SECTION B: 60 MARKS

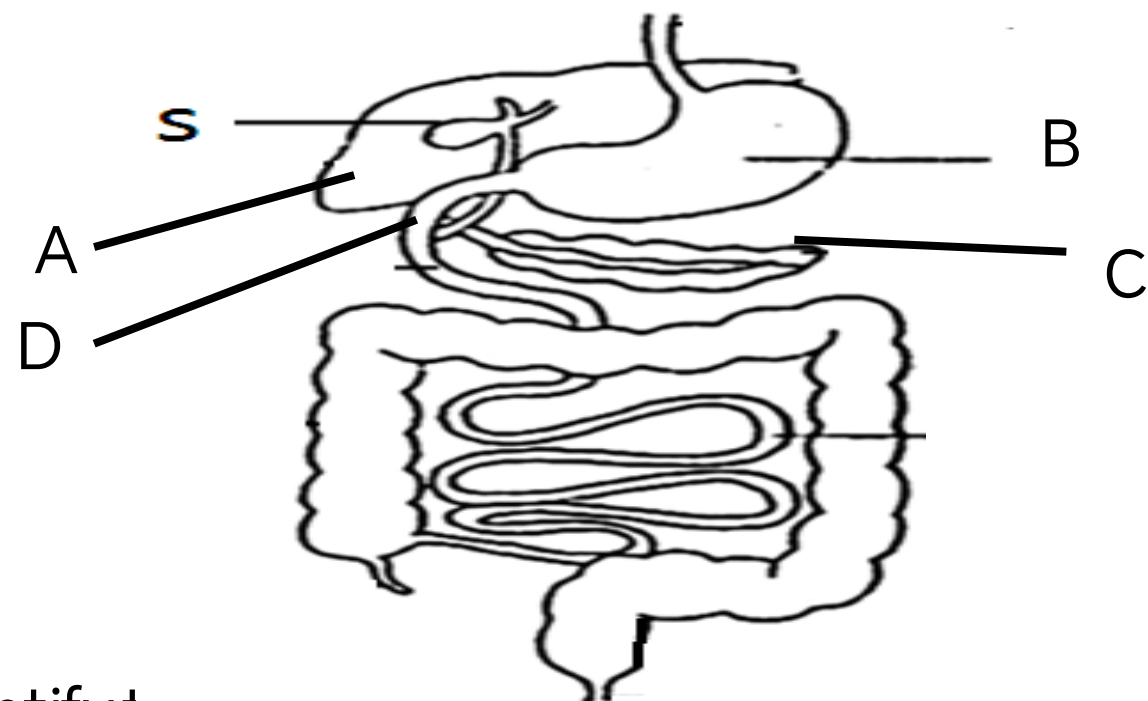

41. a) What is pollination?

b) Name two types of pollination.

i) _____ ii) _____

c) Suggest one characteristic of insect pollinated flower.

42. The diagram shows the alimentary canal. Use it to answer the questions that follow.

a) Identify the organs labeled.

A _____ B _____

b) Name any one disease that affects the above system.

c) State any one way of maintaining the proper working of the above body system.

43. a) What is dehydration?

b) State two signs of dehydration in infants.

i) _____

ii) _____

c) How can dehydration be controlled in children.

