

WK	PD	THEME	TOPIC	SUB-TOPIC	COMPETENCES Subject	LANGUAGE	CONTENT	METHODS AND TECHNIQUES	ACTIVITIES	LIFE SKILL INDICATORS AND VALUES	T/LT MATERIALS	REFERENCES	REMARKS
1	1	THE WORLD OF LIVING THINGS	PLANT LIFE	Plants	-The learner defines plants -States characteristics of plants. -Mentions the groups of plants. -Explains flowering plants and their example. -Draws the structure of a flowering plant.	The learner spells, reads and uses the new words e.g. chlorophyll, cotyledon etc.	Plants: Area organisms that make their own food through photosynthesis and are deeply rooted in the ground. <u>Characteristics of plants.</u> They are rooted in the ground. -They make their own food <u>Types of plants</u> -Flowering plants -Non- flowering plants *Flowering plants are plants that bear flowers. Flowering plants reproduce by means of seeds_ Examples; mango tree, orange tree etc. -Structure of a flowering plant 	Excursion Guided discovery Observation	-Defining plants -States characteristics of plants. -Mentions the groups of plants. -Explaining flowering plants.	-Effective communication - Articulation -Fluency -Verbal <u>Values</u> Love Care	Real plants Charts showing parts of flowering plants.	Primary four syllabus Page 1 Sure Key book 4 Page 2	
	2			Parts of a flowering plant	-The learner discusses the function of different parts of a flowering plant. -Draws and labels the different root systems.	Writes words and sentences related to flowering plants.	-Function of the parts of a flowering plant. -Terminal bud: It grows to increase the height of the plant. -Axillary bud: It grows into side branches , leaf, flower Stem: It holds the leaves, flowers and fruits of a plant. Leaves: Make food for the plant. Systems of flowering plants. -Root system -Shoot system -Diagram showing root and shoot system 	Guided discussion. Explanation . Observation.	-Discussing the functions of different parts of flowering plants. -Draws and labels the parts of different root systems.	Effective communication Fluency Audibility Critical thinking Responding to questions. <u>Values</u> Cooperation Care.	-Having diagrams of different parts of flowering plants.	Primary four syllabus Page 1 Sure key book 4 Page 6	

3	THE WORLD OF LIVING THINGS	PLANT LIFE	Functions of roots to plants and to people	-States the functions of roots to plants. -States the examples of plants with a tap root system.	The learner reads words like fibrous, tap root correctly	<u>Functions of roots to plants.</u> -Absorbs water and mineral salts from the soil. -Holds the plant firmly in the soil. -Store food for some plants. <u>Functions of roots to people.</u> -They are eaten as food. -Source of herbal medicine. <u>Classification of roots.</u> -True roots -False roots <u>Examples of true roots.</u> -Tap roots Examples of false roots. -Fibrous roots -Prop roots -Buttress roots -Clasping roots Illustration of tap roots and fibrous roots. 	-Discussion - Observation -Guided discovery	-Stating the functions of roots to people and plants. -Stating examples of plants with a tap root. Drawing diagrams showing tap root and fibrous roots.	-Effective communica tion - Verbal -Audibility - Fluency <u>Values</u> - Cooperatio n -Sharing	Chart showin g fibrous and tap root system .	Prim ary sylla bus Page 1 Sure Key Page 10 St Bern ard Page 4 and 10		
4			Shoot system	-Defines the shoot system. -States the component of the shoot system. -Identifies the function of the stem to the plant. -Use of stems to man.	-Reads sentences related to the shoot system.	Shoot system: This is the part of the plant above the ground. Components of a shoot system: Stem, leaves, flowers, and fruits. <u>*Functions of stem to a plant.</u> -They transport water and mineral salts to other parts of the plant. <u>*Uses of stem to man.</u> <u>Types of stems.</u> Upright and underground stem.	-Group discussion - Explanation	-Defining shoot system. -States the components of the shoot system.	-Creative thinking. -Logical reasoning Effective communica tion Articulation Fluency	Chart showin g differ ed compo nents of a shoot system .	-P.4 syllabu Page 1 Sure key st Bernar ds Page 3		

											Real diagrams.		
	5	THE WORLD OF LIVING THINGS.	PLANT LIFE	Leaves Leaf venation Types of leaves	The learners draw and label parts of a leaf. -States the functions of each parts of the leaf. -Functions of leaves to plants. -Functions of leaves to people.	The learner reads words like midrib, apex, veins etc. correctly	-Structure of a leaf. Functions of parts of a leaf. <u>Apex</u> : It protects the leaf. <u>Leafstalk</u> : Holds the leaf on the stem. <u>Veins</u> : Transport water and mineral salts to all parts of the leaf. Functions of leaves to plants. -Manufacture food for the plant. -Have stomata for breathing. Functions of leaves to people. -Sources of herbal medicine. -Some are eaten as food.	-Guided discussion - Observation -Question and answer -Guided discovery	-Drawing parts of a leaf -Stating the functions of each part of the leaf -Giving the functions of leaves to plants. - Giving the functions of leaves to people.	Effective communication Fluency Audibility Articulation <u>Values</u> Care Love	Real objects eg a leaf Chart showing parts of a leaf	P4 syllabus Page 1 St Bernard Page 4	
	6				Defines the term leaf venation. States the types of venations Gives examples of plants with each type of venation Drawing diagrams showing different types of venation	Spells words like venation, parallel, network correctly.	-Venation: Is the arrangement of veins in a leaf. <u>Types of venation.</u> *Network leaf venation *Parallel leaf venation -Network leaf venation is the type of venation where the veins make something like a net. Examples of plants with network leaf venation: Beans, cow peas, groundnuts Parallel leaf venation: Maize, Sugarcane, simsim etc. Diagram showing types of venations.	Think Pair Share Explanation	-Defining the term venation -Stating the types of venation -Giving example of plants with each type of venation	Fluency Verbal <u>Values</u> Sharing Appreciation	-Real leaves A chart showing different types of venations	P4 syllabus Page 1 St Bernard's P4	
2	1				The learner describes the different types of leaves. Drawing different types of leaves.	Spells words like simple compound etc. correctly	TYPES OF LEAVES: - <u>Simple leaves</u> : These are leaves with one leaflet on the leaf stalk. - <u>Examples of simple leaves</u> : *Simple entire *Simple Serrated *Simple lobbed -Diagrams <u>Compound leaves.</u>	Guided discovery Question and answer Explanation	Describing the differed types of leaves Drawing diagrams of differed types of leaves	Effective communication Accuracy Audibility	Real compound and simple leaves	P4 syllabus Page 1 Sure Key	

