MATHEMATICS

Final Mark Scored	
-------------------------	--

Time Allowed: 2 hours 30 minutes

Index No.	Random No.						Personal No.		

Candidate's Name:

Candidate's Signature:

District ID:

--	--	--	--

Read the following instructions carefully:

1. Do not write your **school** and **district name** anywhere on this paper.
2. This paper has two sections: **A** and **B**.
Section **A** has **20** questions and Section **B** has **12** questions. The paper has **15 printed pages** altogether
3. Answer **all** questions. **All** the working for both sections **A** and **B** must be shown in the spaces provided.
4. **All** working must be done using a **blue** or **black** ball point pen or ink. Any work done in pencil other than graphs and diagrams will **not** be marked.
5. **No calculators** are allowed in the examination room.
6. Unnecessary **changes** in your work and handwriting that cannot easily be read may lead to loss of marks.
7. Do not fill anything in the table indicated: **"For Examiners' Use only"** and boxes inside the question paper.

FOR EXAMINERS' USE ONLY		
Qn.No.	MARKS	EXR'S NO.
1 - 5		
6 - 10		
11 - 15		
16 - 20		
21 - 22		
23 - 24

TOTAL		

SECTION A: 40 MARKS

Answer **all** questions in this Section
Questions **1** to **20** carry two marks each

1. Write $\frac{13}{4}$ as a mixed number.
2. Add: $4.5 + 0.3 + 2.4$
3. What number is expanded to give: $(2 \times 10^3) + 600 + (4 \times 10^0)$.
4. Given that set $C = \{t, m, n, v\}$ and set $D = \{t, o, p\}$, find $n(C \cup D)$.

5. The weight of a sugar bowl containing sugar is $2\frac{1}{3}$ kg. If the quantity of sugar alone in the bowl is $1\frac{1}{4}$ kg, determine the weight of the sugar bowl when empty.

6. Use a pair of compasses and a ruler only to construct an angle 75° at point O in the line below.

7. Simplify: $3(2 - x) + 4x$

8. A class has 12 girls and 9 boys. Work out the least number of books that can be shared among the class and leaves a remainder of two books.

9. An iron bar of length 5 metres is rested against a wall which is 3 metres high as shown below.

Calculate the horizontal distance from the foot of the wall to the foot of the iron bar.

10. Find the scientific notation form of 452.

11. Workout $(53 \times 0.5) + (47 \times 0.5)$ using the distributive property.

12. A stationary shop attendant bought a dozen of exercise books at sh.6,000. After, he sold each book for sh.450. Determine whether he made a loss or profit after selling all the books.

13. The cost of buying a Samsung phone and a Tecno phone respectively are in the ratio 5:3. If sh.960,000 is enough to buy both phones, determine the cost of a Tecno phone.

14. In the diagram below, find the value of a .

15. Write **DCLV** in Hindu-Arabic numeral system.

16. Workout:
$$\frac{0.24 \times 0.9}{0.18}$$

17. The table below shows the uniform time intervals at which four buses **A**, **B**, **C** and **D** arrive at a bus park.

Bus	A	B	C	D
Time	6:10am	7:40am	8:10am	-----

Find the exact time at which bus **D** arrives at the bus park.

18. On a certain wedding ceremony that lasted two days, 1244 litres of water were used on the first day while 1126 litres were used on the second day. Find how much more water was used on the first than on the second day.

19. Workout: $^{-}6 - ^{-}10$

20. Namara deposited her money totaling to sh.800,000 on a fixed deposit account for five months. The bank offers an interest rate of 12% per year. Calculate the interest Namara's money will generate in the five months.

SECTION B: 60 MARKS

Answer all questions in this section

Marks for each question are indicated in brackets.

21. A pupil scored the following marks: 50, 60, 83, $2t$ and 60 in consecutive mathematics tests. If the pupil's average score is 65, find the value of t .
(04 Marks)
22. Jalia wrote three-digit numbers using the digits 1, 4 and 6.
- (a) Write down all the possible 3-digit numbers greater than 400 that Jalia wrote.
(02 Marks)
- (b) State the probability of Jalia writing a number which is completely divisible by two.
(02 Marks)

23. A school headteacher organised a staff meeting in which teachers were served with either tea (T) or soda (S). 13 teachers were served with tea, 4 teachers were served both drinks, k teachers were served with soda but not tea, while 2 teachers neither took tea nor soda. The meeting was attended by 30 teachers altogether.

(a) Represent the given information on a Venn diagram. (04 Marks)

(b) Calculate the number of teachers who were served with soda. (02 Marks)

24. Given that $3b^2 - 6 \leq 42$, solve for b and hence write the solution set for which **b** is a whole number. (04 Marks)

25. The exchange rates for the British Pound Sterling (£) and United States dollars (\$) to Uganda shillings are as follows:

$$1£ = \text{Ug sh.}4,400$$

$$\text{US\$}1 = \text{Ug sh.}3,600$$

- (a) How many United States dollars can you get from £5400? (04 Marks)

- (b) The cost of a pair of shoes is 25 United States dollars, how much is this in Uganda shillings? (02 Marks)

26. (a) Convert 54 km/h to metres per second. (03 Marks)

- (b) Okello rode his bicycle from home to school a distance of 120 km at an average speed of 25 km/h. If he reached school at 9:15 a.m., At what time did he leave home? (03 Marks)

27. (a) Using a pair of compasses and a ruler only, construct a triangle JKL where length JK = 6.5 cm, angle JKL = 60° , and length KL = 5 cm. (04 Marks)

- (b) Drop a perpendicular from point L of the triangle to meet length JK at a point E. (01 Mark)

28. The figure **M** shows a cylindrical bucket of diameter 28cm and height 100cm while figure **N** shows a jug which can hold 2.2 litres of water when completely full.

- (a) Calculate the amount of water in litres the bucket **M** can hold.
(Use $\pi = \frac{22}{7}$) (03 Marks)

- (b) How many jugs **N** can be enough to fill the bucket **M**? (02 Marks)

29. (a) Take away 101_{two} from 1011_{two} .

(02 Marks)

(b) Given that $32_r = 122_{\text{three}}$, find the value of the unknown base marked r .

(03 Marks)

30. At the beginning of the term, a school gave out uniforms to pupils as follows; Boys were given 3 shirts each, girls were given 2 dresses each. If 180 shirts and 168 dresses were given out, calculate how many more girls than boys are in the school.

(04 Marks)

31. In the diagram below, line AC is parallel to DE. Angle CDE = 50° , $\angle BDC = x + 9^\circ$ and $\angle DBC = 2x + 40^\circ$. Use the diagram carefully and answer the questions that follow.

- (a) Calculate the value of x .

(03 Marks)

- (b) Find the size of the angle marked ABD.

(02 Marks)

32. The pie chart below shows a family's weekly budget. Study it carefully and answer the questions that follow.

- (a) Given that the family spends sh.22,500 on paying bills per week, calculate the family's weekly total expenditure. (04 Marks)

- (b) Express the expenditure on food as a ratio of the total expenditure. (02 Marks)