44. Match the types of tropisms with their corresponding stimuli.

A

B

Phototropism

water

Hydrotropism

light

Thigmotropism

gravity

Geotropism

touch

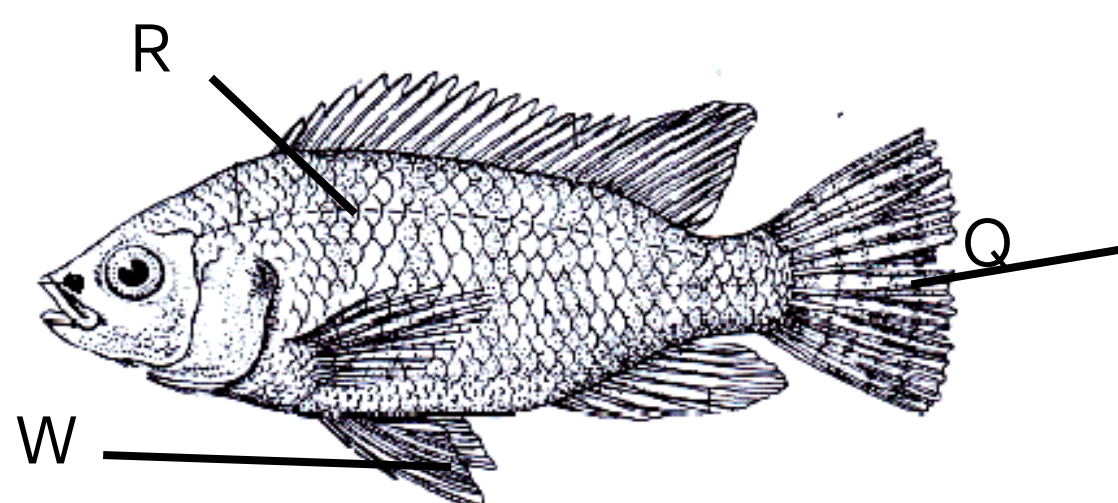

i) Phototropism _____

ii) Hydrotropism _____

iii) Thigmotropism _____

iv) Geotropism _____

45. The diagram below is of a fish. Use it to answer the questions that follow.

a) Name part marked Q.

b) How is part marked R important to the fish?

c) Name the commonest food value a person can get if he eats fish.

d) How are gills useful to a fish?

46. a) Define the term immunity.

b) Name two types of immunity.

i) _____

ii) _____

c) How are vaccines useful in the body?

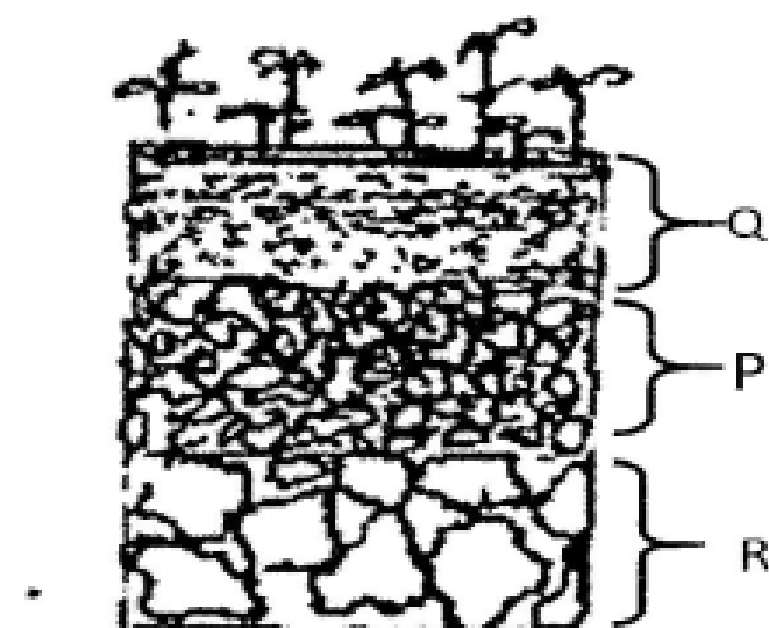

47. a) By merely looking at a plant growing, what makes one believe that a plant is a monocot?

b) Identify an example of a plant described above.

c) What class of food are such plants rich in?

d) How is the plant in (b) above different from a bean plant?

48. The diagram is of soil profile. Use it to answer questions.

a) What is soil profile?

b) Name the layers of soil marked;

P _____ R _____

c) What makes soil layer Q better than soil layer R in supporting plant growth?

49. a) What type of change is rusting of metals?

b) Give two examples of biological changes that take place in the environment.

i) _____

ii) _____

c) Suggest any one way of controlling drought in an area.