						These are leaves with more than one leaflet on a leafstalk Examples of compound leaves *Compound Pinnate *Bi-pinnate *Trifoliate *Digitate Diagrams -Examples of plants with compound leaves  Tap Root Fibrous Root	Observation		Verbal Problem solving Taking decision Making choices <u>Values</u> Care Love	A chart showing diagrams of compound and simple leaves.	P4 Page 24	
2			Processes that take place in plants(Transpiration)	The learner; -Defines transpiration -States the factors that affect transpiration -Carries out the experiment showing the rate of transpiration.	Spells words like suck, formation, shedding.	-Transpiration: Is the process by which plants loose water in form of water vapor into the atmosphere -Transpiration takes place in the stomata, lenticels and cuticles. Factors that affect the rate of transpiration. -Size of the leaf -Humidity -Number of stomata *Experiment to show that plants carry out transpiration 	-Group discussion - Experimentation -Guided discovery -Question and answer observation	-Defining transpiration -Stating the factors that affect transpiration -Carrying out the experiment showing the rate of transpiration	<u>Problem Solving</u> -Taking decision -Evaluating facts <u>Values</u> Care Love	A chart showing an experiment to show that that plants carry out transpiration. -Plants - Polythene bag	P4 syllabus Page 1 Sure key P.4 Page 28	
3	THE WORLD OF LIVING THINGS	PLANT LIFE	Transpiration	Learners: -States the importance of transpiration of plants and environment. -Identify the dangers of transpiration. -Control of transpiration	A learner spells and reads words related to transpiration e.g. humidity , temperature, stomata etc. correctly	<u>Importance of transpiration to plants.</u> -Cools plants on hot days -Allows roots to absorb more water from the soil. <u>Importance of transpiration to the environment.</u> -Rain formation <u>Dangers of transpiration.</u> -Causes wilting in plants -Causes drying up in plants	Guided discovery Explanation Classroom discussion Question and answer	-Stating the importance of transpiration to plants and environment. -Identifying the dangers of transpiration -Controlling transpiration	<u>Effective communication</u> -Fluency -Audibility <u>Logical reasoning</u> -Making decisions	Flash cards	P.4 Syllabus Page 1 Sure Key P.4 Page 29	

							Control of the rate of transpiration. _Shedding off leaves during the dry season -Modifying leaves into thorns						
4				Photosyn thesis	A learner; -Defines photosynthesis -States the importance of photosynthesis -Mentions the conditions necessary for photosynthesis to take place -Identifies raw materials for photosynthesis to take place.	A learner spells and reads key words related to photosynthesis e.g. chlorophyll correctly.	-Photosynthesis is the process by which plants make their own food(glucose) <u>Importance of photosynthesis to the environment.</u> Reduces the amount of carbon dioxide in the environment. PLANTS *Enables plants to get their food. ANIMALS *Enables animals to get food and oxygen CONDITIONS *Presence of chlorophyll *Presence of light RAW MATERIALS *Water and Carbon dioxide	Explanation Guided discussion	-Defining photosynthesis -Stating its importance -Mentioning conditions for photosynthesis	Effective communica tion -Critical thinking - Responding to question correctly VALUES *Love *Care	Real objects like plants	P4 Sylla bus Page 1 Sure key P4 Page 25	
5	THE WORL D OF LIVING THING S	PLANT LIFE	Flowers	-The learner states the meaning of a flower -Gives the importance of flowers to plants. -Draws and labels parts of a flower. -States the functions of each part,	The learner spells and reads words like flower	FLOWER: Is the reproductive part of the plant. IMPORTANCE OF FLOWERS TO PLANTS. *Enables plants to produce fruits and seeds. -Structure of a flower -FUNCTIONS OF PARTS OD A FLOWER. Anther: Produce and stores pollen grains. Petal: Protects the inner parts of a flower. Stigma: Receives pollen grains during pollination The reproductive parts of a flower are : *Pistil *Stamen	-Guided discovery -Think -Pair -Share -Brain storming	-State the meaning of a flower -Give the importance of a flower. -Drawing and labeling parts of a flower. -Stating the functions of each part.	EFFECTIVE COMMUNI CATION *Fluency *Audibility *Confidenc e FRIENDSHI P FORMATIO N. *Sharing *Working in groups VALUES *Sharing *Care	-A chart having a diagram of a flower. Real flowers	P4 sylla bus Sure Key book Bk 4 Page 31		
6	PLANT LIFE: the world	PLANT LIFE	Pollinatio n	Spells words like pollination, cross etc.	Defines pollination -States the types of pollination	POLLINATION: Is the transfer of pollen grains from the anther head to the stigma of a flower. TYPES	Brain storming.	Defining pollination. -Stating the types of pollination.	Speaking loudly	Work cards	P4 Sylla bus		

