

P.6 TOPICAL BREAKDOWN TERM ONE 2026.

THEME: SETS

TOPIC1: SET CONCEPTS. (18 PERIODS)

SUBTOPIC 1: TYPES OF SETS

1. Identifying equal and unequal sets.
7. Forming and listing subsets.
8. Finding number of subsets.
9. Finding number of members given number of subsets
10. Listing proper subsets
11. Finding number of proper subsets using the formula
12. Finding the number of members given number of proper subsets
13. Describing different parts of a Venn diagram
14. Using Venn diagram to represent information

TOPIC 2: WHOLE NUMBERS. (14 periods)

SUBTOPIC 1: PLACE VALUES UP TO MILLIONS.

1. Review on formation of numerals using given digits and values.
2. Place values of numbers up to 7 digits.

SUBTOPIC 2: OPERATION ON VALUES OF DIGITS.

3. Addition and subtraction of values
4. Product and quotient of values of digits.
5. Writing numbers in expanded form(place values, values)
6. Writing numbers in expanded form with exponents.
7. Finding expanded numbers(place values, values)
8. Finding expanded numbers using exponents.

SUBTOPIC 3: NUMBERS IN WORDS AND FIGURES.

9. Writing numbers in words.
10. Writing numbers in figures.

SUBTOPIC 4: ROMAN NUMERALS UP TO M.

11. Reading and writing roman numerals up to M
12. Converting Hindu Arabic numerals to Roman Numerals.
13. Converting Roman numerals to Hindu-Arabic numerals.
14. Application of Roman numerals.

2. Differentiating equivalent sets from equal sets.
3. Identifying the universal set
4. Describing different parts in a Venn diagram.
5. Identifying complement of sets
6. Difference of sets.

SUBTOPIC 2: SUBSETS.

15. Using a Venn diagram to solve problems.
16. Calculating probability.
17. Probability of a coin
18. Probability of a dice
19. Probability of days.
20. Probability of other events.
21. Finding probability from a Venn diagram

TOPIC 3: OPERATION OF WHOLE NUMBER. (12 periods)

SUBTOPIC 1: ADDITIONS OF WHOLE NUMBERS.

1. Adding whole numbers up to 7-digits without regrouping.
2. Adding whole numbers up to 7-digits with regrouping.
3. Form and solve word problems.

SUBTOPIC 2: SUBTRACTING WHOLE NUMBERS

4. Subtracting whole numbers without regrouping
5. Subtracting whole numbers with regrouping.
6. Form and solve word problems.

SUBTOPIC 3: MULTIPLICATION OF WHOLE NUMBERS.

7. Multiplying whole numbers by 2 or 3-digit numbers.
8. Form and solve word problems.

SUBTOPIC 4: DIVISION OF WHOLE NUMBERS.

9. Dividing whole numbers by 2-digit numbers.
10. Form and solve word problems.
11. Using mixed operations to workout numbers.
12. Form and solve word problems

TOPIC 4: NUMBER PATTERNS AND SEQUENCES (25 periods).

SUBTOPIC 1: TESTS AND DIVISIBILITY OF 2, 3, 5.

1. Divisibility test of 2
2. Divisibility test of 3
3. Divisibility test of 5
4. Whole and counting numbers
5. Even and odd numbers
6. Triangular numbers
7. Square numbers
8. Prime numbers
9. Composite numbers
10. Finding consecutive counting numbers
11. Finding consecutive even numbers
12. Finding consecutive odd numbers
13. Forming number patterns.

SUBTOPIC 3: PRIME FACTORISATION

14. Finding prime factors using: (subscript/ set notation, multiplication/ power form)
15. Representing prime factors on Venn diagram.
16. Finding the G.C.F and the L.C.M using the Venn diagram.

SUBTOPIC 2: NUMBER PATTERNS.

TYPES OF NUMBERS

17. Finding unknown values on the Venn diagram.
18. Application of L.C.M
19. Application of G.C.F
20. Application of L.C.M and G.C.F.

SUBTOPIC 3: SQUARE NUMBERS.

21. Finding square numbers.
22. Finding square numbers of fractions.

SUBTOPIC 4: SQUARE ROOTS OF FRACTION.

