SECTION A: 40 MARKS

(Questions **1** - **40** carry **1** mark each)

1. Name the disease transmitted by the female Anopheles mosquito.

.....

2. Which form of energy changes ice to water?

.....

3. Give any **one** way of keeping drugs away from children.

.....

4. Name the poisonous substance injected by snakes into the enemies.

.....

5. Write down any **one** example of a plant fibre.

.....

The diagram below is of crop growing activity. Use it to answer question 6 and 7.

6. Name the most suitable season for carrying out the activity above.

.....

7. Why is the season named above the best for carrying out the activity?

.....

8. State **one** type of accident where first aid involves putting the affected part of the body in cold water.

.....

9. Give **one** way in which the umbilical cord is important to the developing foetus in the uterus.

.....

10. Why should children be given food which is rich in proteins?

.....

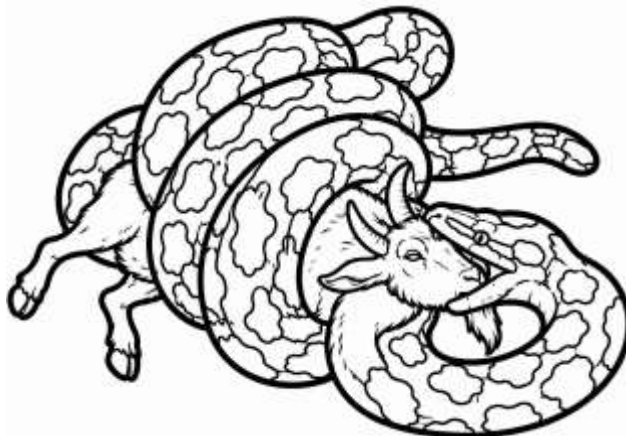

11. State **one** way in which plants depend on animals.

.....

12. Name any **one** characteristic of seeds which are dispersed by wind.

.....

The diagram below shows a type of a snake. Use it to answer questions 13 and 14.

13. Mention the type of snake illustrated above.

.....

14. State **one** way the above stated type of snake is able to kill its prey.

.....

15. What is the function of gills (lamellae) in a mushroom?

.....

16. Give **one** way in which P7 pupils can promote immunization in their families.

.....

17. State **one** condition that may make a person vulnerable to disease.

.....

18. In which way is a fuse similar to a switch in a simple electric circuit?

.....

19. Why should a nurse shake the clinical thermometer before it is used on another patient?

.....

.....

20. State **one** negative effect of using chemicals to control crop pests.

.....

21. Which type of cattle has a wedge-shaped body?

.....

22. How do conifers differ from other non-flowering plants?

.....

23. What type of skeleton does a cockroach have?

.....

24. How is fertilization in amphibians different from that in birds?

.....

25. Apart from getting food, give any one other way in which birds benefit from plants.

.....

29. A Primary Seven pupil observed that sound cannot be heard in outer space. Explain why sound cannot travel in space.

.....

The diagram below is of a **Stevenson screen**. Study and use it to answer the questions **30** and **31**.

30. Name any **one** weather instrument which is kept in the box above.

.....

31. Why is part marked **Y** made out of louvres?

.....

32. Give **one** reason why spraying crops in the garden during midday is hazardous to the farmer.

.....

33. State any **one** example of a crop which is a legume.

.....

34. Give any **one** way in which the human kidneys can be kept in proper working condition.

.....

35. State any **one** way in which termites depend on soil.

.....

36. State the type of growth change that takes place when a baby grows to an adult.

.....

The diagram below is a garden tool. Use it to answer question 37 and 38.

37. Name the garden tool shown above.

.....

38. State any **one** way of preventing the garden tool above from rusting.

.....

39. A man lives with two sons, cousins and a nephew living together. What type of family is this?

.....

40. Name any by-product of respiration.

.....

SECTION B: 60 MARKS

(Questions 41 to 55 carry 4 marks each)

41. (a) Give **one** way in which primary health care (PHC) is important to a community.

.....

(b) State the elements of primary health care which is promoted by each of the following activities:

(i) Sweeping the kitchen.

.....

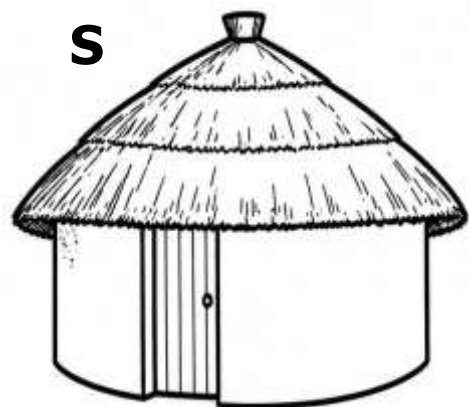

(ii) Putting drops of polio vaccine into the mouth of a child.

.....

(iii) Eating a balanced diet.

.....

42. Study the diagrams below carefully and use them to answer the questions that follow.

(a) Name any **one** local material used for making house labelled **R**

(b) Give the reason why house **S** is cooler than house R during dry season.

.....
(c) How can air circulation in house **S** be improved?

.....
(d) Give any **one** factor to consider when siting a house.

.....
43. **The diagram below shows a man burning charcoal.** Use it to answer the questions that follow.

(a) Why is the wood covered with soil during charcoal burning?

.....
(b) Why are tiny outlets left when covering the charcoal with soil?

.....
(c) Give any **one** quality of a plant suitable for burning the charcoal.

.....
(d) Apart from fuel, state any **one** other condition necessary for burning to take place.

.....
44. (a) State **two** differences between birds and mammals.