		of living things.				-Gives the importance of pollination.	*Self-pollination *Cross pollination. IMPORTANCE OF POLLINATION. *Allows plant fertilization. *Improves on plant yields. AGENTS OF POLLINATION *Insects *Birds *Wind *Water *Self-pollination *Cross pollination.	Group discussion	-Giving the importance's of pollination		A flower	Sure key page 35	
3	1	THE WORLD OF LIVING THINGS	PLANT LIFE	Gives the characteristics of insect pollinated flowers	The learner reads, spells and writes the new words correctly eg fertilization, characteristics	The learner reads words and sentence related to pollination correctly	<u>Characteristics of Insect pollinated flowers.</u> -They have brightly colored petals to attract pollinators. -They produce scent and nectars. -They produce few pollen grains. -They are large enough to be seen. <u>Characteristics of wind pollinated flowers.</u> -Produce a lot of pollen grains. -Produces light pollen grains. -They have hairy stigma. -They have weaker filament. <u>Fertilization in flowers:</u> Is the union of the nuclei of male and female gametes to form a zygote. Diagram describing the process of fertilization in plants. <u>Results after fertilization:</u> *Ovary develops into fruits. *Ovules develop into seeds	Guided discovery Brain storming Explanation	-Giving the characteristics of insect and wind pollinated flowers. -Defining fertilization Guided discovery Brain storming Explanation	Critical thinking - Responding to questions. -Taking a decision	A chart a diagram describing the process of fertilization	P.4 Syllabus Page 1 Sure Key Page 37	
	2	THE WORLD OF LIVING THINGS	Plant Life	Seeds and fruits	-Defines a seed and a fruit. -Gives the types of seeds. -States the characteristics of monocots.	Spells words like monocotyledonous.	-A seed is a fertilized ovule. A seed develops into a new plant. TYPES OF SEEDS. -Monocotyledonous -Dicotyledonous Characteristics of Monocots. -They have one cotyledon. Examples include : Maize, Sorghum Diagram showing a maize Grain. 	Do observation	-Defining a seed and a fruit. -Giving types of seeds. -Stating the characteristics of monocots.	Effective communication *Fluency *Articulation. VALUES *Love *Care	Real maize grains.		

3	THE WORLD OF LIVING THINGS	PLANT LIFE	Dicotyledonous seeds	-The learners explain dicotyledonous seeds -States the characteristics of dicots. -Gives examples of dicots.	The learner spells dicotyledonous.	Dicotyledonous seeds: These are seeds with two cotyledons. Characteristics of dicotyledonous seeds. *They have two cotyledons. *They store food in the cotyledon. EXAMPLES: -Beans, Peas -Soya beans -Ground nuts Parts of a dicot seed. Functions of the parts *Micropyle: lets water and air into the seed during germination *Cotyledon: Stores food for the embryo Seed Coat (Testa): Protects the inner parts of the seed.	Group discussion Brain storming Explanation Observation	-Explaining dicot seeds -Stating the functions of dicots -Giving example of dicots	Effective communication *Articulation *Verbal *Audibility Decision making *Acceptance *Refusal *Making questions Values *Cooperation *Sharing *Appreciation	Real beans and ground nuts	P4 Syllabus Page 1 Sure Key P4 Page –	
4	THE WORLD OF LIVING THINGS	Plant life	Germination of seeds	-The learner explains the term germination. -Describes the stages of germination. - States the types of germination.	The learner spells and reads words like germination.	-Germination is the development of a seed into a seedling. STAGES OF GERMINATION -Seeds take in air and the seed swells and testa. -Radical emerges fast to form the root system. -Plumule comes out to form the shoot system. TYPES OF GERMINATION *Hypogeal *Epigeal Diagram showing hypogeal and epigeal germination. 	Explanation Guided discussion Brain storming	-Explaining the term germination -Describing the stages of germination.	Effective communication *Fluency *Verbal *Confidence *Audibility Problem solving *Taking a decision Evaluating facts Values *Care *Love	A chart having diagrams describing germination.	P4 curriculum	
5	THE WORLD OF	Plant life	Epigeal germination	-Explains epigeal germination	The learner spells, reads and writes the new terms correctly	EPIGEAL GERMINATION: This is the type of germination where the	Guided discovery	Defining epigeal germination	Critical thinking	Bean seed	P4 curri	

		LIVING THINGS			-States examples of seeds which undergo epigeal germination.		cotyledon comes above the ground. -Examples of seeds which undergo epigeal germination. *Beans *Coffee *Soya beans -Diagram describing epigeal germination. NOTE: Cotyledon supplies food to the embryo. The Cotyledon is also called seed leaf. -Importance of germination. *Enables plants to get food.	demonstration	Giving examples of seeds which undergo epigeal germination.	Effective communication Values Share Love	Coffee seed Environment	culum	
	6	THE WORLD OF LIVING THINGS	PLANT LIFE	Conditions necessary for germination	-The learner spells and pronounces words like moisture, warmth etc	The learner spells and reads words like viability	CONDITIONS NECESSARY FOR GERMINATION -Presence of oxygen: Oxygen is used for respiration by an embryo. Moisture: dissolves food for the embryo. -Warmth: Gives the right temperature for seeds to germinate. _Steps taken to demonstrate conditions necessary for germination. -Material needs. *Bean seeds *Four empty tins *oil *cotton wool. STEPS FOLLOWED *Place cotton wool in each of the tins and moisten it with water except one tin that remains dry.	Experimentation - Observation - Demonstration - Explanation	Stating The conditions necessary For germination. Carrying out the experiment to show conditions necessary for germination	Effective communication *Verbal *Articulation *Confidence	Visual aids	P4 Syllabus page 1	
4	1	THE WORLD OF LIVING THINGS	PLANT LIFE	Seed Viability	-The learner defines seed viability. -States the factors that affect seed viability. -Carry out an experiment to test for seed viability.		<u>Seed Viability:</u> Is the ability of the seed to germinate when given favorable conditions. <u>Factors that affect seed viability:</u> _Poor storage *Damaged by pests <u>Experiment to test for viability</u> Steps followed: -Take a transparent glass and fill it half way with water	Observation Critical thinking Question and answer	-Defining seed viability -Stating factors that affect seed viability -Carrying out an experiment to test for seed viability.	Decision making *Acceptance *Refusal VALUES *Care *Love *Honesty	A chart showing an experiment to test for viability	P4 syllabus Page 1	Sure Key Page 44

