The diagram below shows a tool used in a cattle farm. Study and use it to answer questions 16 and 17.

16. Name the farm tool above.

17. Give any **one** reason the farm tool above is suitable for spraying.

18. State any **one** way rat guards help to prevent damage of stored crops by rats.

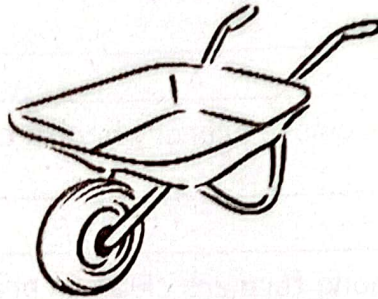

19. Name any **one** poultry vice controlled in battery system.

20. Mention any **one** good quality of a good stake for supporting tomato plants.

21. State any **one** use of essential drugs to humans.

22. Give any **one** way wind can be used as an energy resource.

The diagram below shows a simple machine. Study and use it to answer questions 23 and 24.

23. Name the group of machine shown above

24. Use an arrow with letter P to show the position of the Load on the machine above.

25. State any **one** way a child health card enables parents to monitor the growth of a child.

26. Mention any **one** example of a non-flowering plant that reproduces by spores.

27. Give the reason for using splints on fractures.

28. State the cause of marasmus in humans.

29. Name the suitable garden tool for breaking rocky ground when digging holes of poles for fencing.

30. State any **one** way condensation process is important in our daily life.

31. Mention the reason breast milk is best food for babies.

The diagram below shows a type of blood vessel in the human body. Study and use it to answer question 32 and 33.

32. Name the type of blood vessel above.

33. Give the reason that makes the blood vessel above to have thin walls.

34. Give any **one** practice that can help prevent demagnetization.

35. State any **one** way selecting a suitable place for an apiary is important in the rearing of bees.

36. Mention any **one** way putting soft boards on ceilings prevent echoes in music studios.

37. Give any **one** health practice you can do to prevent ringworm infection.

38. Name the type of change that occurs during flowering of plants.

39. Mention any **one** primary sex characteristic in boys.

40. Apart from presence of oxygen, name any **one** condition for a seed to develop in soil.

SECTION B:

41. (a) Mention any **one** characteristic of latrines that prevent air pollution.

(b) Give any **one** reason for putting water tanks near latrines.

(c) State any **two** practices that can be done in a ventilated pit latrine to control house flies.

(i) _____

(ii) _____

42. (a) Name the part of the respiratory system that allows passage of air from the nose into the lungs.

(b) Give any **one** reason that makes the lungs reduce in size during breathing out.

(c) Mention any **two** ways regular physical body exercises are important to the respiratory system.

(i) _____

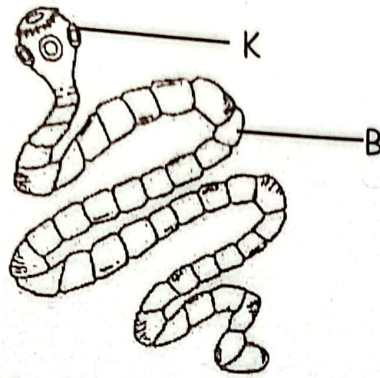

(ii) _____

43 (a) Name the component of blood destroyed by HIV germ.

(b) Mention any **one** practice you need to avoid contracting HIV germ.

(c) Explain the reason HIV/AIDS victims suffer from many diseases. (2marks)

44. The diagram below shows a group of worm that lives in the human body. Study any use it to answer questions that follow.

a) Name the group of worm above.

b) State the function of structures marked **K** and **B** to the worm above.

i) **K** _____

ii) **B** _____

c) Give any **one** way the worm above can be controlled by humans.

45. The table below shows farm practices carried out in a sheep farm. Match the practices in A to the reasons for carrying them in B.

A	B
Castration	Controls indo parasites
Shearing	Controls inbreeding
Docking	Regulates temperature of sheep
Deworming	Controls fly strikes

(i).Castration. _____

(ii).Shearing. _____

(iii).Docking. _____

(iv).Deworming. _____

46.(a) Give the meaning of heat as a form of energy

(b) Name the method of heat transfer that occurs in all the states of matter.

