

UGANDA PRIMARY EXAMINATIONS COUNCIL

PRE PRIMARY LEAVING MOCK SET

2026

MATHEMATICS

Total Marks scored	
--------------------------	--

Time Allowed: 2 hours 30 minutes

Random No.						Personal No.		

Candidate's Name:

Candidate's Signature:

District ID No.

--	--	--	--

Read the following instructions carefully:

1. Do not write your **school** or **district name** anywhere on this paper.
2. This paper has two Sections: **A** and **B**. Section **A** has **20** questions and Section **B** has **12** questions. The paper has **15 printed** pages.
3. Answer **all** questions. **All** working for both Sections **A** and **B** must be shown in the spaces provided.
4. **All** working **must** be done using a **blue** or **black** ball point pen or ink. Any work done in pencil **other** than graphs and diagrams will **not** be marked.
5. No **Calculators** are allowed in the examination room.
6. Unnecessary **changes** in your work and handwriting that cannot be easily read may lead to **loss of marks**.
7. Do not fill anything in the table indicated **"FOR EXAMINERS' USE ONLY"** and in the boxes inside the question paper.

FOR EXAMINERS' USE ONLY		
QN NO.	MARKS	EXR'S NO.
1 – 5		
6 – 10		
11 – 15		
16 – 20		
21 – 22		
23 – 24		
25 – 26		
27 – 28		
29 – 30		
31 – 32		
TOTAL		

SECTION A: 40 MARKS

Answer **all** the questions in this section.
Questions **1** to **20** carry **two** marks each.

1. Workout: $86 - 24$

2. Find the number that has been expressed to give:
3 thousands + 5tens + 8 ones

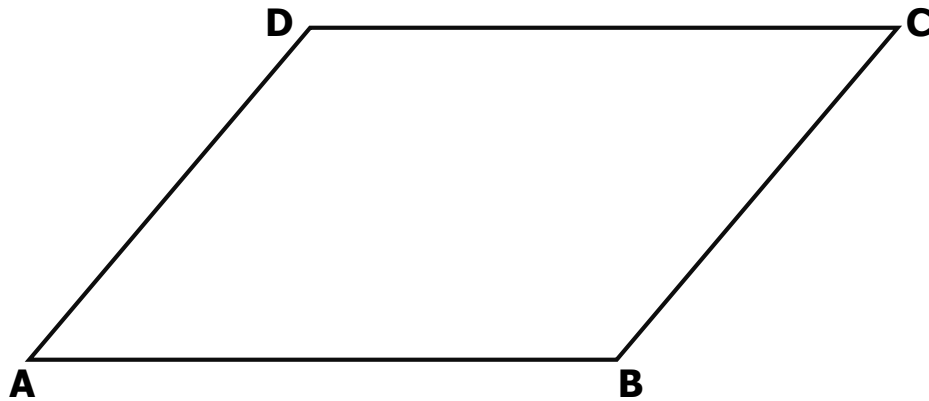

3. Given that $F = \{a, b, c, d, e, f\}$, $F \cup G = \{a, b, c, d, e, f, g, h\}$ and $F \cap G = \{a, b, c\}$. Find $n(G)$.

4. A class used $\frac{2}{5}$ sheets of reams of paper for test and $\frac{1}{4}$ of the remainder for home work. Find the fraction of the ream used for home work.

5. Find the value of m in the sequence:
144, 100, 64, $9m$.

6. Using a ruler, a pencil and a pair of compasses only, bisect angle **DAB** in the figure below.

7. A square garden has a perimeter of 48 cm. One of its sides measure $(k+5)$ cm. Find the value of K.
8. Amoni and his twin brother harvested a total of 80 bags of beans this season. Express Amoni's equal share of the harvest in Roman numerals.
9. A teacher started marking an exam at 13 30 hours and ended at 16 05 hours. Find the time he spent marking.

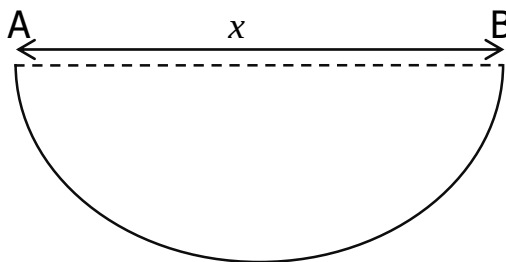

10. Find the fractional equivalent of 2.666...

11. Without dividing, show that 1484 is exactly divisible by 7.

12. In a basket, there are 12 red pens, 2 blue pens and 4 black pens. Find the probability of picking a black pen at random from the basket.