						-Drop good beans and bad beans in the glass of water. -Observe which beans sink and float in 5 minutes. -Conclude by saying that sinking beans are viable and floating beans are non- viable. <u>Roles of materials in the experiment.</u> -Good beans represent seeds with viable embryo. -Bad beans represent non-viable beans. Water helps to distinguish between viable and non-viable beans based to destroy. -How to maintain seed viability.						
2	THE WORLD OF LIVING THINGS	PLANT LIFE	Seed dormancy	-The learner defines words seed dormancy, -Gives factors that caused dormancy in seeds. -States ways of breaking seed dormancy.	The learner spells words like dormancy.	<u>Seed dormancy:</u> Is when a seed fails to germinate due to lack of favorable conditions? <u>Factors that make seeds fail to germinate.</u> Water is the factor that causes seed dormancy. Having hard testa. Seed dressing. <u>How to break seed dormancy.</u> Soaking, Scarification.	Guided discovery Explanation	-Defining seed dormancy -Giving factors that causes dormancy in seeds. -Stating ways of breaking seed dormancy.	FRIENDSHIP FORMATION: *Sharing *Working in groups. PROBLEM SOLVING: Making choices *Taking a decision	A chart showing factors that make a seed to germinate.	P4 syllabus Page 12 Sure Key Book 4 Page 46	
3			Ways which plants are important to people.	The learner; -States ways in which plants are useful to people. -Gives ways in which plants are harmful to people. -States ways of conserving plants.	The learner; Reads, spells and writes the new words correctly.	<u>Importance of plants.</u> -Plants are sources of food. -Plants provide electric poles -Used to make crafts. -Source of herbal medicine. <u>How plants are harmful to people.</u> -Some plants are poisonous to man. -Have thorns which pierce people. They keep dangerous animal. <u>Ways of conserving plants.</u> -Planting more trees. -Using alternative sources of fuel. -Proper harvesting of trees. -Controlling bush burning.	Question and answer Explanation	-Stating ways in which plants are useful to people. -Give ways in which plants are harmful to people.	Real objects	Repositioning learners		

4	THE WORLD OF LIVING THINGS		Types of crops	-States the types of crops. -States the characteristics of annual crops. Identifies example of annual crops.	Reads words like annual, perennial etc.	ANNUAL CROPS: Are crops that grow and mature in one season. (They are also called seasonal crops) CHARACTERISTICS *They take less than a year to mature. *Their life cycle lasts for a season. Examples include: maize, tomatoes, cassava. -Diagrams showing annual crops. ADVANTAGES OF ANNUAL CROPS. *They give quicker returns. *They can be easily include in crop rotation. *They improve soil fertility. *They promote food security.	Question and answer Explanation	Stating the types of crops. Identifying examples of annual crops.	<u>Creative thinking</u> *Logical reasoning *Innovative ness Problem solving	-Real objects -A chart showin g exampl es of annual crops	P4 sylla bus Page 3 St Bern ard's book 4 Page 20 Sure Key book 4 Page 51	
5	THE WORLD OF LIVING THINGS	CROP GROWING	Perennial crops	-The learner defines perennial crops. -States the characteristics of perennial crops. -Identifies example of perennial crops. -Draws diagrams of perennial crops	Reads and writes sentences about perennial crops.	Perennial crops :These are crops that grow and mature in more than one season Characteristics of perennial crops. *They take more than one year to mature. *They provide multiple harvest. Their life cycle lasts for many years. Examples include: Tea, Coffee, Mangoes, and Jackfruit. Diagrams of perennial crops. Advantages of Perennial crops. *Don't need a lot of care. *Can be harvested throughout the year.	Question and answer Explanation	Defining the term perennial crops Stating the characteristics of perennial crops Identifying examples of perennial crops Drawing diagrams of perennial crops.	DECISION MAKING *Acceptanc e *Refusal VALUES *Love *Honesty *Care Problem solving Critical thinking	A chart showin g exampl e of perenn ial crops. Real objects	P4 Sylla bus page 3 Sure key book 4 Page 51 St Bern ard's page 20- 21	
6	THE WORLD OF LIVING THINGS		Root crops and Vegetabl e crops	The learner explains what root crops are. -Explains vegetable crops Spells words like root , vegetable etc.	The learner; Reads and spells the new words correctly for example vegetable and root crop.	Root crops are crops that have edible crops. Examples of root crops include: Cassava, Carrot, Sweet potatoes. Diagrams showing root crops. VEGETABLE CROPS Vegetables are plants or part of a plant eaten as food. TYPES OF VEGETABLES	Explanation Guided discussion	Explaining vegetable crops Giving examples of root crops. Drawing root crops	A chart showing examples of root crops.	Visual aids	P4 Sylla bus Page 3 Sure Key book 4	

							*Leafy vegetables e.g. cabbage, Spinach, Lettuce. *Fruit vegetables e.g. tomato , egg plant *Root vegetables e.g. Carrot, Turnip.					page 55	
5	1	THE WORLD OF LIVING THINGS		Garden tool equipment and Materials .	-The learner identifies examples of garden tools -States the uses of each garden tool. -Gives ways of caring for a garden tool. Spells and reads words like axe , spade, jerry can etc.	The learner; Reads and writes the new vocabulary correctly. E.g. wheelbarrow, harvest.	GARDEN TOOLS -Examples of garden tools. -Uses and how to care for them. Hoe *For digging *Keeping it in a cool dry area. RAKE *For collecting rubbish *By painting WHEELBARROW *For transporting manure and harvests. *By painting it -Adaptation of each garden tool e.g. a rake has a strong metal with teeth like structure that help in gathering weeds. -Diagram showing different garden tools.	Observatio n Brain storming	Giving examples of garden tools Giving ways of caring for garden tools	A chart showing garden tools , equipment and materials	Hands on activities	P.4 syllabus Page 3	
	2	THE WORLD OF LIVING THINGS	CROP GROWING	Crop growing practices	-The learner states the meaning of crop growing practices. -Identifies differed crop growing practices. -States the first stages of crop growing. -Gives reasons why land preparation is done during the dry season.	The learner; Reads, spells and writes the new words correctly for example practice, land preparation.	Crop growing practices are differed activities done during crop growing. Land preparation is the first stage in crop growing. It is usually done in the dry season. REASONS. To prevent weeds from regrowing. To enable weeds dry before drying. -Methods of weed preparation. *Slashing *Cutting big trees *Ploughing	Group discussion Brain stormiest Explanation	Stating the meaning of crop growing practices Identifying different crop growing practices.	EFFECTIVE COMMUNICATION *Articulation *Fluency DECISION MAKING *Acceptance *Refusal *Making questions	A chart showing tools used in land preparation	P4 syllabus page 3 Sure Key book 4 page	

