	

WK	PD	THEME	TOPIC	SUB TOPIC	COMPETENCES (SUBJECT)	COMPE- TENCES (LANGUAGE)	CONTENT	METHODS AND TECH- Niques	ACTIVITIES (SPECIAL NEEDS)	ACTIVITIES (SUG- GESTED)	IMS	INDICATORS OF LIFE SKILLS AND VALUES	REF	REM
6	2	Numeracy	Operation on whole numbers	Mixed Operations	The learner • uses the operations of addition, subtraction, multiplication and division to solve problems in real life situation	The learner • interprets problems involving the four basic operations	Mixed Operations Example Work out $4 - 6 + 9$ $(4 + 9) - 6$ $13 - 6 = 7$	• Guided discovery • Guided discussion	• Reading and solving real life problems • Solving problems involving addition and subtraction	• Reading and solving real life problems	Coun- ters	• Effective Communication • Critical thinking • Creative thinking <u>Values</u> Sharing Love Caring	P.5 Curri. Pg 97 New MK bk 5 Pg 32	
	3			Word prob- lems in- volving mixed opera- tions	The learner • uses the operations of addition, subtraction, multiplication and division to solve problems in real life situation	The learner • interprets problems involving the four basic operations	Word problems involv- ing mixed operation Examples Okenya had Sh. 2,000 and his father gave him Sh. 5,000 more. He later spent Sh. 3,200. How much was left? $\text{Sh. } (2,000 + 5,000) - \text{Sh. } 3,200$ $\text{Sh. } (7,000 - 3,200) = \text{Sh. } 3,800$	• Explanation • Brain storming	• Using the operation of addition, subtraction, multiplication and division to solve problems in real life situation • Interpreting the basic four operation	• Using the operation of addition, subtraction, multi- plication and division to solve prob- lems in real life situation • Interpreting the basic four operation	A chart		New MK bk 5 Pg 33

8	1	Numeracy	Number patterns and sequences	Progression involving division	The learner; • finds progression involving division	The learner; • reads and writes the vocabulary articulately.	Finding progression involving division Example 1. Find the next two numbers in the sequence: 192, 96, 48, 24, __, __ 192, 96, 48, 24, 12, 6	• Demonstration • Explanation • Question and answer r • Think Pair share	• Finding progression involving division	• Reading and writing the vocabulary articulately.	• Multiplication table	• Effective communication • Problem solving • Appreciation	• MK Pupil's bk 5 page 42	
	2			Finding the rate of progression	The learner; • finds the rate of progression of the patterns.	The learner; • reads and writes the vocabulary correctly.	Finding the rate of progression Examples. 1. Find the rate of progression in the series: 12, 32, 52, 72 The rate of progression is 20	• Guided discovery • Guided discussion • Question and answer • Demonstration	• Find the rate of progression of the patterns.	• Reading and writing the vocabulary correctly.	• Counters	• Effective communication • Creative Thinking • Logical thinking	• MK Pupil's bk 5 page 43	
	3			Finding factors of the numbers	The learner; • writes factors of the numbers accurately.	The learner; • describes G.C.F and factors.	Finding factors of the numbers Examples: 1. Write the factors of 12 F12 = {1, 2, 3, 4, 6, 12}	• Think pair share • Question and answer r • Demonstration	• Writing factors of the numbers accurately.	• Describing factors • finding greatest common factor	Multiplication table	• Problem solving • Effective communication • Appreciation • Fluency	• MK Pupil's bk 5 page 44	
