Turn Over

SECTION A: 40 MARKS

*Answer **all** questions in this section*

*Questions **1** to **20** carry two marks each*

1. Write **399** in Roman numerals.

2. Simplify: $\frac{3}{5} + \frac{3}{5}$

3. In a school, there are 507 pupils out of this number, 289 are boys. Find the number of girls in the school.

4. Given that set ***P = {all prime numbers less than 7}.*** Find number of subsets in set **P**.

5. A baby woke up at 9:44 a.m. Write this time in 24 hour clock system.

6. Given that **C = 16** and **T = 12**. Simplify **CT**.

7. Area of a square garden is $49m^2$. Find the length of the square garden.

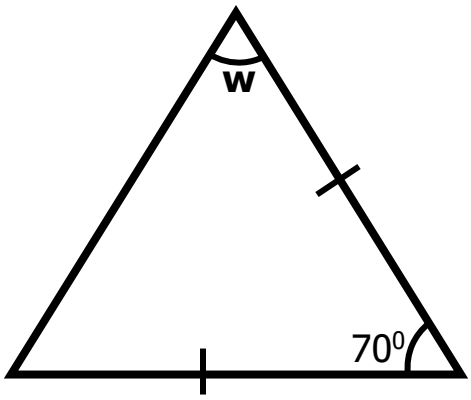

8. An interview test that started at 9:40 a.m ended at 12:05 noon. Find the time taken to do the interview.

9. A farmer harvested 16.85kg of maize. Express the quantity of his harvest In grammes.

Turn Over

10. Express 45% as a fraction in its simplest form.

11. In the diagram below, find the size of angle ***W***.

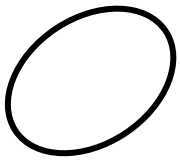

12. Simplify: ***47.04 – 23.1 + 13.06***

13. With the help of a sharp pencil, a ruler and a pair of compasses only, construct an angle of 75^0.

14. Write **4044** in expanded form using place values.

15. Find the range of 55, 28, 77, 19 and 34.

16. Name the shape below.

.....

17. Write **253_{seven}** in words.

18. In a class of 30 pupils, 16 are girls. Find the ratio of boys to girls in that class.

19. Draw tallies to represent 19 balls.

20. In a shop, 4 counter books cost sh.16,000. Find the number of books that can be bought with sh.28,000.

Turn Over

SECTION B: 60 MARKS

*Answer **all** questions in this section*

*Marks for **each** question are indicated in **brackets***

21. (a) Allen had $\frac{2}{3}$ a watermelon and he gave $\frac{5}{6}$ of it to his brother Pius. Later in the afternoon, he bought more $\frac{1}{4}$ of a watermelon. Find the fraction of watermelon he had at the end of the day. ***(03 marks)***

(b) Calculate the number of half litre bottles that can be used to fill a 10 litre jerrycan. ***(02 marks)***

22. A shop keeper bought 4 boxes of soap each having 25 bars of soap. He sold 80 bars during the weekend and bought more 2 boxes of soap each having 25 bars of soap. Calculate the number of bars of soap that remained. ***(04 marks)***

23. Find the value of each unknown in the magic square below. ***(05 marks)***

7	***p***	5
m	4	***t***
3	***w***	1

24. Moris scored the following marks in a weekend test. Use it to answer questions that follow.

Mars (%)	72	45	38	72	88
Subjects	ENG	MTC	SST	SCI	R.E

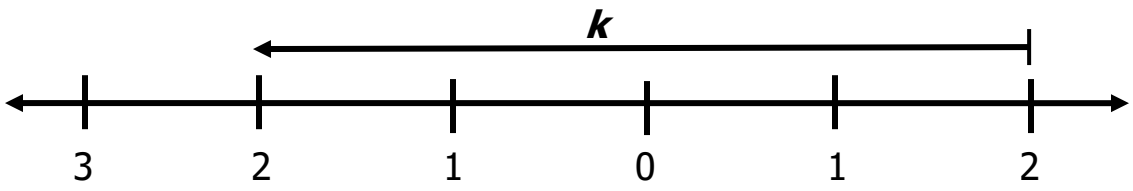

(a) Find his median mark. ***(02 marks)***

(b) Find his modal frequency. ***(02 marks)***

(c) Calculate his average mark for the test. ***(03 marks)***

Turn Over

25. (a) Write the integer represented by letter ***k.*** ***(01 mark)***

K: .....

(b) Add: $^{-}7 + 6$ ***(02 marks)***

26. A passenger bus travelling covered a distance of 80km from Bombo to Mityana for 4 hours. It continued to Mukono for 3 hours and covered a distance of 60km. It then went back to Bombo via the same route. Calculate the average speed of the bus. ***(05 marks)***

27. In a school, two bells one for lower classes and the other for upper classes are rung to change lessons. The lower class bell rings after 20minutes and the bell for upper classes ring after 30 minutes. The two bells are first rung at 7:30 a.m.

(a) After how many minutes will the bells be rung for the second time?

(02 marks)

(b) Find the time when the two bells will be rung for the second time.

(03 marks)

28. A market vendor bought 5kg of beans each at sh.5,000. She sold the 5 kg of beans at a total cost of sh.40,000. Calculate her percentage profit.

(03 marks)

Turn Over

29. Use a pair of compasses, a sharp pencil and a ruler to construct an equilateral triangle in a circle of diameter 10cm. ***(04 marks)***

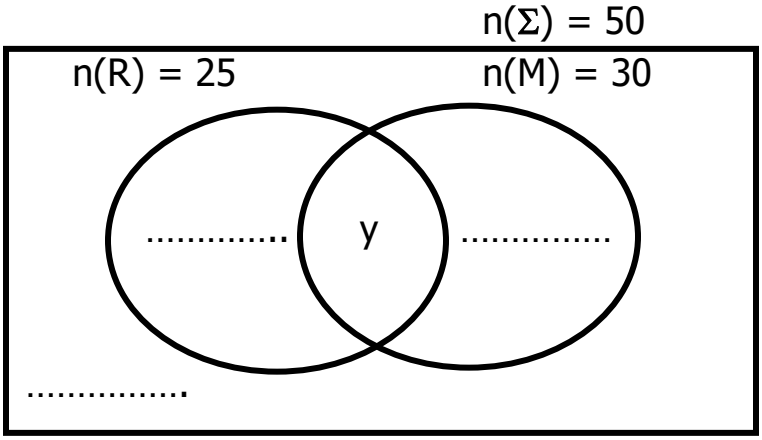

30. Given the base five number $\mathbf{324_{five}}$.

(a) Write the place value of **3** in the above number. ***(01 mark)***

(b) Workout the value of **2** in the above number. ***(02 marks)***

(c) Express the above base five number in decimal base. ***(02 marks)***

31. (a) In a class of 50 pupils, 30 like Maths (M) , 25 like R.E (R) , y like both subjects while 3 like other subjects. Use the information to complete the Venn diagram below. ***(03 marks)***

(b) Find the number of pupils who like at least one subject.

(03 marks)

(c) A new teacher who joined the school picked a pupil at random. Find the probability of him picking a pupil who liked maths but not R.E.

(02 marks)

Turn Over

32. (a) A man is 18 years older than his wife. Sum of their ages is 68 years. Find the man's actual age two years ago. ***(03 marks)***

(b) Workout their total age in 6 years to come. ***(03 marks)***