3	THE WORLD OF LIVING THINGS		Ploughing	The learner; States the meaning of ploughing Gives reason for ploughing land Mention activities done during ploughing.	The learner; Spells words like ploughing	PLOUGHING: Is the opening up of land and digging REASONS FOR PLOUGHING. *To loosen the soil *To improve on the soil aeration. *To remove weeds for better planting conditions. -Activities done are digging -Tools used for ploughing are hoe, oxen, tractor, and Forked hoe. HARROWING: Is the breaking of big lumps of soil which they left after ploughing.	Observation Guided discovery Question and answer.	Stating the meaning of ploughing Giving reasons for ploughing	CREATIVE THINKING *Logical reasoning VALUES *Care *Love	A chart showing tools used for ploughing	P4 syllabus page 3 Sure Key book 4 page	
4		CROP GROWING	Seed selection	-The learner states the meaning of seed selection. -Gives reason why farmers carry out seed selection. -Mentions the characteristics of a viable seed.	Writes words and sentences about seed selection.	-Seed selection is the removal of damaged seeds from health ones. It's also called sorting seeds. WHY FARMERS SORT SEEDS. *To increase crop yields. *To get viable seeds. *To reduce chances of gap filling. CHARACTERISTICS OF A VIABLE SEED. *Should be free from physical damage. *Should be mature enough *Should not be broken. FURROWING: Is the making of holes for furrows in the garden -Tools used for furrowing are : hoe , garden fork(dibber)	-Guided discovery Observation	Stating the meaning of seed selection Giving reasons why farmers carry out seed selection Mentioning the characteristics of a viable	EFFECTIVE COMMUNICATION *Fluency *Audibility *Verbal CRITICAL THINKING *Responding to questions.	Real plants A chart showing tools used for furrowing.	P4 syllabus Page 4 Sure Key book 4 page 63 St Bernard's Page 27	
5			Planting	-States the meaning of planting. -The season which planting is done. -States the reason why planting is done in the rainy season. -States the methods of planting.	The learner; Spells and pronounces the new words or terms correctly For example, planting, cutting.	Planting: This is the practice of burying seeds or stem cutting in the soil to grow. Planting is done during in the rainy season. REASONS WHY PLANTING IS DONE IN THE RAINY SEASON. *Rain makes the soil soft for the growth of roots. METHODS OF PLANTING Broadcasting and Row planting. -Advantages and disadvantages.	Explanation Demonstration	Stating the meaning of planting Stating the reasons why planting is done in rainy season	PROBLEM SOLVING *Faking decision *Evaluating facts VALUES *Cooperation *Sharing	A chart showing example of planting materials.	P4 syllabus Page 4 Sure Key book 4 page 63	

												St Bern ard's Page 27	
	6	THE WORLD OF LIVING THINGS	CROP GROWING	Nursery bed	The learner states the meaning of a nursery bed. States the factors to consider when choosing the site for a nursery bed	Learner spells words like Hardening off, transplanting , nursery etc.	A nursery bed is a garden prepared for raising seedlings before transplanting. -Seed bed is a piece of land prepared to plant seedlings for further growth. FACTORS FOR CHOOSING A SITE FOR A NURSERY BED. *Fertility of the soil: Help seedlings to grow strong and healthy. Nearness to water source: For easy access of water needed to keep the seedlings alive. *Nearness to home: For easy inspection. Drainage: To avoid rotting of the soil roots.	Demonstration Guided discovery Explanation as a technique	Stating the factors to consider when choosing a site for the nursery bed.	EFFECTIVE COMMUNICATION *Audibility *Fluency *Verbal VALUES *Endurance *Concern Critical thinking Problem solving	Real objects	P4 Syllabus Page 4 Sure Key book 4 Page 68	
5	1			Importance and care for the nursery bed.	States the importance of a nursery bed -Gives the ways of caring for the nursery bed. -States the materials needed when preparing nursery bed.	The learner; Spells and writes the new terminologies correctly. Slasher, spraying Fencing.	IMPORTANCE OF A NURSERY BED *Protects seedlings from harsh weather conditions. *Prevents wastage of seedlings. MATERIALS NEEDED Dry grass, hoe, seeds, slasher, poles, manure etc. CARING FOR SEEDS IN A NURSERY BED *Watering *Regular weeding. *Spraying *Fencing *Thinning *Hardening off etc.	-Guided discovery - Explanation Demonstration	Stating the importance of a nursery bed. Stating the materials needed when preparing a nursery bed	CRITICAL THINKING Responding to questions	-A chart showing materials needed	P4 Syllabus Page 4 Sure Key book 4 Page 68 St Bernard's Page 29	
	2	THE WORLD OF LIVING	CROP GROWING	Transplanting	-The learner explains transplanting.	The learner spells words like transplanting.	Transplanting is the transfer of seedlings from the nursery bed to the main garden or seed bed.	Excursion Group discussion	Explaining transplanting.	EFFECTIVE COMMUNICATION *Accuracy	A chart indicating the steps	P4 Syllabus	

		THINGS			-Gives reason why transplanting should be done in the evening. -Mentions the garden tool used for transplanting. -States steps taken when transplanting seedlings.		-WHY TRANSPLANTING IS DONE IN THE EVENING. *To prevent seedlings from wilting. *There is low rate of transpiration in the evening. -The garden tool for transplanting is a garden trowel. The garden trowel is rigid to easily scoop seedlings from the soil without damaging the roots. STEPS TAKEN DURING TRANSPLANTING. *Water the nursery bed before scooping the seedlings out of the soil.	Explanation	Mentioning the garden tool used for transplanting.	*Logical flow of ideas EMPATHY *Guiding others *Caring *Comforting.	taken during transplanting	page 4	Sure Key book Page 68	
3		CROP GROWING	Gap filling and Thinning	States the meaning of gap filling. Suggests the importance of gap filling	Writes words like gap filling.	Gap filling: Is the replacing of fresh seeds in the garden where they did not germinate after planting. ADVANTAGES. *It increasing crop yields *Maintains crop population. THINNING: Is the removal of excess seedling from the garden. ADVANTAGES OF THINNING *Controls easy spread of pests and diseases.	Critical thinking Explanation	Defining the term gap filling Suggesting the importance of gap filling.	PROBLEM SOLVING *Taking decisions *Making decisions VALUES *Endurance *Togetherness	A chart with advantages of thinning and gap filling.	P4 Syllabus page 4	Sure Key Book Page 69	St Bernard's Page 33	
4	THE WORLD OF LIVING THINGS	CROP GROWING	Weeding	-The learner gives the meaning of weeding. -States the importance of weeding. -Identifies examples of weeds.	The learner; Spells words like weeding	Weeding is the removal of unwanted plants growing in the garden. A weed is unwanted plant in the garden. IMPORTANCE OF WEEDS *Used for mulching *Used as animal feeds. *Source of herbal medicine. Examples of weeds: black jack, spear grass, wondering Jew, etc. IMPORTANCE OF WEEDING. *Reduces competition for light and nutrients *Controls crop pests.	Discussion Explanation	Defining the term weeding. Stating the importance of weeding. Giving the examples of weed	SELF AWARENESS *Making choices *Caring for onset VALUES *Respect *Togetherness	A chart showing examples of weeds	P4 Syllabus page 4	Sure Key Pg.		

