Descent Dressing

Descent dressing is a concern by people in our society in all walks of life. It is an everyday topic in places of worship, schools and community.

This gospel has spread but the youth and the so called modern people has kept a deaf ear. This practice is dragging down the traditional culture and beliefs. The youth and the school going children are tightening their clothes, the trousers' shape have been changed to look like those of celebrities and musicians. Teachers no longer dress the way we used to admire, adults have followed the suit, they dress as if the world is about to end.

All these have left the responsible and concerned citizens speechless and the implication affect us. We all have the duty to perform in order to change this trend. Otherwise the situation is getting out of hand and the blame will come to us as assaying goes . "Our lives will begin to end when we keep quiet on the things that matter."

Together we shall end this vice and the glory of our culture and respect will be restored.
