

BROAD EXAMINATIONS®

P.7 INTEGRATED SCIENCE EXAMINATION TRIAL SET II TERM II 2026

Time allowed: 2 hours 15 minutes.

Random No.					Personal No.		

Candidate's Name:

Candidate's Signature:

School Name:

Read the following instructions carefully:

1. This paper is made up of two sections: A and B.
2. Section A has 40 questions (40 Marks)
3. Section B has 15 questions (60 Marks)
4. Answer ALL questions in both sections A and B.
5. All answers must be written in the space provided in blue or black ball point pens and ink. Only diagrams should be done in pencil.
6. Unnecessary crossing of answers will lead to loss of marks.
7. Any handwriting, which cannot be easily read, may lead to loss of marks.
8. Do not fill anything in the boxes indicated for Examiners' use only.

SECTION A (40 MARKS)

1. Name any one example of long bones in the human body.

2. State any one importance of putting litter in a poultry house.

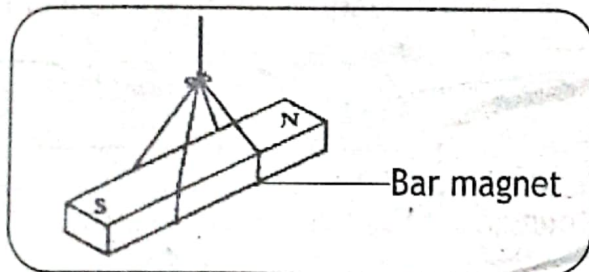

3. Apart from mammals, write down any other one group of warm blooded animals.

4. State the difference between mass and weight in terms of their units of measure.

5. Suggest any one way through which bats use echo in the environment.

6. Name any one immunisable disease prevented by the DPT vaccine.

The diagram below shows a property of magnets. Use it to answer question 7.

7. Write the property of magnets shown in the diagram above.

8. Name the digestive juice secreted in the stomach that helps in digestion of proteins.

9. Apart from weathering of rocks, give any other one method through which soil is enriched in the environment.

10. How are pocket valves in veins helpful during blood circulation?

11. Name the state of matter in which heat travels fastest.

12. State the importance of cold water during alcohol distillation.

13. Name the component of soil formed from decomposing organic matter.

14. Give any one example of spore bearing plants in the environment.

15. State any one method of controlling pests that attack root tuber crops.

16. How is a lactometer useful to a dairy farmer?

17. Name any one skin disease caused by a fungus.

18. Convert 35°C to $^{\circ}\text{F}$.

19. Fossils and minerals are nonrenewable resources. Suggest any one way through which man can conserve them.

20. Apart from charcoal, name any other one energy resource obtained from plants.

21. In which one way are chemical changes important in the environment?

22. Give any one habit that helps to keep human respiratory system healthy.

23. How is light helpful during the process of photosynthesis in plants?

24. State the advantage of preparing drinking water by boiling.

25. Give one reason why rat guards are fitted on granary stands.

26. What first aid can you give to a person scalded by hot water?

The diagram below shows a tool used in maintaining personal hygiene. Use it to answer question 27.

27. How useful is the tool shown above in maintaining personal hygiene?

28. Suggest any one reason why friction is regarded as a nuisance force.

29. Name the food deficiency disease caused by lack of iron in the diet.

30. Give any one reason why water closet toilets are not commonly used in rural areas.

31. Name any one human body organ which is found in the chest.

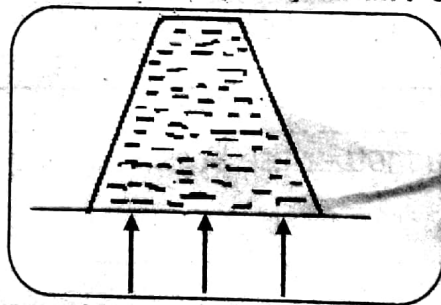

32. Where in humans does fertilization take place?

33. Name the mollusc which spreads bilharzia to humans.

34. State the use of a tooth brush in maintaining oral hygiene.

35. Write down any one characteristic of essential drugs.

The diagram below shows a property of air. Use it to answer question 36.

