

DIVINE EDUCATION CENTRE
PRE-REGISTRATION EXAMINATION
2026

INTEGRATED SCIENCE SET 3

Time allowed: 2 hours 15 minutes

Random No.						Personal No.		

Candidate's Name:

Candidate's Signature:

District ID No.

--	--	--	--

Read the following instructions carefully:

1. Do not write your **school** or **district name** anywhere on this paper.
2. This paper has two sections **A** and **B**. Section **A** has **40 questions** and **section B** has **15 questions**. This paper has **12 pages** printed altogether.
3. Answer **all** questions. All the working for both sections **A** and **B** must be shown in the spaces provided.
4. **All** working must be done using a **blue** or **black** ball point pen or ink. Any work done in pencil will **NOT** be marked except drawings and diagram.
5. Unnecessary **changes** in your work and handwriting that cannot be easily read may lead to loss of marks.
6. Do not fill anything in the table indicated **"For examiners' use only"** and the boxes inside the question paper.

SECTION A: 40 MARKS

Questions **1** to **40** carry one mark each.

1. Give any one material that forage bees collect from the environment.

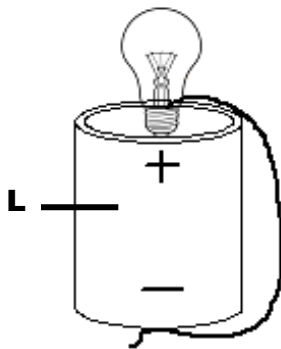

2. Mention any one energy change that takes place in a working electric bell.

3. State any one factor which a health worker should consider when prescribing drugs.

4. Identify any one adaptation of some flowers to be pollinated by moths at night.

5. State any one life skill that can enable a P.7 pupil to self-guard against drug abuse.

Study the diagram below carefully and use it to answer questions that follow.

6. Use an arrow to show the direction of flow of electrons present in the above diagram.

7. Mention the energy change that takes place in part marked L when the circuit is complete.

8. Give any one example of a limbless reptile.

9. Mention any one role of a first aider.

10.State the way in which slashing of bushes around home helps to control diseases.

11.Name the part of the maize grain that has the same function as a granary.

12.Give any one way of generating electricity at home.

13.Identify any one example of skeletal muscles.

14.State any one material used for making farmyard manure.

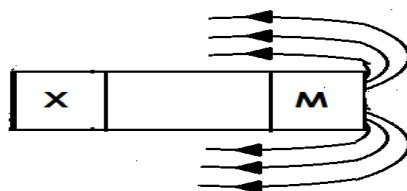

15.Mention any one way wind is used as a resource.

16.Identify any one part in the human body where short bones are found.

17.State any one way in which a P.7 pupil can care for his/her reproductive organs.

18.Mention the stage of growth in a maize plant where it can develop prop roots.

Study the diagram below carefully and use it to answer Question 19 and 20.

19.State the property of magnets shown in the above diagram.

20. Identify the pole of the magnet labeled with letter M.

21. Mention the best time for harvesting honey.

22. Give the way in which the skeletal system benefits the circulatory system.

23. Name any one dicotyledonous seed that undergoes hypogeal germination.

24. State any one way in which a P.7 pupil can prevent the outbreak of diarrheal diseases at school.

25. Give the reason why wet wood is able to conduct electricity.

26. Mention the state of matter in which heat travels fastest.

27. State the best way of conserving heat energy at home while cooking.

28. Identify the disorder of the human digestive system which is prevented by eating the right amount of food, eating less spicy food, or eating less oily food.

29. Mention the way in which muscles cause body movement.

30. Apart from cannibalism, egg eating, and egg hiding, name any one other poultry vice.

31.State any one way in which a P.7 pupil in a boarding section can prevent the spread of ringworm.

32.Give any one way of controlling soil erosion at the school compound.

33.State any one adaptation of some flowers to undergo cross-pollination.

34.Give any one danger of silting to a water source.

35.Mention the non-communicable disease that attacks people's eyes.

36.Identify any one way of caring for the human skeletal and muscular system.

37.Give the reason why you would discourage crop farmers from using wet mulches to mulch their gardens.

38.State the reason why the lower part of a bird's beak is left without cutting it during debeaking.

39.Mention any one way in which afforestation can improve electricity distribution to different parts of Uganda.

40.Name the food value obtained after eating honey.

SECTION B (60 MARKS)

41.(a) Give the reason why the earth is regarded as a magnet.

(b) You are provided with the following materials. Study them carefully and use them to answer the question below: cobalt, iron, steel, copper, and rubber.