	5			Dangers of weeds	The learner; States the dangers of weeds. Ways of controlling weeds.	The learner spells and pronounces the new terms correctly for example weeds, danger, mulching	DANGERS OF WEEDS *Increase competition for plant nutrients. *Act as hiding places for crop pests. Spread diseases to crops. METHODS OF CONTROLLING WEEDS. *Slashing *Spraying using herbicides. *Practicing crop rotation. *Mulching -How each method controls weeds	Guided discovery	Stating the dangers of weeds Giving ways of controlling weeds	CRITICAL THINKING *Responding to questions *Taking a decision VALUES *Independence *Self-reliance		P4 Syllabus page 4 Sure Key Pg 71	
	6	THE WORLD OF THINGS	CROP GROWING	Pruning	The learner states the meaning of pruning Identifies the garden tool used for pruning Mentions the advantages of pruning	The learner; Spells the words like pruning	Pruning is the removal of excess branches from a plant. Garden tool used is a secateur ADVANTAGES OF PRUNING *Enables crops to get sunlight. *Reduces on the weight of the plant. *Improves the quality of the yields. REASONS FOR PRUNING *Remove dead or diseased branches which may cause injury *Increase size and quality of fruits.	-Guided discovery -Brain storming	Defining the term pruning Giving the advantages of pruning Giving the reasons for pruning	SELF AWARENESSES *Making choices *Caring for oneself VALUES *Cooperation *Sharing *Care	A chart showing a diagram of a pruner	P4 Syllabus Page 4 Sure Key Page 74	
	7			Spraying	The learner; States the meaning of spraying.	The learner; Reads and spells the new words correctly. Pollution Pests Fertility	-Spraying(meaning) IMPORTANCE OF SPRAYING *Helps to kill pests. *Increase soil fertility. DANGERS OF SPRAYING *Pollutes the environment *Kills living organisms in the soil. -Staking is the providing of support to plants with weak stems. -Examples are tomatoes, passion fruits etc. IMPORTANCE OF STAKING. *It prevents rotting.	-Critical thinking -Group discussion	Defining the term spraying. Giving the importance staking.	EMPATHY *Caring *Guiding others VALUES *Endurance *Appreciating *Honesty	A chart showing examples of crops that are staked.	P.4 Syllabus Page 4 Sure Key book 4 page 75	
6	1	THE WORLD OF	CROP GROWING	Mulching	The learner explains mulching	The learner;	Mulching is the covering of top soil with dry plant materials.	Demonstration	Defining the term mulching	EFFECTIVE COMMUNICATION	A chart showing	P4 syllabus	

		LIVING THING S			-States the examples of mulches -Gives the advantages of mulches -States disadvantages of mulches.	Spells and reads words like dry, grass, mulches correctly.	-Dry plant materials are called mulches. -Examples include: dry grass, dry banana leaves, dry coffee husks. ADVANTAGES *Controls soil erosion by reducing the flow of water. *Mulching improves on soil fertility when the mulches decompose and form humus. DISADVANTAGES *Mulches act as fire hazards *Some mulches grow into weeds	Guided Discovery Explanation as technique	Giving the advantages of mulching. Giving the disadvantages of mulching.	*Audibility *Fluency *Verbal VALUES *Endurance *Concern	g exampl es of mulche s	book 4 Page 4 Sure Key book 4 Page 73 St Bern ard Page 31- 32	
	2			Harvestin g	The learner; Gives the meaning of harvesting. -Identifies signs of crops ready for harvesting	The learner; Spells the word harvesting.	Harvesting is the collection of mature crops from the garden METHODS OF HARVESTING *Uprooting *Handpicking. Tools used: sickle for rice and panga for matooke SIGNS *Leaves turn yellow *Stem dries Grain harden	Guided discovery Explanation	Defining the term harvesting Identifying signs of crops ready for harvesting.	CRITICAL THINKING *Respondi ng to questions *Giving reasons for actions taken	A chart showin g tools used for harvest ing.	P4 sylla bus book 4 Page 4 Sure Key book 4 Page 73	
	3	THE WORL D OF LIVING THING S	CROP GROWIN G	Storage of harveste d crops. entering the	The learner identified places where crops are stored. -State the reasons for	The learner; Reads words like granary, sacks, and rat guards.	-Storing crops: Crops are stored in granaries Examples of crops stored in the granary: maize, millet, beans, groundnuts.	Excusion Guided discovery Explanation	Identifying places where crops are stored Stating reasons for storing crops	PROBLEM SOLVING *Taking a decision *Evaluating facts	-A chart showin g exampl es of	P4 Sylla bus page 4	