36. State the property of air shown in the diagram above.

37. State the function of the skull to the human body.

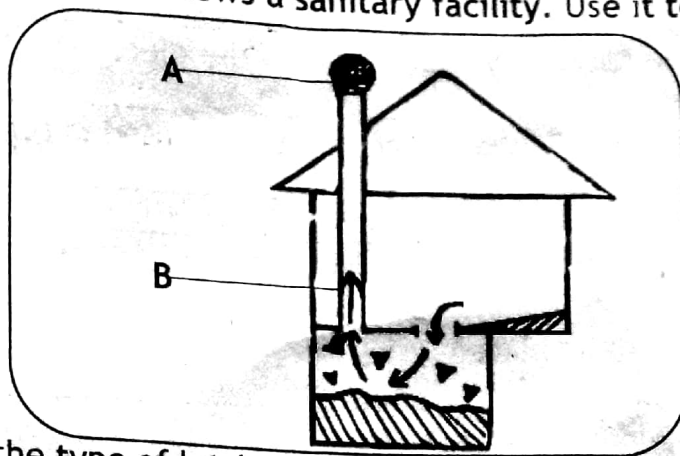

38. Give any one way through which animals benefit from plants in the environment.

39. Write down the use of a dip tank in the keeping of cattle.

40. Give any one reason why bees are called social insects.

SECTION B (60 MARKS)

The diagram below shows a sanitary facility. Use it to answer question 41.

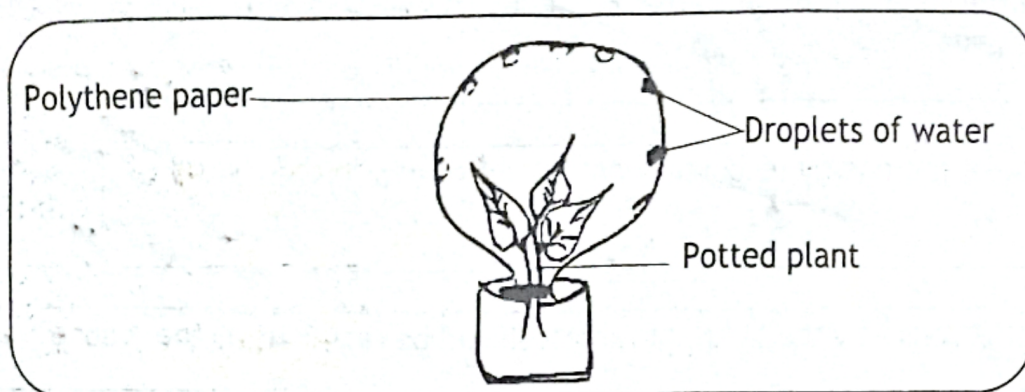

41. (a) Name the type of latrine shown above.
- (b) Name the parts represented by letters;
- (i) A _____
- (ii) B _____
- (c) Suggest any one reason why the latrine shown above should have a slanting floor.
42. (a) Write down any two advantages of breastfeeding to a baby.
- (i) _____
- (ii) _____
- (b) Under what two circumstances may a mother use bottle feeding instead of breastfeeding?
- (i) _____
- (ii) _____
43. (a) Give any two methods of vegetative propagation in growing crops.
- (i) _____
- (ii) _____
- (b) State any two advantages of vegetative propagation.
- (i) _____
- (ii) _____
44. (a) Write down the elements of Primary Health Care improved by doing these activities;
- (i) slashing tall grass around water sources
- (ii) feeding children on a balanced diet
- (b) Suggest two ways a family can prevent communicable diseases without using drugs.
- (i) _____
- (ii) _____
45. (a) Where does gaseous exchange take place in the human body?
- (b) Give one reason why the trachea is made of cartilage rings.

(c) Name any two diseases which affect the human respiratory system.

(i) _____

(ii) _____

The diagram below shows a plant process. Use it to answer question 46.

46. (a) Name the process represented in the diagram above.

(b) Mention any two factors which affect the process represented in the diagram above.

(i) _____

(ii) _____

(c) State any one advantage of the process above to plants.

47. (a) What term describes the scattering of seeds from a parent plant to other areas?

(b) Write down any two examples of seeds dispersed by water.

(i) _____

(ii) _____

(c) How are the above mentioned seeds adapted to their mode of dispersal?

48. (a) Name any two types of beehives commonly used in bee keeping.