Identify three examples of magnetic materials from the above list.

(i) _____

(ii) _____

(iii) _____

42. Below are the stages or processes involved in seed germination.

Arrange them in their correct order.

(i) The plumule appears

(ii) The seed absorbs water

(iii) The radicle emerges

(iv) The seed swells and breaks the testa

(i) _____

(ii) _____

(iii) _____

(iv) _____

43. (a) Give any one way in which wind energy is used as an energy resource.

(b) State any one example of an energy resource.

(c) Mention any two ways in which people use animal energy.

(i) _____

(ii) _____

44. (a) Identify any two examples of bones that form movable joints.

(i) _____

(ii) _____

(b) Give an example of a movable joint that has the same movement as door hinges.

(c) State any one good health practice that promotes the good working of the skeletal system.

45. (a) Mention any one sign of dehydration in people.

(b) Give any one effect of dehydration on an individual.

(c) Name the two mineral salts lost during dehydration.

(i) _____

(ii) _____

46. (a) State any one difference between mass and weight.

(b) Identify any two factors that determine the weight of an object.

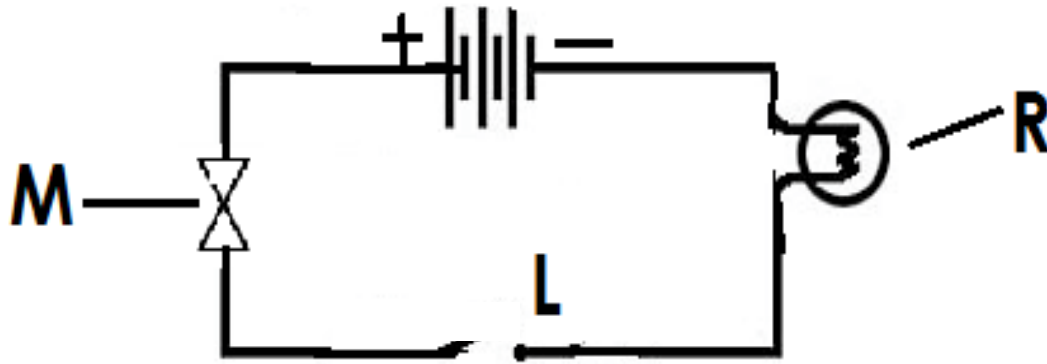

(i) _____

(ii) _____

(c) Give the reason why a ship is able to float in water yet it is made of metals.

47. Study the diagram below and use it to answer question that follow.

(a) Name the parts of the electric circuit above labelled with letters.

(i) L: _____ (ii) M: _____

(b) Use an arrow to show the direction of flow of electric current in the above circuit.

(c) Mention any one energy change that takes place in the part labeled R.

48. (a) State the way in which the following materials produce sound:

