1	1	THE HUMAN BODY	MASCULAR-SKELETAL SYSTEM	HUMAN SKELETON	-The learner; 1. Defines the human skeleton 2. Identifies the components of the human skeleton i.e.; – Bones , – Cartilage – Ligament – Tendons – joints	The learner; -Pronounces spells, reads, writes words and sentences related to the human skeleton e.g., – Bones – Structure – Support – Joints etc.	-Definition of the human skeleton – Is a frame work of bones Note: A skeleton- Is a structure of tissues that provides support, moment and protection of an organism. -Components of the skeleton i.e. – Bones – Tendons – Joints – Ligaments	1. Explanation 2. Brain storming 3. Guided discussion 4. Questions and answers	– Identifying components – Reading of the skeleton – Defining the human skeleton – Taking notes	– Creative thinking – Self-awareness – Critical thinking – Appreciation – Care – Acceptance	-A drawing on a chart showing the structure of a human skeleton	-Hands on activities e.g. touching and feeling the models -Being audible -Proper positioning -Use of real objects	-P.7 curriculum Pg. 63 -New fountain P.7 learner's bk Pg 1	
	2				-The learner draws the structure of the human skeleton correctly. -Identifies the functions of the human skeleton	The learner, 1. Pronounce s, spells, reads and writes words and sentences related to the human skeleton	-The structure of the human skeleton -Label correctly the human skeleton.	-Explanation -Observation -Guided -Discussion	1.Drawing the structure of the skeleton 2.Identifying functions of the human skeleton					
	3			FUNCTIONS OF THE HUMAN SKELETON	-The learner mentions the functions of the human skeleton	-The learner pronounces spells, reads and write words related to the functions of the human skeleton.	-Functions of the human skeleton i) The skeleton protects delicate body organs: The skull protects the brain, the orbit protects the eyes ii) Supports the vertebral column hold the body upright. iii) Manufacture of cells: Red blood cells are manufactured in short bones while white blood cells are manufactured in short bones while white blood cells are manufactured in long bones.		-Stating the functions of the human skeleton -How the human body skeleton performs the above functions					

W K	P D	THE ME	TOPIC	SUB- TOPIC	SUBJ.COMPETE NCE	LANG. COMPETENC E	CONTENT	METHOD AND TECH	L/ACT	LIFESKI LLS AND VALUES	L.AIDS	SNE TIPS	REF	RMK
							iv) Movement: muscles pull bones hence enabling moment. V) Shape: the skeleton gives shape to the body by making the tall or short							
1	4	THE HUMAN BODY	MARSCULAR SKELETAL SYSTEM	BONES (LONG BONES)	-The learner; 1. Identifies the type of bones 2. Identifies the characteristic of types of bones 3. Draws the structure of the femur 4. Mentions the position where the type of bone are located	-The learner; Pronounces , spells, reads and writes and sentences related to bones e.g. -femur -ulnar -long bones etc.	-Types of bones; Long bones -Examples of long bones i) Femur (thigh) ii) Ulna (lower arm) iii) Humerus (upper arm) iv) Tibia (leg) v) Fibula (leg) vi) Radius (upper arm) -characteristics of long bones e.g. i) they are hollow ii) they manufacture white blood cells in the bone marrow -The structure of the femur bone	– Explanation – Brain storming – Observation – Question and answers – Guided discussion	-identifying types of bones -Giving examples of long bones -Drawing structures of long bones -Stating characteristics of long bones	-Critical thinking -Effective communication -Creative thinking -Pronunciation -Appreciation -Self awareness -Care -Acceptance	-A chart showing structures of long bones i.e. femur	-Hands on activities e.g. touching and feeling models -Proper positioning -Use of real objects -Audibility	P.7 Curriculum iculum Pg. 63 Primary integrated Science THE NEW APPROACH BK 7	
	5			FLAT BONES	-The learner; i) Mentions the examples of flat bones ii) Identify characteristics of flat bones iii)States the importance of flat bones iv)Draws the structure of flat bones	-The learner, Pounces spells, reads and writes words related to bones e.g. -scapular(shoulder bone) -Skull	-Examples of flat bones i) scapular (shoulder bone) i) Skull ii) Jaw bone -Identifying characteristics of flat bone e.g. I) they are flat shaped -importance of flat bones; i) The Skull protects the brain. ii) The structure of flat bones		Mentioning the examples of flat bones -identifying characteristics of flat bones -Stating the importance s of flat bones -Drawing the structure of flat bones		-A chart showing structures of flat bones i.e. ; -skull bones -Jaw bone

8	3	MATTER AND ENERGY	ELECTRICITY AND MAGNETISM		The learner; identifies the method of making temporary magnets Illustrates how a temporary magnet is made by induction Identifies ways of determining poles Ways of developing a strong induced magnets How to make a magnet using the electrical method How to determine poles Ways of developing strong magnet	The learner spells, reads and writes words and sentences related to making temporary magnets	Methods of making temporary magnet An illustration showing a temporary magnet made by induction Ways of determining poles Ways of developing a strong induced magnet How to make a magnet using the electrical method how to determine poles Development of a strong magnet	Explanation Brain storming Guided discussion Demonstration Question and answer	Identifying the method of making temporary magnets illustrating how a temporary magnet is made by induction Identifying ways of determining poles Stating ways of developing a strong induced magnet Making a magnet using a an electrical method Ways of developing a strong magnet	Observation Critical thinking Creativity Effective communication Responsibility	Textbooks Chalkboard	Proper positioning Audibility Giving the learner extra time	P.7 curriculum Pg. 63 NEW FOUNTAIN P.7 SCIENCE Pg. 60-62 THE NEW APPROACH PUPILS BK Pg. 43-44	
8	4	MATTER AND ENERGY	ELECTRICITY AND MAGNETISM	AN ELECTRIC BELL	The learner; describes the structure of an electric bell states States parts of an electric an electric bell and its Describes how an electric bell works	The learner spells reads and writes words and sentences related to an electric bell	Describing the structure of an electric bell Parts of an electric bell and its uses How an electric bell works	Explanation Guided discussion Question and answer Brain storming	Describing the structure of an electric bell Stating parts of an electric bell and its uses Describing how an electric bell works	Observation Creativity Critical thinking Fluency Effective communication	Text books A drawing on a chart showing an electric bell Real object(bell)	Proper positioning Audibility Giving extra time to learners	P.7 curriculum pg. 63 THE NEW APPROACH SCIENCE BK 7 Pg. 45-46 NEW FOUNTAIN SCI BK 7 Pg. 65	
	5			DEMAGNETISATION	The learner identifies the meaning of demagnetization States ways of demagnetization States ways of protecting magnets from losing magnetism	The learner spells reads and Writes words and sentences related to demagnetization	The meaning of demagnetization Ways of demagnetizing magnets Ways of protecting magnets from losing magnetism		The meaning of meaning demagnetisation Stating ways of demagnetisation Stating ways of protecting magnets From losing magnetism		Textbooks Chalkboard		P.7 curriculum pg. 63 THE APPROACH SCIENCE BK 7 pg. 46 THE NEW FOUNTAIN SCI BK7 pg67