(i) _____

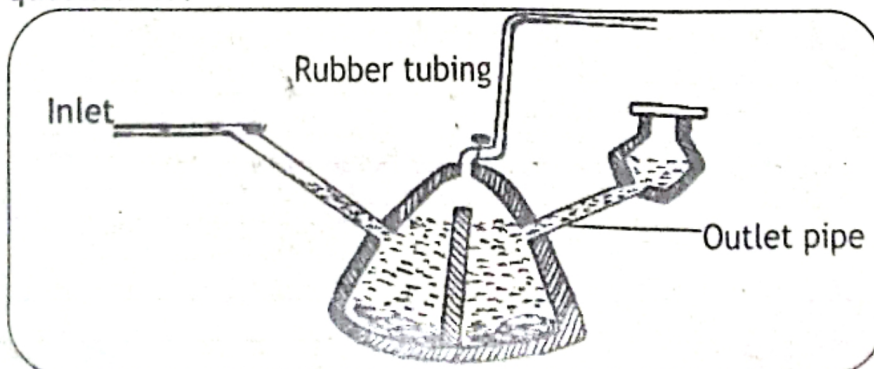

(ii) _____

(b) Write down any two products obtained from bees.

(i) _____

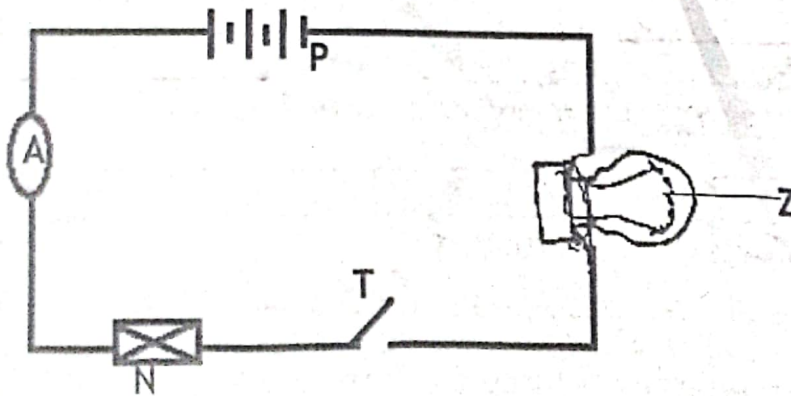

(ii) _____

The diagram below shows an energy resource got from the environment. Use it to answer question 49.

49. (a) Name any two materials used to produce energy in the diagram above.
- (i) _____
- (ii) _____
- (b) How is the outlet pipe important in the production of energy as shown in the diagram above?
- _____
- _____
- (c) How is the use of the energy resource shown above helpful in the control of diarrhoeal diseases?
- _____
- _____
50. (a) Give any two reasons why the hutch of rabbits should be raised above the ground.
- (i) _____
- (ii) _____
- (b) Name the type of hutch that is commonly used in villages.
- _____
- (c) What special name is given to the processed rabbit feed?
- _____
51. (a) State the main cause of fainting in human beings.
- _____
- (b) Give any two conditions which may lead to fainting.
- (i) _____
- (ii) _____
- (c) Suggest the first aid you would give to a person who has fainted.
- _____
- _____

The diagram below shows an electric circuit. Use it to answer question 52.

52. (a) Name part marked N.
- _____
- (b) How is part marked T useful to the circuit?
- _____
- _____
- (c) State one energy change that takes place at Z when the switch is closed.
- _____

(d) Calculate the amount of voltage that was used in the circuit above if each cell produces 1.5V.

53. (a) What do you understand by the term mulching?

(b) State any two advantages of mulching to a tomato farmer.

(i) _____

(ii) _____

(c) In which one way may mulching be a hazard to a crop farmer?

54. (a) Name the blood vessel which carries deoxygenated blood from the heart to the lungs.

(b) Name the wall which separates the heart into left and right sides.

(c) Name any two diseases which attack the circulatory system of humans.

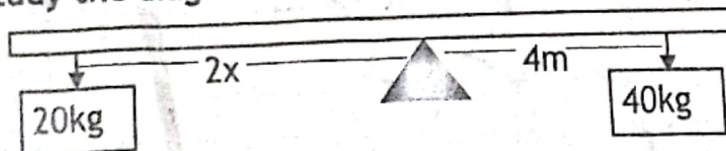

(i) _____

(ii) _____

55. (a) What name is given to a turning point of a lever?

(b) State the principle of moments:

(c) Study the diagram below and answer the question about it.

Calculate the value of X. (2 Marks)