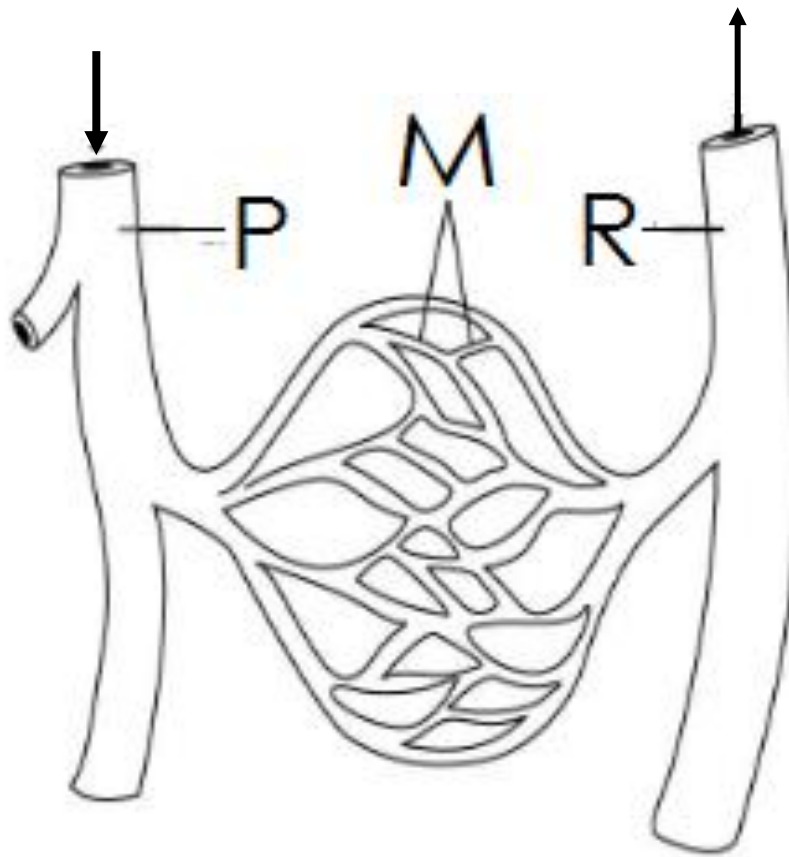

(i) whistle: _____

(ii) bow harp: _____

(iii) thumb piano: _____

(b) Give any one factor that determines the pitch of sound.

49. The diagram below is of a certain type of blood vessel. Study it carefully and use it to answer questions.

(a) Name the type of blood vessels labelled:

(a) P: _____

(b) R: _____

(b) Mention the important process that takes place in the part labeled M.

(c) State any one structural difference between blood vessel labeled P and R in the above diagram

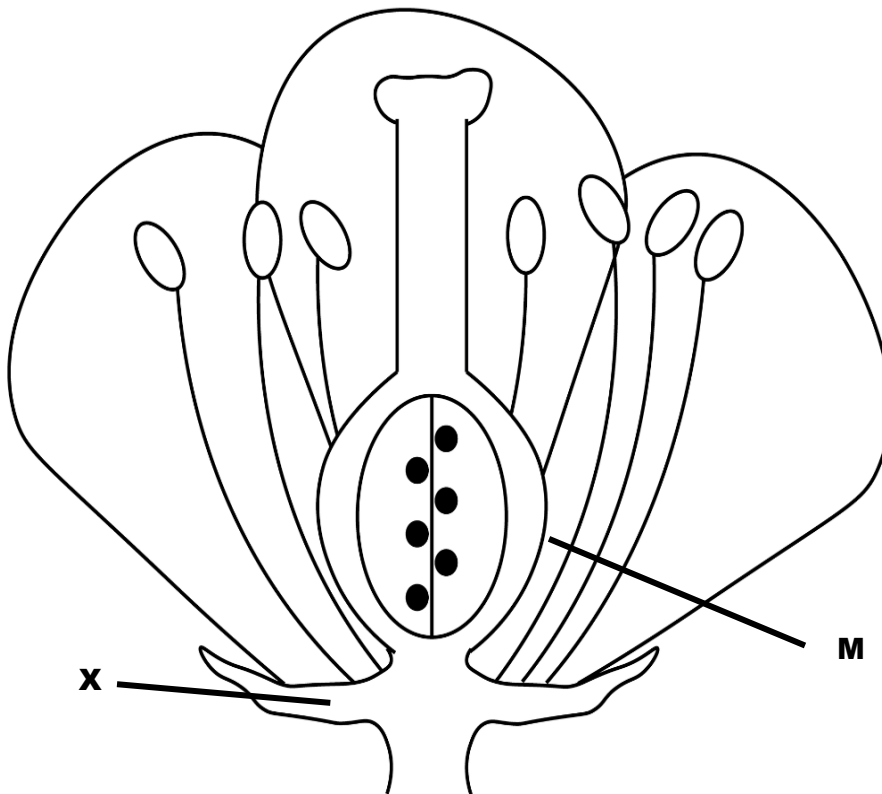

50. (a) Give any one way of caring for your teeth.

(b) Identify any one component of the pulp cavity.

(c) Mention the way in which eating of more sweets can lead to tooth decay.

(d) State the best way of brushing teeth.

51. Study the diagram below carefully and use it to answer questions that follow.

(a) State what happens to the following parts of the flower after fertilization:

(i) X: _____

(ii) M: _____

(b) Mention the type of pollination that the above flower can undergo.

(c) Give a reason to support your answer in question 51(b) above.

52. (a) Identify any one example of a childhood immunisable disease that attacks the skeletal system.