23. Finding square roots using prime factorization.
24. Finding square roots of fractions.
25. Application of square roots

W K	P D	THE ME	TOPI C	SUBTOP IC	COMPETENCE		CONTENT		METH ODS & TECHN IQUES	ACTIVITIES		LIFE SKILL S & VALU ES	I.M	REF	REM
					SUBJECT	LANGUAG E				SPECIAL NEEDS	SUGGES TED				
1	1	S E T S	S E T C O N C E P T S	Types of sets: identifying equal and un equal sets	The learner; Organizes members for various sets. Compares elements in the different sets. Identifies equal and un equal sets.	The learner; Reads the word correctly. Spells the terms rightly Sets Unequal Equal	Equal sets have elements that are exactly the same in appearance and number. Symbol: = Example: Use equal sets or unequal sets. $X = \{1,2,3,4,5,6\}$ $Y = \{4,5,6,3,2,1\}$ Members of X and Y are exactly the same in number and appearance. X and Y are equal sets	Unequal sets have different number of members/ elements. Symbol: $\neq$ Example: Use equal or unequal sets. $A = \{a, b, c, d, e\}$ $B = \{x, y, i o, u\}$ Members in set A and B are different. A and B are unequal	- Guided discussions - Practical work - Explanation	Comparing sets Spelling Drawing Inquiring	Organizing members in different sets. Reading Writing Discussing	Critical thinking Effective communication Problem solving Creative thinking	Real objects Pens Pencils Cups Plates Rulers	MK Primary MTC Pupils book 6 pg 1	
	2			Differentiating Equivalent sets from equal sets	The learner; Formulates equivalent and equal sets Differentiates equivalent sets from sets.	The learner; Articulates the learnt terms correctly Interprets the read questions correctly	Equivalent sets are sets with the same number of elements. Symbol: $\equiv$ Or $\leftrightarrow$ Example: If $M = \{0,2,4,6,8\}$ and $N = \{1,3,5,7,9\}$ Set M and N have the same number of elements. M and N are equivalent sets	Equal sets are sets with exactly the same members and same number of members. Symbol: = Example: If $A = \{1,3,5,7,9\}$ $B = \{9,1,7,3,5\}$ Set A and B are equal sets	- Guided discovery - Think pair share - Try and error - Observation	Relating formed sets Counting elements Spelling	Forming sets Drawing Differentiating Active participation	Logical reasoning Evaluating facts Accuracy	Books Bottles Containers	MK Primary MTC Pupils book 6 pg 2

1	5	SETS	CONCEPTS	Identifying complement of sets	The learner; Identifies the members in the complement of the given set. List the members in the complement of the given set.	The learner; Pronounces the word complement. Discusses the meaning of the term complement correctly	A complement set contains members that are outside the mentioned set but part of the universal set. Shade, list and count members of the complement set.  A' is not part of set $A = A'$ $(A \cup B)'$ is not part of $A \cup B = (A \cup B)'$  $A' = \{6, 8, 7, 9\}$ $n(A)' = 4$ $(A \cup B) = \{f, g, h\}$ $n(A \cup B)' = 3$	- Guided discovery - Practical work - Think pair share - Explanation	Spelling Listing members in complement sets shading	Reading Drawing Discussing Identifying members	Critical thinking Effective communication Problem solving Analyzing sets Logical reasoning Evaluating facts Accuracy	Real objects Geometry set School compound Classroom environment Round objects Pair of compasses Rulers Pencils	MK Primary MTC Pupils book 6 pg 5 MK Primary MTC Pupils book 6 pg 11 Essential Uganda Primary MTC book 6 pg 7 The winners MTC book 6 page 8	
	6			Difference of sets	The learner; Identifies the difference of sets correctly. In the given Venn diagram. Lists the members of difference of sets in the given sets correctly	The learner; Spells the word difference correctly Articulates the term fluency correctly	Given a Venn diagram below of sets A and B  i) Elements of A which are not in set B are written as $A - B$ so, $A - B = \{a, b, c\}$ ii) Elements of set B which are not in set A are written as $B - A$ so, $B - A = \{f, g, g, i\}$  What is? (i) $P - Q = \{1, 2, 7\}$ (ii) $Q - P = \{4, 5\}$ (iii) $n(P - Q) = 3$ (iv) $n(Q - P) = 2$	- Guided discovery - Try and error - Explanation - Observation	Defining Recognizing the required regions	Counting member Forming subsets Listing members

