READ THE FOLLOWING INSTRUCTIONS CAREFULLY

This paper has two sections: A and B.

Section A has 40 questions (40 Marks) and Section B has 15 questions. (60 Marks)

2. Answer **ALL** questions. All answers in both Sections A and B must be written in the spaces provided.
3. All answers **must** be written using blue or black ball point pen or ink. Any work written in pencil will not be marked.
4. Unnecessary **changes** in your work and handwriting that cannot be read easily may lead to loss of marks.
5. Do not fill anything in the table indicated "FOR EXAMINERS' USE ONLY".

FOR EXAMINERS' USE ONLY

QUESTION NUMBER	MARKS ATTAINED	INITIALS
1 - 10		
11 - 20		
21 - 30		
31 - 40		
41 - 43		
44 - 46		
47 - 49		
50 - 52		
53 - 55		
TOTAL		

TERM II TOPICS AND SUBTOPICS

- THEME : THE WORLD OF LIVING THINGS
- TOPIC 5 : CLASSIFICATION OF PLANT
- THEME : SCIENCE IN HUMAN ACTIVITIES AND OCCUPATIONS
- TOPIC 6 : KEEPING CATTLE
- THEME : THE ENVIRONMENT
- TOPIC 7 : RESOURCES IN THE ENVIRONMENT
- THEME : THE HUMAN BODY
- TOPIC 8 : RESPIRATORY SYSTEM

Section A. (40 Marks)

- WARNING: Not to be reproduced electronically!!**
1. Name one example of a seed bearing non-flowering plant.
 2. Give any one way of boosting the body's immunity without taking drugs.
 3. State one reason why some farmers prefer keeping rabbits to cattle.
 4. Mention any one cause of taking underdose in patients.
 5. Give one importance of planting trees in a school compound.

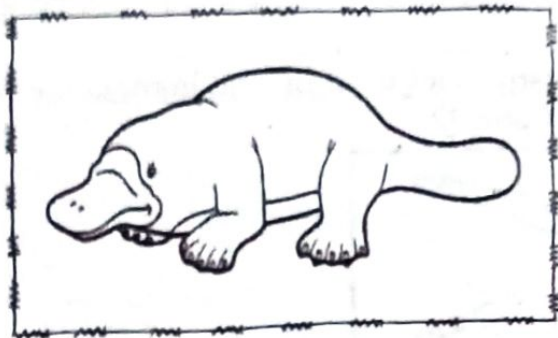

The diagram below shows an item used to give first aid. Use it to answer the questions 6 and 7.

6. Name the item shown in the diagram above.
7. State the function of the above item when giving first aid.
8. Give one characteristic of plants that make food.
9. Write one advantage of crossbreeding on a cattle farm.
10. Give a reason why **railway constructors** leave gaps in-between railways during construction.
11. Name the part of the human ear that helps in body balance.
12. Mention any one way of preventing indigestion in humans.
13. State one indicator of **poultry vices** to a farmer.

4. Give any one advantage of propagating onions using bulbs over seeds.
5. State one way in which ringworm infection can be controlled among school children.

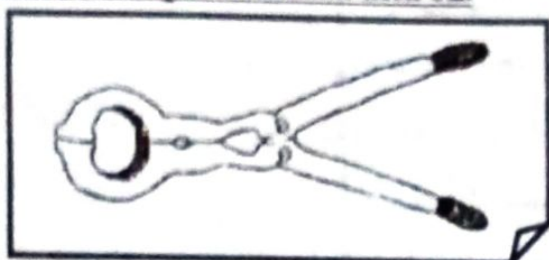

The diagram below shows a mammal. Use it to answer questions 16 and 17.

16. Identify the group of mammals to which the animal in the above diagram belongs.
17. State one way in which the group of mammals mentioned in (16) above is similar to reptiles.
18. Name the force that pulls objects towards the centre of the earth.
19. Give one way in which tapeworms enter our bodies
20. State any one effect of cattle parasites on a farm.
21. Mention one way in which poisoning can be prevented at home.
22. State the reason why legumes are included in crop rotation.
23. Identify any one practice that can lead to contamination of food at home.
24. State one way in which fermentation is important in our daily life.
25. Mention any one factor that affects the speed of sound.
26. Give any one way in which prop roots are important to a maize plant.
27. State any one characteristic of insect pollinated flowers.

28. State the reason why blood goes to the lungs.
29. Give any one way in which a mushroom is similar to a mosses plant in the way they reproduce.
30. Identify the characteristic of loam soil that makes it good for crop growing.

The diagram below shows an instrument used in goat management. Study and use it to answer the questions 31 and 32.

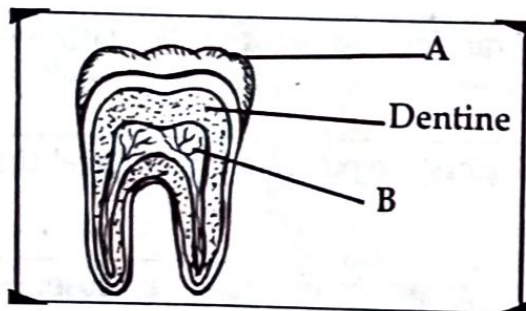

31. Name the instrument shown in the diagram above.
32. Give one way in which the instrument named above is useful to a farmer.
33. Mention any one way in which beans can be prevented from rotting before storage.
34. Name the structures in the human heart that prevents the back flow of blood.
35. State the role of yeast during fermentation of alcohol.
36. Give a reason why displacement method is used to find the volume of an irregular object.
37. Mention any one way of controlling the breeding of mosquitoes at home.
38. Give any one feature of seeds that are dispersed by wind.
39. Name the insect vector that spreads germs using its hairy body.
40. Give a reason for washing the teats of a cow with warm water before milking.