				granary to Destroy the crops.	storing crops -Gives the qualities of a good store for storing dry crops		NB: Flour should be packed in dry sacks which are packed on dry wood. *reason: To prevent sacks from absorbing moisture from the floor. QUALITIES OF A GOD STORE *It should be leak proof to prevent water from *Should have rat guards to prevent rats from entering into the granary to destroy stored crops. <u>REASONS WHY FARMERS STORE CROPS.</u> *To reserve seeds for planting in the next season. *To keep food to eat in the dry season.		Giving the qualities of a good store for storing dry crops.	VALUES *Care *Love	crops stored in the granary.	Sure Key Page 79 St Bernard's page 37	
4	THE WORLD OF LIVING THINGS	CROP GROWING	Farm records or Record keeping	The learner explains the term farm records. States example of farm records. Draw diagrams showing farm records. States the importance of keeping records.	The learner reads words like pests, production, harvesting, inventory etc.	-Farm records refers to activities carried out in crop production. -Examples include: Planting records : Production records. Diagram of farm records IMPORTANCE OF KEEPING FARM RECORDS. *Help farmers to plan for the farm. *Help farmers get loans from banks.	-Guided discovery - Explanation -Classroom discussion	Defining the term farm records. Giving the importance keeping farm records.	EFFECTIVE COMMUNICATION *Fluency *Audibility *Confidence LOGICAL REASONING *Making decisions	A chart showing examples of farm records.	P4 Syllabus page 4 Sure key P4 page 80 Shine standards page 70		
5	THE WORLD OF LIVING	CROP GROWING	Crop pests and diseases	The learner -Explains the meaning of crop pests	The learner; Reads the new words correctly for example pests, diseases, signs.	-Pests are organisms which destroy crops -Examples are rats, monkeys, bean weevils	Question and answer	Defining the term crop pests. Giving signs of pest damage.	CRITICAL THINKING *Taking decisions	-A chart showing example	P4 Syllabus page 4		

		THINGS			-Identifies common examples of crop pests and the crops they affect. -Signs of pest damage on crops.		Diagram showing common rat pests. SIGNS OF PEST DAMAGE. *Holes in leaves *Black spots in leaves and fruits. *Yellowing in leaves. EFFECTS. *They reduce crop yields _Control of pests.	Explanation		*Analyzing statements .	e of pests.	Sure key P4 page Shine standards page 68 St Bernard's page 39	
	6	OUR ENVIRONMENT	WEATHER CHANGES AROUND US	Weather	The learner; states the meaning of weather , atmosphere, sky Gives the types of weather States the elements of weather.	The learner; Spells words like weather, atmosphere etc.	Weather: Is the condition of the atmosphere at a given time and place. -Importance of studying weather. -TYPES OF WEATHER *Sunny *Rainy *Cloudy *Windy Humidity ELEMENTS OF WEATHER *Sunshine *Cloud cover *Rainfall *Temperature -Diagrams showing types of weather.	Excursion Guided discovery Observation	Stating the meaning of weather. Giving the types of weather. Stating the elements of weather.	Effective communication *Articulation *Fluency *Verbal VALUES *Love *Care	- A chart showing elements of weather	P4 Syllabus pg 6 Shine standards pg 72 Sure Key Page 87	
7	1	OUR ENVIRONMENT	WEATHER CHANGES AROUND US	Sunshine	The learner; States the importance of sunshine to the environment	The learner; Reads new words like Sunshine recorder, glass sphere etc.	IMPORTANCE OF SUNSHINE *Provides heat from drying clothes. *Provides heat for generating solar energy	Guided discussion	Stating the importance of sunshine to the environment.	CRITICAL THINKING *Responding to questions	A chart showing a sunshine	P4 Syllabus pg 6	

					Gives dangers of too much sunshine Mention ways of managing too much sunshine Identifies the instrument for measuring sunshine		DANGERS OF TOO MUCH SUNSHINE *It leads to drought and famine *Dries water sources WAYS OF MANAGING SUNNY WEATHER. *Wearing hats and sun glasses *Use fans and air conditioners -Sunshine recorder is used to measure sunshine. -Diagram	Explanation	Giving dangers of too much sunshine Identifying the instrument for measuring sunshine.	VALUES *Cooperation *Care	recorder	Shine standard pg79 Sure Key	
2				CLOUDS	The learner gives the meaning of clouds. Mention the types of clouds The importance of clouds. Gives the effects of cloud cover.	-The learner spells the words clouds, nimbus etc.	Meaning of clouds. TYPES OF CLOUDS *Cirrus *Stratus *Nimbus * Diagrams of differed clouds. IMPORTANCE. *They protect us from direct sunlight. EFFECTS *Cools the environment *Reduces evaporation. DANGERS *They cause heavy storms which destroy people.	Group discussion Brain storming Explanation	Mentioning the types of clouds. Stating the importance of clouds. Giving the effects of cloud cover.	EFFECTIVE COMMUNICATION *Fluency *Audibility LOGICAL REASONING *Making decisions	A chart showing the types of clouds.	Syllabus pg 6 Shine standard pg73 Sure Key Book 4 Page 4	
3				Wind and atmospheric pressure	The learner - States the meaning and importance of wind - Stating the instruments that deal with wind.	The learner Reads words like wind, temperature , atmospheric pressure	Wind is moving air Wind vane measures the direction of wind Windsock measures the strength of wind. AN anemometer measures the speed of wind. Wind is used for winnowing Wind spreads diseases. -Diagrams Atmospheric pressure: It is measured by a barometer. Its measured in millibars.	Guided discovery Explanation	Defining the term Wind Stating the instrument used. Stating the Importance of wind to a farmer.	EFFECTIVE COMMUNICATION *Critical thinking *Responding to questions directly VALUES *Love *Care	A chart showing windsock, wind vane etc.	Syllabus pg 6 Shine standard pg83 Sure Key Book 4	