	4			Finding the common factors of numbers	The learner; • lists the common factors of numbers	The learner; • describes factors and GCF	Finding the common factors of numbers Examples 1. Find the common factors of 12 and 18. F12 = {1, 2, 3, 4, 6, 12} F18 = {1, 2, 3, 6, 9, 18} CF = {1, 2, 3, 6}	• Guided discovery • Guided discussion • Explanation	• Listing the common factors of the given numbers.	• Describing common factors • Finding GCF	Multiplication table	• Creative Thinking • Problem Solving • Caring	• MK Pupil's bk 5 page 45-47	

WK	PD	THEME	TOPIC	SUB TOPIC	COMPETENCES (SUBJECT)	COMPE- TENCES (LAN- GUAGE)	CONTENT	METHODS AND TECHNIQUES	ACTIVITIES (SPECIAL NEEDS)	ACTIVITIES (SUG- GESTED)	IMS	INDICATORS OF LIFE SKILLS AND VALUES	REF	REM
8	5	Numer-acy	Number pat-terns and sequences	Finding the Highest Common Factor (HCF)	The learner; • works out the highest common factor of numbers.	The learner; • describes the highest com- mon factor of the numbers.	Finding the high- est common fac- tor (HCF) Examples. 1. What is the highest common factor of 18 and 24? F18 = {1, 2, 3, ⑥ 9, 18} F24 = {1, 2, 3, 4, ⑥ 8, 12, 24} HCF of 18 and 24 = 6	• Brain storming • Guided discovery • Demonstration	• Working out the HCF	• Working out the HCF	Multi- plica- tion ta- ble	• Effective communi- cation • Critical thinking • Logical thinking • Values: sharing, Love	• P5 Cur- ricu- lum page 98- 99 • MK Pu- pil's bk 5 page 48	
	6			Finding mul- tiples of numbers	The learner; • lists the multiples of numbers	The learner; • describes multiples	FINDING MULTI- PLES OF NUM- BERS Examples. 1. Write down all multiples of 4 less than 25 4 x 1 = 4 4 x 2 = 8 4 x 3 = 12 4 x 4 = 16 4 x 5 = 20 4 x 6 = 24 M ₄ = {4, 8, 12, 16, 20, 24}	• Explanation • Guided discus- sion • Demon- stration	• Listing the multiples of numbers	• Listing the multiples of numbers	Multi- plica- tion ta- ble	• Effective communi- cation • Creative Thinking • logical thinking	• MK Pu- pil's bk 5 page 46	
	7			Finding the Lowest Common Multiples (LCM)	The learner; • finds the lowest common multiple of numbers	The learner; • describes the least com- mon multiple (LCM)	FINDING THE LOWEST COM- MON MULTIPLES (LCM) Examples 1. Find the lowest common multiple (LCM) of 9 and 12. M ₉ = {9, 18, 27, 36, 45, -----} M _{12} = {12, 24, 36, 48, -----} The lowest com- mon multiple (LCM) of 9 and 12 is 36. 2. Find the least common multiple of 3 and 18.	• Demonstration • Guided discovery • Question and answer	• Finding the LCM of numbers	• Finding the LCM of num- bers	Multi- plica- tion ta- bles	• Effective communi- cation • Critical thinking • problem solving <u>Values</u> Sharing Appreciation	• MK Pu- pil's bk 5 page 48- 49	

WK	PD	THEME	TOPIC	SUB TOPIC	COMPE-TENCES (SUB-JECT)	COMPE-TENCES (LAN-GUAGE)	CONTENT	METHODS AND TECH-NIQUES	ACTIVITIES (SPECIAL NEEDS)	ACTIVITIES (SUGGESTED)	IMS	INDICATORS OF LIFE SKILLS AND VALUES	REF	REM
9	1	Numer-acy	Number Patterns and Sequences	Types of num-bers	The learner; • lists the exam-ples on types of numbers	The learner; • reads the types of numbers	Review on types of num-bers. Whole no: {0, 1, 2, 3, 4, -----} Counting no: {1, 2, 3, 4, -----} Even no: {0, 2, 4, 6, 8, -----} Odd no: {1, 3, 5, 7, -----}	• Guided dis-covery • Guided dis-cussion • Brain storming	• Listing the ex-amples of num-bers • reading and writing the ex-amples	• Listing the ex-amples • reading and writing the ex-amples		• Effective com-munication • Critical think-ing • Creative think-ing	P.5 Curri. Page 99	