2	1	S E T S	C O N C E P T S	Finding number of subsets	The learner; States the formula for finding the number of subsets per given questions.	The learner; Studies the available questions correctly Interprets the studied questions correctly	If A = {a, b, c}, how many subsets can be formed from set A? The number of elements is (n) = 3 elements The number of subsets is $(2^n) = 2^3$ $= 2 \times 2 \times 2$ $= 8$ subsets If K = {a, b, c, d, e}. Find the number of subsets in set K. The number of element is (n) = 5 The number of subsets is $(2^n) = 2^5$ $= 2 \times 2 \times 2 \times 2 \times 2$ $= 32$ subsets	Guided discovery Practical work Guided discussion	Counting members Inquiries	Reading Interpreting Applying the formula Finds the number of subsets	Critical thinking Effective communication Analyzing sets Problem solving Neatness Accuracy	counters pens Pencils Round objects Pairs of compasses	MK Primar y MTC Pupils book 6 pg 7																									
	2			Finding number of members given number of subsets	The learner; Express the number of given subsets as powers of 2. Finds number of elements given number of subsets	The learner; Reads the current questions correctly Comprehends the read questions correctly	Set M has 8 subsets. How many members does it have? Express 8 as power of 2 in form of 2^n <table><tr><td>2</td><td>8</td><td>8=</td></tr><tr><td>2</td><td>4</td><td>$2 \times 2 \times 2$</td></tr><tr><td>2</td><td>2</td><td>$2^n = 2^3$</td></tr></table> The number of elements for set M is 3	2	8	8=	2	4	$2 \times 2 \times 2$		2	2	$2^n = 2^3$	Set A has 16 subsets. Find the number of elements in set A Express 16 as power of 2 in form of 2^n <table><tr><td>2</td><td>16</td><td>16=</td></tr><tr><td>2</td><td>8</td><td>$2 \times 2 \times 2$</td></tr><tr><td>2</td><td>4</td><td>$\times 2$</td></tr><tr><td>2</td><td>2</td><td>$2^n = 2^4$</td></tr><tr><td></td><td>1</td><td>$n = 4$</td></tr></table> The number of elements for set M is 4	2	16	16=	2	8	$2 \times 2 \times 2$	2	4	$\times 2$	2	2	$2^n = 2^4$		1	$n = 4$	Explanation Guided group discussion observation	Substituting	Dividing Multiplying	Activeness	MK Primar y MTC Pupils book 6 pg 7
	2			8	8=																																	
2	4	$2 \times 2 \times 2$																																				
2	2	$2^n = 2^3$																																				
2	16	16=																																				
2	8	$2 \times 2 \times 2$																																				
2	4	$\times 2$																																				
2	2	$2^n = 2^4$																																				
	1	$n = 4$																																				
3	Using Venn diagrams to represent informatio n	The learner completes the venn diagrams using the given information correctly Solves the formed equations rightly	The learner; Studies the present questions keenly Comprehend the questions correctly	In a group of 10 girls, 5 got cakes(C), 6 got sweets (S), 2 did not get any of the two and some(X) got both. How many got both?  $5 - x + x + 6 - x = 10$ $13 - 13x = 10 - 13$ $-x / -1 = -3 / -1$ $x = 3$ Three pupils got cakes and sweets	Try and error	Completing the Venn diagram	Forming equations Solving equations	MK Primar y MTC Pupils book 6 pg 9