	4			Rainfall	The learner states the meaning of rainfall -Gives the importance of rainfall -Identifies the effects of rainfall -States the instrument used to measure rainfall	The learner spells , reads and uses key words related to rainfall e.g. rain gauge, evaporation etc.	-Diagram showing a barometer. Rainfall (Rainfall) IMPORTANCE *Supplies water to water sources *Used to irrigate crops. DANGERS *Causes floods *Destroys infrastructures. -Rain gauge: This is an instrument used to measure rainfall -Diagram showing a rain gauge WAYS OF MANAGING RAINFALL *Wearing gumboots. *Use of umbrellas	-Excursion Guided discovery Explanation	Giving the importance of rainfall Identifying the effects of rainfall	EFFECTIVE COMMUNICATION *Audibility *Fluency *Confidence VALUES *Endurance *Responsibility	A chart showing a diagram of a rain gauge	P4 Syllabus page 4 Shine standard pg75 Sure Key Book 4 Page 108	
	5			Water Cycle	The learner Describes the water cycle Mentions the sources of water Mentions the processes involved in water cycle.	The learner Reads, spells and uses key words related to water cycle e.g. evaporation	Water Cycle Diagram describing a water cycle Steps taken Processes involved in the water cycle *Evaporation *Condensation WATER SOURCES. 1. Natural sources e.g. lake, rivers, swamps etc. 2. Artificial sources e.g. water pumps , dams, wells -Humidity	Explanation Guided discussion Guided discovery.	Describing the water cycle. Mentioning the sources of water.	EMPATHY *Caring *Guiding others VALUES *Appreciating *Guiding others	A chart describing a water cycle	P4 Syllabus page 4 Shine standard pg75 Sure Key Book 4 Page 108	
	6	HUMAN HEALTH	PERSONAL HYGIENE	Personal hygiene	-The learner states the meaning of personal hygiene.	The learner reads words like hygiene, bath, scrub etc.	Personal hygiene: This is the way of keeping our body, clothing and beddings clean.	Guided discussion Explanation	Stating the meaning of personal hygiene Stating the importance of	EFFECTIVE COMMUNICATION *Articulation	Work cards	P4 Syllabus page 6	

					-States the importance of keeping personal hygiene. Mentions the body parts which should be kept clean. Naming things that should be kept clean.		PARTS OF THE BODY THAT SHOULD BE KEPT CLEAN *Hands *Skins *Ears *Teeth THINGS THAT SHOULD BE KEPT CLEAN *Beddings *Clothing *Toothbrush IMPORTANCE OF HYGIENE *To remove dirt *To remove germs *To remove bad smell. ACTIVITIES DONE TO KEEP OUR BODIES CLEAN *Bathing *Regular washing of hands with clean water and soap.	Guided discovery	keeping personal hygiene Mentioning the body parts which should be kept clean	*Verbal *Fluency CRITICAL THINKING *Responding to questions. VALUES *Love *Appreciation.		St Bernard's page 6 Sure Key Book 4 Page 109	
8	1	HUMAN HEALTH	PERSONAL HYGIENE	Materials used for keeping our bodies clean and how	-The learner states the materials used for cleaning our bodies.	- The learner Spells words like toothbrush , water, sponge, etc. correctly	MATERIALS USED TO CLEAN OUR BODIES *Tooth brush *Tooth brush *Razorblade *Soap *Water IMPORTANCE OF USING TOOTHPASTE *Prevents bad breath *Prevent tooth decay. STEPS TAKEN WHILE BRUSHING. *Wet the toothbrush and apply small amount of toothpaste *Brush your teeth upwards and downwards. *Brush your tongue to remove food remain *Rise you're your mouth and toothbrush thoroughly well with water.	Guided discovery Observation Explanation	Stating the materials used for cleaning our bodies.	EFFECTIVE COMMUNICATION *Articulation *Audibility Fluency VALUES *Care *Appreciation	Real objects like toothbrush	P4 Syllabus page 6 Shine standard pg87 Sure Key Book 4	

	2			Materials used for keeping our bodies clean.	The learner identifies materials used for keeping our bodies clean. -Draws diagrams for those materials. -States the importance of the materials.	The learner Reads words and sentences related to personal hygiene.	Materials used to keep our bodies clean: *Soap: Used for bathing to remove dirt. *Water: Used when washing hands. *Basin: Used from keeping water for bathing. *Comb: For combing our hair. *Dental floss: Used for removing plague between the teeth. Etc. Diagrams of the materials used for cleaning the body.	- Demonstration - Observation - Explanation	Identifying the materials used to keep our bodies clean.	EFFECTIVE COMMUNICATION *Articulation *Audibility Fluency VALUES *Care *Love	Chart showing materials used for cleaning our bodies.	Sure Key Book 4 St Bernard's page 66	
	3			Keeping clothing and bedding clean	The learner States ways of keeping our clothes and beddings clean.	The learner Reads and writes sentences correctly.	BEDDINGS Examples: Bed sheets, Blankets, mattresses, pillows. HOW TO KEEP BEDDINGS CLEAN. *By washing them with clean water and soap. *Ironing after washing REASONS *To kill parasite. -We wash beddings to remove dirt. - Examples of vectors that are found in beddings: Lice, bedbugs, fleas.	Guided discussion Question and answers as a technique.	Stating ways of keeping our beddings and clothes clean			P4 Syllabus page 4 Shine standard	

4	HUMAN HEALTH	PERSONAL HYGIENE	Ways of keeping our body clean	-The learner states the ways of keeping our clothes clean -Mention things we use to clean our clothes. -State the importance of keeping our clothes clean. -State the vectors that breed in our clothes.	-The learner spells, reads and uses differed words in sentence correctly e.g. vectors, beddings, clothes.	WAYS OF KEEPING OUR CLOTHES CLEAN. *Washing them with clean water and soap. *Ironing them after washing. * Spraying them with disinfectants. -Things we use to clean our clothes are: soap, clean water and flat iron. IMPORTANCE OF CLEANING OUR CLOTHES *Helps to remove dirt *Helps to keep away from bad smell. -Vectors include bed bugs, mites, fleas, lice.	Think Pair Share Guided discussion .	Stating ways of keeping our clothes clean. Mentioning things we use to clean our clothes Stating the importance of keeping our clothes clean.	-Coping up with stress -Accepting advice -Talking about personal advice EFFECTIVE COMMUNICATION *Articulation *Fluency	Work cards Real objects e.g. soap	P4 Syllabus page 7 Shine standard page 90	
---	--------------	------------------	--------------------------------	---	---	--	---	---	---	--	--	--

	5			Dangers of poor personal hygiene Diseases spread through poor personal hygiene.	States the dangers of personal hygiene States the diseases spread due to poor personal hygiene		DANGERS OF PERSONAL HYGIENE *Can lead to bad body smell *Leads to easy spread of germs. *Leads to tooth decay *Leads to easy spread of diarrheal diseases DISEASES INCLUDE *Tooth decay cause by bacteria *Scabies caused by itch mite *Dysentery caused by bacteria *Diarrhea caused by bacteria	DO		VALUES *Care *Responsibility		P4 Syllabus page 7 Shine standard book 4