(c) Mention any **two** ways heat transfer by radiation is important in the environment.

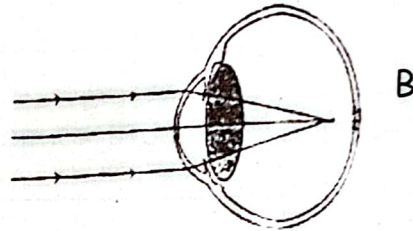

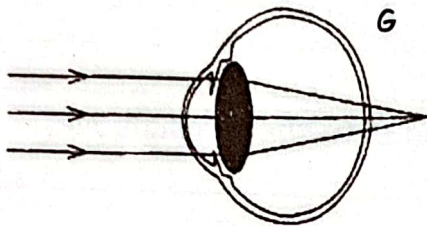

(i) _____

(ii) _____

47. Describe the way rain is formed in the water cycle.

(4marks)

48. The diagrams below show human eye defects. Study and use them to answer questions that follow.

b) Identify the human eye defect marked G.

b) Mention any one cause of the eye defect marked B.

c) Give the reason for using a convex lens to correct the eye defect marked G.

d) State the way eye defect marked B affects a person.

49 (a) Give the reason that makes some objects sink in water.

(b) Mention any **two** instruments used to measure mass.

(i) _____

(ii) _____

(c) State any **one** way mass can determine the weight of an object.

50 (a). Identify the excretory role of the following body organs;

(i) liver. _____

(ii) skin. _____

(b) Give a reason why wet lands are referred to as the natural kidney of the earth.

(c). State any **one** practice done by people that affect the human skin.

51. (a) Name any **one** class of food.

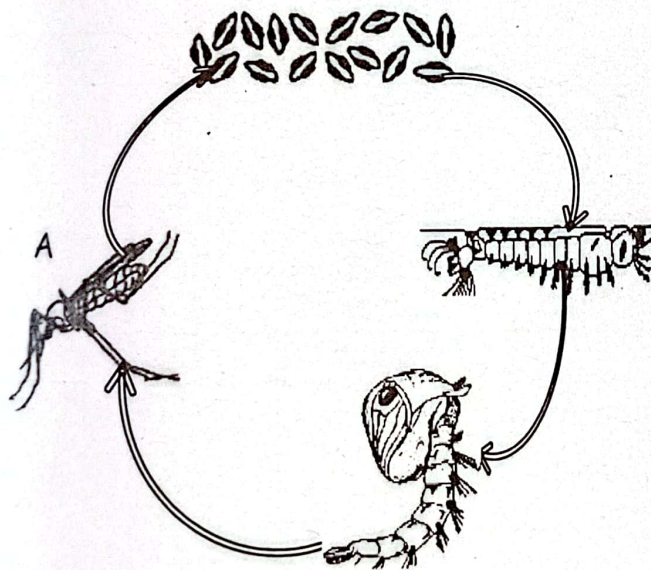

(b) Give any **one** reasons for eating food.

(c) Mention any **two** ways a health prefect can promote food hygiene at school.

(i) _____

(ii) _____

52. The diagram below shows a life cycle of a vector that spreads malaria. Study and use it to answer questions that follow.

a) Name the germ spread by the vector above during stage A.

b) Identify the type of life cycle shown above.

c) Give the reason for your answer in (b) above.

d) Mention any **one** factor that can make the vector above to spread malaria to a person even when in a treated mosquito net.

53 (a) Mention any **one** source of electricity.

(b) State any **one** way insulators can be used to prevent short circuits in a house.

(c) Give any **two** uses of electricity in our daily life.

(i)

(ii)

54. (a) Name any **one** method of brushing teeth.

(b) State any **two** ways the use of toothpaste is important when brushing the teeth.

(i)

(ii)

c) Mention any **one** practice that can lead to teeth discoloration.

55. (a) Mention any **two** ways pulleys can be used at school.

(i)

(ii)

(b) A boy used a force of **125N** to push a stone of **250N** using a crowbar, Calculate the mechanical advantage of the machine. (2marks)