2	4	S E T S	S E T C O N C E P T S	Using Venn diagram to solve problems	The learner; Represents the available content in the Venn diagram Calculates the required per studied question with right steps	The learner; Studies the present questions carefully Interprets the studied information rightly	In a class of 30 pupils, 16 like English (E), 17 like Mathematics (M), while 7 do not like the two subjects. Find the number of pupils who: (a) like both (b) like only English (c) Like only Mathematics. $(16-x)+(x)+(17-x)+7 = 30$ $16+17+7-x+x-x = 30$ $40-x = 30-40$ $-x/-1 = -10/-1$ Like both $x = 10$ Only English: $16-x$ $16-10$ $= 6$ Mathematics only $17-x$ $17-10$ $= 7$	Guided discovery Explanation Guided group discussion	Completing the Venn diagram Solving the equation	Read Forming equations Finding the unknown Calculating the unknown	Critical thinking Effective communication Problem solving cooperation Logical reasoning	Pair of compasses Pencils Rulers Counters	MK Primary MTC Pupils book 6 pg 10 The Winner MTC Primary page 12	
	5			Calculating probability	The learner; Applies the formula correctly. Find the required probability per question studied	The learner; Reads the available questions keenly Comprehends the read questions	From a group of 15 men, 7 were to be given presents. What was the probability that any of them would get a present? The chance will be = $\frac{\text{Expected number}}{\text{Total number}}$ $= 7/15$ In a box, there were pieces of chalk, 6 red, 5 blue and 7 green. If a piece of chalk was to be picked at random without looking into the box. What would be the probability that the piece is ; a) red b) green Probability Red = $\frac{\text{Number of Red}}{\text{Total number}}$ $\frac{6}{5+6+7}$ $\frac{6}{18}$ Green: $\frac{\text{Number of Red}}{\text{Total number}}$ $\frac{7}{5+6+7}$ $= 7/18$	Practical work Mental work Observation Demonstration	Spelling Reading Stating the formula Adding	Defining terms Substituting into the formula	Analyzing data	Counters Charts	MK Primary MTC Pupils book 6 pg 11

	7			Finding the GCF and LCM	Discusses the difference between GCF and LCM. Finds the GCF and LCM of any given numbers correctly.	Writes GCF and LCM in full correctly. Spells the identified terms correctly.	Find GCF and LCM of 8 and 12 using a Venn diagram. $F_8 = \{2_1, 2_2, 2_3\}$ $F_{12} = \{2_1, 2_2, 3_1\}$ Common factors $F_8 \cap F_{12} = \{2_1, 2_2\}$ $GCF = 2 \times 2$ $GCF = 4$; $F_8 \cup F_{12} = \{2_1, 2_2, 2_3, 3_1\}$ $LCM = 2 \times 2 \times 2 \times 3 = 24$. $LCM = 24$. 9	1			Finding unknown values on Venn diagram	Explains the steps to be followed per Venn diagram studied. Calculates the unknown per studied Venn diagram.	Studies the available questions per Venn diagram keenly. Identifies the present and required items per Venn diagram studied.	Find the value of x and y. Factors of x = {2 ₁ ,2 ₂ ,2 ₃ ,3 ₁ } X = 2x2x2x3 X=108 Factors of y= {2 ₁ ,2 ₂ ,3 ₁ ,3 ₂ ,3 ₃ } Y= 2x2x3x3x3 y-108 F ₃₆ = {y,3 ₂ ,2 ₁ ,3 ₁ } 36=yx3x2x3 36=18y 36/18=18y/18 2=y {x,3 ₁ ,2 ₁ } Xx3x2=30 6x=30 6x/6 = 30/6 X=5																				
	2			Applicati on of LCM	Calculates the LCM of numbers meaning "to find the least". Finds the required items per question studied.	Discusses the meaning of least. Identifies the present and required items per question studied.	Find the least number of sweets that can be shared by 6 or 8 boys leaving a remainder of 4 sweets. <table border="1"><tr><td>2</td><td>6</td><td>8</td></tr><tr><td>2</td><td>3</td><td>4</td></tr><tr><td>2</td><td>3</td><td>2</td></tr><tr><td>3</td><td>3</td><td>1</td></tr><tr><td></td><td></td><td></td></tr></table> LCM = 2x2x2x3 LCM= 24 No. Of sweets LCM + remainder = 24 + 4 = 28. Find the minimum number of balls that are given to 12 or 18 players equally and only one ball remains. Find the smallest number that can be divided by 7 or 9 leaving no remainder. Find the smallest number of apples when divided by 9 girls or 12 and leaves a $1\frac{1}{5}$ remainder of 3.	2	6	8	2	3	4	2	3	2	3	3	1