	2			Prime Num-bers	The learner; • lists the exam-ples of prime numbers	The learner; • describes the types of num-bers	Prime Numbers A Prime Number is a number with only two factors. Eg: {2, 3, 5, 7, 11, 13, 17, 19, --- ----} Example: List all prime numbers be-tween 9 and 20. = {11, 13, 17, 19}	• Guided dis-cussion • Explanation	• Listing the ex-amples • Describing the types	• Listing the ex-amples • Listing the types		Creative think-ing <u>Values</u> - Care - Love - Sharing	New MK bk 5 pg 48	
	3			Compo-site Num-bers	The learner; • lists the exam-ples of compo-site numbers correctly	The learner; • reads and writes the examples of composite num-bers	Composite Numbers Are numbers that have more than two factors. Example: List down the first 10 compo-site numbers. {4, 6, 8, 9, 10, 12, 14, 15, 16, 18}	• Guided dis-cussion • Explanation	• Listing the ex-amples • reading and writing the ex-amples	• Listing the ex-amples • reading and writing the ex-amples		• Problem solv-ing • Critical think-ing Effective communication	New MK bk 5 pg 49

10	3	Numeracy	Fractions	Word prob- lems on addition and sub- traction	The learner; adds and sub- tracts word prob- lems on addition and subtraction of fractions with different denomi- nators correctly	The learner; reads and solve prob- lems involving fractions with different de- nominators correctly	Word problems involving addi- tion and sub- traction of frac- tions. Example: A girl had a full cup of water and used 1/3 of it to take medicine. What fraction of water remained?	• Guided discovery • Guided discussion • Explana- tion • Demon- stration	• Adding frac- tions with dif- ferent denomi- nators • Subtracting fractions with different de- nominators	• Adding and solving fractions with different de- nominators • Subtracting fractions with different denom- inators	• Or- anges • Sugar canes • Flash cards	• Effective Communi- cation • Problem solving • Values: Care, Share	• P5 Curricu- lum page 100 • New MK Pupil's bk 5 Page 57-59	
	4			Addition of mixed fractions	The learner; adds the mixed fractions cor- rectly	The learner; reads and solve the prob- lems involving mixed frac- tions with dif- ferent denomi- nators	Addition of mixed fractions. Example: Add: $1\frac{3}{4} + 2\frac{1}{3} + 1\frac{1}{2} =$ $(1+2+1) + \frac{3}{4} + \frac{1}{3} + \frac{1}{2} =$ $4 + \frac{9+4+6}{12} = 4 + \frac{19}{12}$ $4 + 1\frac{7}{12} = 5\frac{7}{12}$	• Guided discovery • Guided discussion • Explana- tion • Demon- stration	• Adding the mixed frac- tions with dif- ferent denomi- nators	• Reading and solving mixed fractions with different denom- inators		• Effective Communi- cation • Critical thinking • Values: Sharing, Love	• New MK bk 5 pg 56-57	
	5			Word prob- lems on addition of mixed fractions	The learner; in- terprets and solve problems on addition of mixed fractions	The learner; reads and solves prob- lems involving mixed frac- tions	Word problems on addition of mixed fractions. (Work out word problems based on the process of adding mixed whole numbers and fractional parts separately as shown above.)	• Guided discovery • Guided discussion • Explana- tion • Demon- stration	• Adding mixed frac- tions involving word prob- lems	• Reading and solving prob- lems involving mixed fractions		• Apprecia- tion • Creative thinking • Problem solving	• New MK bk 5 pg 58	