(b) Name the movable joint found at the neck verbra

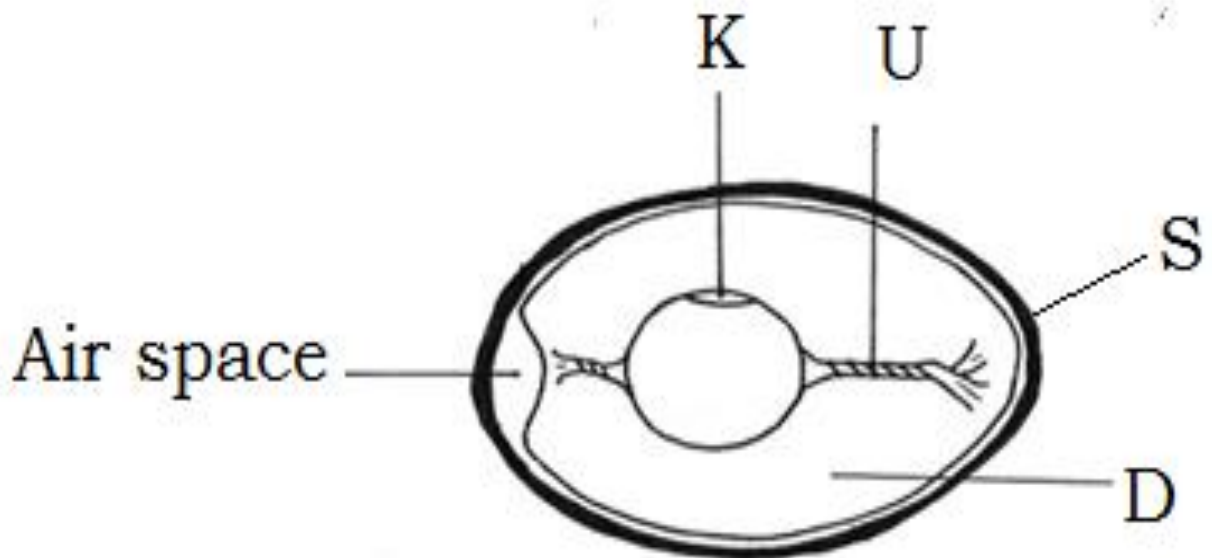

(c) State any two disorders of the skeletal and muscular system.

(i) _____

(ii) _____

53. The diagram below is of a fertilized egg. Study it carefully and use it to answer questions that follow.

(a) Name the parts of an egg above labeled with:

K: _____ D: _____

U: _____

(b) Give the way in which part labeled S is adapted for gaseous exchange.

54. (a) Give any two examples of primary sex characteristics.

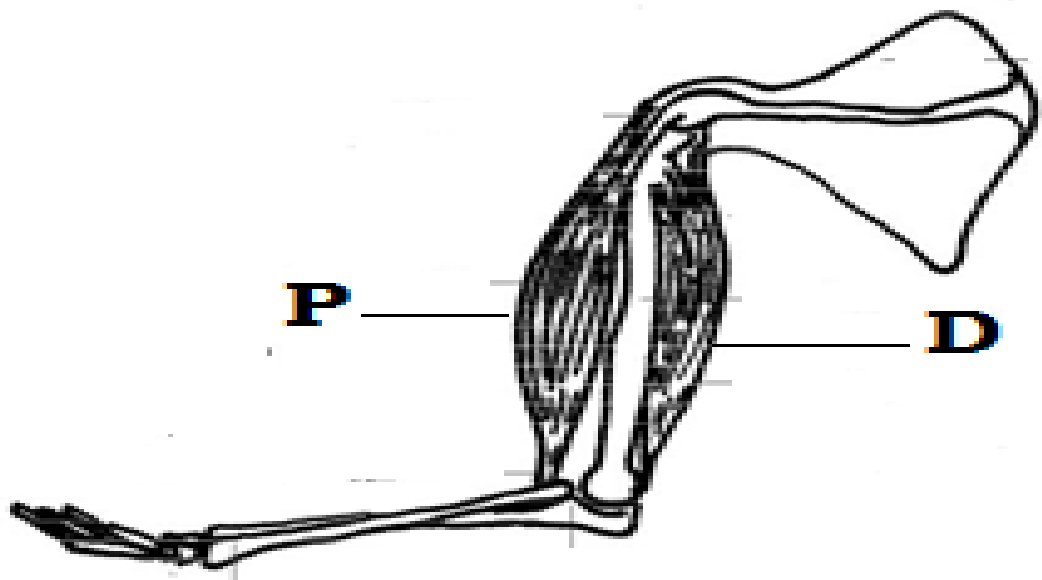

(i) _____

(ii) _____

(b) Mention any one problem adolescents face.

(c) Identify any one way of managing body changes during adolescence.

55. Study the diagram below carefully and use it to answer questions that follow.

(a) Name the skeletal muscles labeled D and P in the above diagram.

D: _____

P: _____

(b) State what happens to muscle labeled D when the arm is straightened.

(c) Give the reason why muscle D and P are regarded as antagonistic muscles.

END