(i)

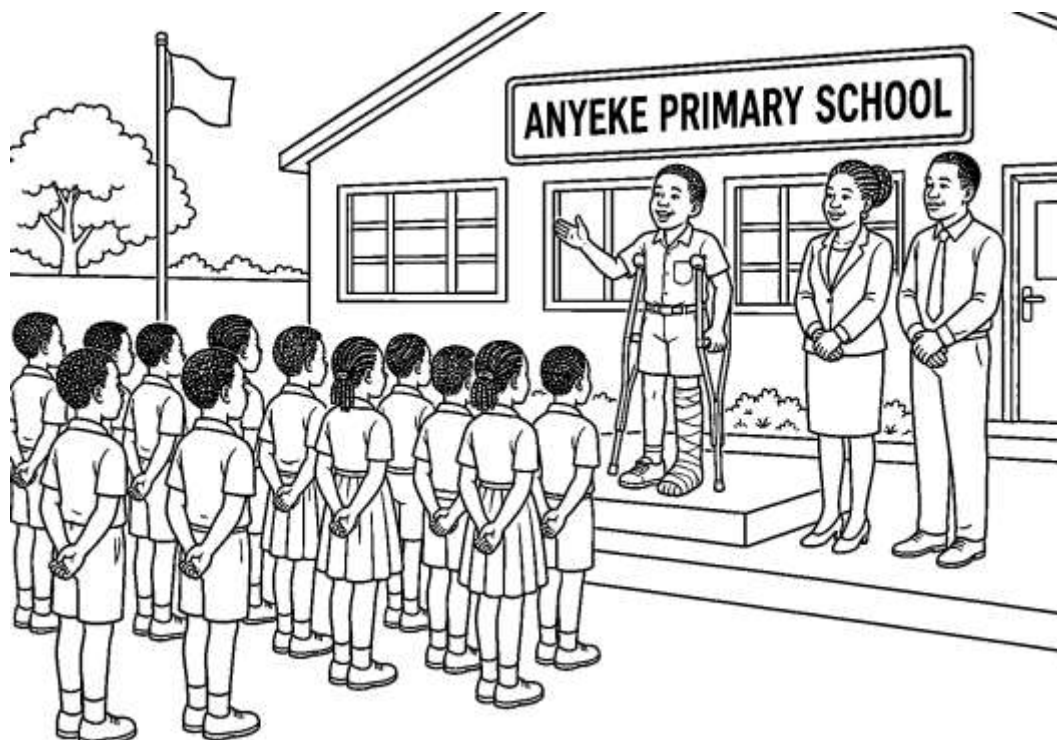

(ii)

(b) Give **two** similarities between birds and mammals.

(i)

(ii)

45. **Study the diagram below and use it to answer the questions that follow.**

(a) Which science-related activity is taking place in the diagram above?

.....

(b) Mention any **two** importance of holding such parades at school.

(i)

(ii)

(c) State **one** group of people who conduct the parade shown above.

.....

46. (a) Which part of the body is affected by each of the following diseases?

(i) Scabies

(ii) Trachoma:

(b) State the carriers which spread each of the following diseases.

(i) Bilharzia:

(ii) Malaria:

47. (a) Name any **two** products got from sheep.

(i)

(ii)

(b) What does shearing refer to in sheep rearing?

.....

.....

(c) How can a farmer control pneumonia in sheep?

.....

48. (a) Mention **two** primary sex changes that happen in boys.

(i)

(ii)

(b) Give **two** secondary sex changes which happen in both boys and girls.

(i)

(ii)

49. (a) Apart from millets, wheat and sorghum, give any one other cereal food crop.

.....

(b) Mention any **one** common pest that destroys cereal crops

.....

(c) Give any **two** reasons why cereal crops are dried before storing

(i)

(ii)

50. (a) Which force causes a pencil to wear out during writing?

.....

(b) Name any **one** form of energy produced by the force in (a) above as one writes.

.....
(c) Give any **two** disadvantages of the energy you have named above to the writer.

(i)

(ii)

51. (a) What form of energy does a ball have before it is kicked?

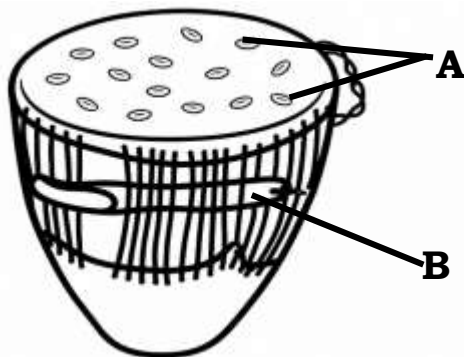

.....
(b) What energy change takes place immediately a ball is kicked?

.....
(c) Give **two** forms of energy produced by the ball as the goal keeper catches it.

(i)

(ii)

52. The diagram below is of a drum with stick put on a side and seeds on top. Use it to answer the questions that follow.

(a) What is the importance of the stick marked **B** to the drum?

.....
(b) What will happen to the bean seeds **A** when the drum is beaten?

(c) State any **two** ways of keeping the drums for a long time.

(i)

(ii)

53. (a) Apart from a worker bee, mention two other types of bees found in a bee hive.

(i)

(ii)

(b) Write down **two** materials collected by worker bees from the environment.

(i)

(ii)

54. (a) Give any **two** reasons why it is important to wash hands before eating food.

(i)

(ii)

(b) Apart from washing, mention any **two** other activities one can do to maintain personal hygiene.

(i)

(ii)

55. (a) Name **two** natural resources in the environment that enable green plants to make their food.

(i)

(ii)

(b) What is the name of the process in (a) above?

.....

(c) Which gas is given off during this process?

.....
