3. **RELIGION HAS BECOME A POINT OF INTEREST**

Religion has become an interesting topic of discussion these days. You find people at their places of work discussing religion. Even in places of entertainment like bars and disco halls, religion is talked about. Some people talk about it positively and others negatively.

What is most interesting is that majority of those who talk about it negatively don't even know what religion is. Pentecostals have been accused of introducing a new religion that has led many people astray. This is not worth believing. Whether Pentecostalism is a religion or not will be discussed some other time.

Now let us talk about religions in homes. Most parents want to bring up God-fearing children. It doesn't matter which denomination. What is important is that their children should believe in God.