WARNING: Not to be reproduced electronically!!

Section B (60 Marks)

41. (a) Name the type of change that takes place when an insect moults.
 (b) As a P.6 child, give any two ways you can manage your body changes at home.
 (i) _____
 (ii) _____
 (c) State one effect of natural changes in the environment.
42. (a) State one characteristic that makes amphibians able to live on both land and in water.
 (b) Give any one way in which the jelly around the eggs of amphibians is important.
 (c) Explain how amphibians like frogs help in control of malaria. (02 marks)
43. The diagram below shows a section of a human tooth. Study and use it to answer questions that follow.

- (a) Name the part of the tooth marked A and B
 (i) A _____ (ii) B _____
 (b) State the function of the dentine in the human tooth.
 (c) Apart from preventing tooth decay, give any one reason for brushing teeth.
44. (a) State the meaning of seed dispersal.
 (b) Give one way in which a coconut seed is adopted to its mode of dispersal.
 (c) State two ways in which seed dispersal is important to plants.
 (i) _____
 (ii) _____

WARNING: Not to be reproduced electronically!!

45. The table below shows diseases of cattle, their causes and prevention. Use it to fill in the blank spaces correctly.

Disease	Cause	Prevention
mastitis	bacteria	(i) _____
(ii) _____	protozoa	spraying cattle with acaricides to kill tsetse flies.
anthrax	(iii) _____	regular vaccination
red water	protozoa	(iv) _____

46. (a) State one way in which each of the following practices help to preserve food.
(i) Sun drying

(ii) Freezing

(b) Give any two reasons for preserving food at home.

(i) _____

(ii) _____

47. (a) Name the method of heat transfer that helps in circulation of air in a living house.

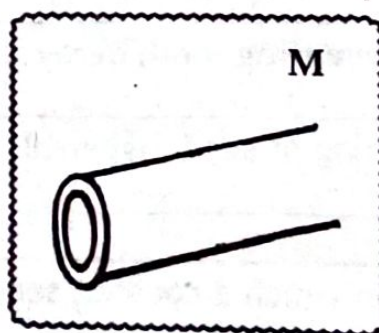

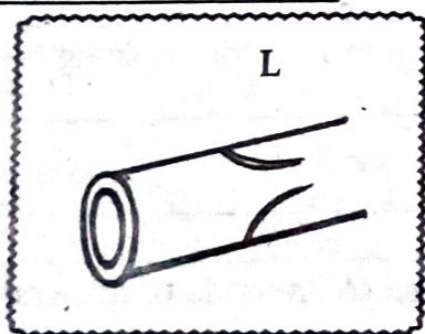

(b) Give one reason why ventilators are put on a higher level than windows and doors.

(c) State any two importance of proper ventilation in a house.

(i) _____

(ii) _____

48. The diagram below shows blood vessels. Study and use it to answer the questions that follow.

(a) Name the blood vessel marked;

(i) L _____

(ii) M _____

- (b) Give two functional difference between the blood vessel L and M
- (i) _____
- (ii) _____
49. Name the group of organisms that depend on other living organisms for food and shelter.
- (b) Apart from deworming, give any one other way of controlling tapeworm infestation.
- (c) State two effects of worm infestation to humans.
- (i) _____
- (ii) _____
50. (a) State one way in which each of the following crops are propagated.
- (i) Sweet potatoes _____
- (ii) Pineapples _____
- (b) Give any one advantage of heaping soil around tuber crops like sweet potatoes.
- (c) Mention the reason why leaves of coco yam are cut off from a slip before transplanting.

51. The diagram below shows a bad practice done by some humans in the community. Study and use it to answer questions that follow.

- (a) Name the bad practice shown in the diagram above.
- (b) State one effect of the practice in the diagram to the following;
- (i) pregnant woman
- (ii) family

WARNING: Not to be reproduced electronically!!

(c) Give one way of safeguarding yourself from the bad practice shown in the diagram above.

(a) Give any two conditions that may lead to swarming of bees.

(i) _____

(ii) _____

(b) Mention any two ways a farmer can control swarming of bees.

(i) _____

(ii) _____

(a) Name any two crops that are first planted in a nursery bed.

(i) _____

(ii) _____

(b) State any one factor considered when choosing a suitable site for a nursery bed.

(c) Give one reason why some crops are first planted in a nursery bed.

(a) Name one example of a mammal that uses echoes.

(b) Give one way in which covering of cinema halls with soft boards helps to minimize echoes when watching films.

(c) Apart from softboards, identify any other two materials that can be put in cinema halls to reduce echoes.

(i) _____

(ii) _____

(a) Identify any two activities children can do to keep their school clean.

(i) _____

(ii) _____

(b) State the importance of washing hands with clean water and soap after visiting the latrine.

(c) Give one role of the school health committee in promoting sanitation at school.