WK	PD	THEME	TOPIC	SUB TOPIC	COMPETENCES (SUBJECT)	COMPE- TENCES (LAN- GUAGE)	CONTENT	METHODS AND TECH- NIQUES	ACTIVITIES (SPECIAL NEEDS)	ACTIVITIES (SUG- GESTED)	IMS	INDICA- TORS OF LIFE SKILLS AND VAL- UES	REF	REM
10	6	Numeracy	Fractions	Subtrac- tion of mixed frac- tions	The learner; adds and subtracts the fractions involving mixed fractions with different de- nominators cor- rectly.	The learner; reads and solves prob- lems involving different de- nominators correctly.	Subtraction of mixed fractions with different de- nominators. Example: Abel had 1 1/2 cakes and Jane had 2 2/3 cakes. How many cakes did the two children have? (Note: The hand-written example on the page uses addi- tion to solve this word problem). $1\frac{1}{2} + 2\frac{3}{4}$ $1+2 + (\frac{1}{2} + \frac{3}{4})$ $3 + (\frac{1}{2} \times 4 + \frac{3}{4} \times 4)$ $\frac{3+(1 \times 2)+(3 \times 1)}{4}$ $\frac{3+(2+3)}{4}$ $3 + \frac{5}{4}$ $3 + 1 + \frac{1}{4}$ $= 4\frac{1}{4} \text{ cakes}$	• Guided dis- covery • Guided dis- cussion • Explanation • Demonstra- tion	• Add- ing/Subtract- ing fractions with different denomina- tors.	• Reading and solving prob- lems involving mixed frac- tions.	Real objects like • Or- ange • Sugar canes	• Problem-solving <u>Values</u> • Care • Sharing	• New MK bks • Pg 58	
	7			Subtrac- tion of mixed frac- tions with different denomina- tors	The learner; sub- tracts mixed frac- tions with different denominators cor- rectly.	The learner; reads and solves prob- lems involving mixed frac- tions with dif- ferent denom- inators.	Subtraction of mixed fractions. Example: Work out: $3\frac{4}{5} - 2\frac{1}{2}$ $3-2+(\frac{4}{5} - \frac{1}{2})$ $1+(\frac{4}{5} \times 10 - \frac{1}{2} \times 10)$ $\frac{1+(8-5)}{10} = 1\frac{3}{10}$	• Guided dis- covery • Guided dis- cussion • Explanation • Demonstra- tion	• Subtracting mixed frac- tions with dif- ferent de- nominators.	• Reading and solving prob- lems involving mixed frac- tions.	Real objects	Creative thinking Critical thinking <u>Values</u> • Apprecia- tion • Share • Care	• New MK bk 5 pg 59	
	1			Multiplying proper fractions by proper fractions	The learner; multi- plies proper frac- tions by proper fractions correctly.	The learner; reads and solves prob- lems involving multiplication of fractions correctly.	Multiplying proper fractions. Exam- ple: Work out: $3/4 \times 2/3$. $= (3 \times 2) / (4 \times 3) = 6/12 = 1/2.$	• Guided dis- covery • Guided dis- cussion • Explanation • Demonstra- tion	• Multiplying proper frac- tions by proper frac- tions.	• Reading and solving multi- plication of fractions.	Real objects	• Effective Communi- cation • Critical thinking <u>Values</u> - Audibility appreciation	• New MK bk 5 pg 60

11	2	Numeracy	Frac-tions	Multiplying proper fractions by proper fractions	The learner; multiplies proper fractions by proper fractions correctly.	The learner; reads and solves problems involving multiplication of fractions correctly.	Multiplying proper fractions. Example: Work out: $\frac{3}{4} \times \frac{2}{3}$. $\frac{(3 \times 2)}{(4 \times 3)}$ $\frac{6}{12} = \frac{1}{2}$	• Guided discovery • Guided discussion • Explanation • Demonstration	• Multiplying proper fractions by proper fractions.	• Reading and solving multiplication of fractions.	Real objects Flash cards	• Effective Communication • Critical thinking <u>Values</u> Audibility share	• New MK bk 5 pg 60	
