**Uganda Certificate of Education
EOT TEST ASSESSMENT
S.3**

Paper 1

INSTRUCTION TO CANDIDATES:

*This examination paper consists of **two** Sections; **A** and **B**.*

*It has **six** examination items.*

*Section **A** has **two** compulsory items.*

*Responses to section **A** must be written in the spaces provided.*

*Section **B** has two parts; **I** and **II**.*

*Respond to only **one** item from **each** part.*

*Responses to section **B** must be written in the answer booklet(s) provided*

*Respond to **four** items in all.*

*Responses to each item in section **B** should start on a fresh page.*

*Any additional **item(s)** answered will **not** be scored.*

Item No.	Basic code	Weighted Score	Scorers' Initials
1	T		
	D		
	E		
____(3/4)	P		
	S		
	B		
____(5/6)	N		
	M		
	Be		
Total Weighted Score			

SECTION A

Respond to all items in this section in the spaces provided

Item 1.

Two students of Anaka Intergrated School were picked at random by their chemistry teacher to look at the nature of their white shirt and determine which cleaning agents they use. Peter was putting on white shirt-stained brown and said he uses cleaning product **X** which is not the case with Gladys who uses cleaning product **Y** as shown in figure 1 and figure 2 below. The students want to know more about the products and how it helps in cleaning and they have approached you for help.

Figure 1 cleaning product X Figure 2 cleaning product Y

Task

- a) Explain the problem Peter made in choosing cleaning product **X**

- b) How does the cleaning product Peter use work?

- c) What is the impact of using the cleaning products and how it can be mitigated.

d) Make an evaluation of the products

SECTION B

PART I

*Respond to only **one** item from this part in the answer booklet(s) provided.*

Item 3.

Due to wide range of uses, ethanol is highly demanded country wide, making the government to clear an investor to set up ethanol manufacturing plant in one of the areas around Nwoya district due to the availability of raw materials like cassava, bananas and sorghum. However, the locals are against the proposal claiming that they don't know how the process of production will be carried out, the economic and social benefits of manufacturing plant and that it may have a negative impact on their land and the environment of which they may need to be informed on how it will be mitigated.

Task

Write details of the key issues you will present during the talk show.

Item 4

An investor is preparing to build an Oxygen producing company in Gulu City as a means to develop the community. The chairperson of one of the areas where the plant will be established has requested that they hold a meeting with the scientists to work in the industry so as to know more how they will produce the oxygen gas and how the youths of the community will benefit from having the industry in their community. The elderly people also want to know how dangerous the process of production of oxygen will be to the environment.

Figure 2 industrial manufacture of oxygen gas

Task

make a write up of answers you expect the scientists to give according to the requests of the chairman and the elderly people in Gulu city.

PART II

*Respond to only **one** item from this part in the answer booklet(s) provided.*

Item 5.

Air is an important natural resource that should be conserved. There is improper waste management in some homes and schools involving open dumping and burning of garbage. These activities release toxic fumes into the atmosphere hence affecting the air quality. The head teacher has tasked the school Science Club to organize a sensitization campaign aimed at mitigating the challenge. The theme of the campaign is **BE AN AIR QUALITY CHAMPION**. You have been chosen to speak to the rest of the students regarding the theme. Figure 4 shows rubbish being burnt in a residential area.

Figure 4 Burning of rubbish

Task

Make a write up of the message you will present.

Item 6

A youth group has a washing bay along the river. As they wash vehicles, the waste water drains into the river. When senior one students from a nearby school went for a chemistry study tour to river, they found the youth busy with their routine work. One of the students noticed that the water body around the washing bay looked abnormal. The students expressed worry about the safety of the people around the river and drew attention of the area authority. In response, the local authority has called for a meeting with the youth. You have been selected to give a sensitization talk.

Task

Write details of the key issues you will address during the sensitization talk.