	3			Multiplication of whole numbers by fractions	The learner; multiplies fractions by natural numbers correctly.	The learner; reads and solves problems involving multiplication of fractions correctly.	Multiplying a whole number by a fraction and vice-versa. Example 1: Work out: $4 \times \frac{5}{12}$ $\frac{5}{12} + \frac{5}{12} + \frac{5}{12} + \frac{5}{12}$ $5+5+5+5$ 20 $\frac{20}{12} = 1 \frac{2}{3}$ Example 2: Kalule harvested 92 sacks of beans and sold $\frac{3}{4}$ of the beans to Samuel. How many sacks did he sell? $\frac{3}{4}$ of 92 sacks $\frac{3}{4} \times 92$ 3×23 = 69 sacks.	• Guided discovery • Guided discussion • Explanation • Demonstration	• Multiplying whole numbers by fractions. • Multiplying fractions by whole numbers. • Multiplying fractions by whole numbers.	• Multiplying whole numbers by fractions. • Multiplying fractions by whole numbers . • Reading and solving problems involving multiplication of fractions.	• Real Ob-jects •Flash cards	• Effective Communication • Problem-solving • Critical thinking • Creative thinking <u>Values</u> Share Love Care Confidence	• New MK bk 5 pg 60-61

11	4	Numeracy	Fractions	Finding Reciprocal	The learner; finds the reciprocal of a number correctly.	The learner; reads the reciprocal and solves multiplication in whole numbers and fractions.	Finding the reciprocal of a number. Example: Find the reciprocal of $2\frac{3}{7}$ Let the reciprocal be m. $2\frac{3}{7} \times m = 1$ $2\frac{3}{7} \times m = 1$ $\frac{17}{7} \times m = 1$ $\frac{17m}{7} \times 7 = 1 \times 7$ $\frac{17m}{7} = \frac{7}{7}$ $M = \frac{7}{17}$ $\therefore$ the reciprocal of $2\frac{3}{7}$ is $\frac{7}{17}$	- Guided discovery - Guided discussion - Explanation - Brain storming	- Finding the reciprocal. - Finding the reciprocal of the number.	- Finding the reciprocal of a number. - Finding the reciprocal of the number.	Flash cards	- Effective Communication - Critical thinking - Values - Audibility - Confidence	• New MK bk 5 Pg 63	
	5			Dividing whole numbers by Fractions	The learner; divides a whole number by fractions correctly.	The learner; reads and solves problems involving multiplication of fractions.	Dividing Whole numbers by Fractions. Example: Ajuwa poured 20 litres of honey into $\frac{1}{4}$ litre bottles. How many bottles did he fill? $20 \div \frac{1}{4}$ $20 \div (\frac{1}{4}) \text{ rec}$ $20 \times \frac{4}{1}$ $(\frac{20 \times 4}{1})$ $\frac{80}{1}$ $= 80 \text{ bottles.}$	- Guided discovery - Guided discussion - Explanation - Brain storming	- Dividing a whole number by fractions. - Reading and solving problems involving multiplication of fractions.	- Dividing a whole number by fractions. - Reading and solving problems involving multiplication of fractions.	- Real objects - Flash cards	- Problem solving - Critical thinking - Values - Care - love	• New MK bk 5 Pg 64	
	6			Dividing Fractions by whole numbers	The learner; divides a fraction by a whole number.	The learner; reads and solves problems involving multiplication of fractions.	Dividing Fractions by whole numbers. Example: Work out: $\frac{1}{4} \div 6$. $\frac{1}{4} \div (\frac{6}{1}) \text{ rec}$ $\frac{1}{4} \times \frac{1}{6}$ $\frac{1 \times 1}{4 \times 6}$ $= \frac{1}{24}$	- Guided discovery - Guided discussion - Explanation - Brain storming	- Dividing a fraction by a whole number. - Reading and solving multiplication of fractions.	- Dividing a fraction by a whole number. - Reading and solving multiplication of fractions.	Real objects	- Effective Communication - Values - Sharing - Audibility	• New MK bk 5 Pg 65