13. The length of the arc AB below is 99cm. Study and use it to find the value of x.
(use $\pi = \frac{22}{7}$)

14. Simplify: $\frac{1}{2}$ of $30 + 40 \div 2$.

15. A techno phone that costs US \$400 was sold at Ksh 40,000. Find the exchange rate between US dollars and Uganda shillings if: Ksh 1 costs Ugsh 35.

16. Solve the inequality $2 \leq 4 - x$

17. Amito ended her holiday studies that took 24 days on Friday. Find the day of the week the program started.

18. Workout: 2×10^{-4} using a number line.

19. Okello makes 8 strides at the time of crossing a road which is 5.6m wide. Find the length of each stride in centimetres.

20. A polygon has 12 right angles. Find the number of sides of the polygon.

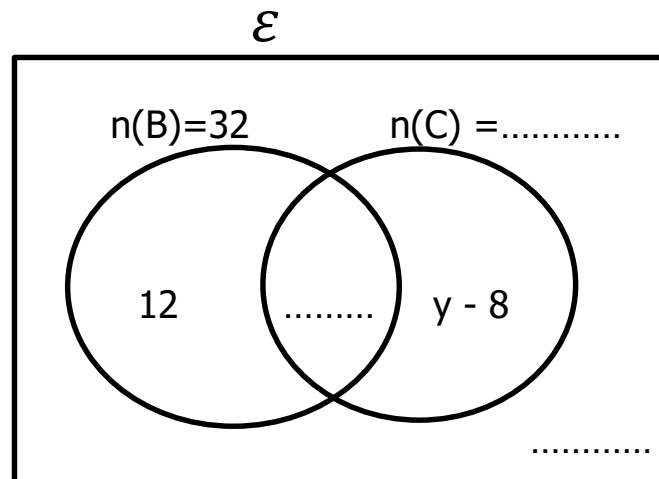

SECTION B: 60 MARKS

Answer **all** the questions in this section.

Marks for each question are indicated in the brackets.

- 21.** On a farm, 32 farmers grow beans (B), 12 farmers grow beans only, ($y - 8$) farmers grow cassava but not beans while 21 farmers do not grow cassava.

(a) Use the given information to complete the Venn diagram below
(03 marks)

- (b) Find the value of y if those who grow one type of crop is twice the number of those who do not grow any of the two crops.
(02 marks)

- 22.** A company ordered for 250 sewing machines from a manufacturer. Of these 24% were faulty, 75% of the faulty machines lacked needles.

(a) Calculate the number of faulty machines that had needles.

(03 marks)

(b) Find the ratio of the machines that are faulty without needles to machines that are not faulty.

(02 marks)

- 23.** Amuge carried sh 20,000 to a shop and after paying for the following items below, a change of sh 8,400 was given.

3 litres of milk at sh 1,200 per litre

$1\frac{1}{2}$ kg of beans at sh 4,000 per kg.

500g of royco beef.

Determine the cost of each kg of royco beef.

(06 marks)

- 24.** Pupils did a test and their scores were recorded in the table below. Given that the mean score was 61. Study and use it to answer questions that follow.

Marks (%)	Tallies	Total marks
60	HHH I	
.....	II	
.....	III	135
80	IIII	320

Complete the table.

(04 marks)

- 25.** In the mathematics workshop, bottled water was bought for 240 teachers. On average, every teacher received 3 bottles. Water is sold in crates of 12 bottles at sh 5,000 per crate. Find the total amount spent on water.

(04 marks)

26. A carpenter cuts semi-circular boards of radius 7cm from a rectangular board with an area of 1568cm^2 and a length of 56cm.

- (a) Calculate the number of semi-circular boards that the carpenter can cut from the rectangular board. (use $\pi = \frac{22}{7}$)
(04 marks)

- (b) Find the total area of the circular board formed if the carpenter joins each pair of semi-circular boards to form a circular board
(02 marks)

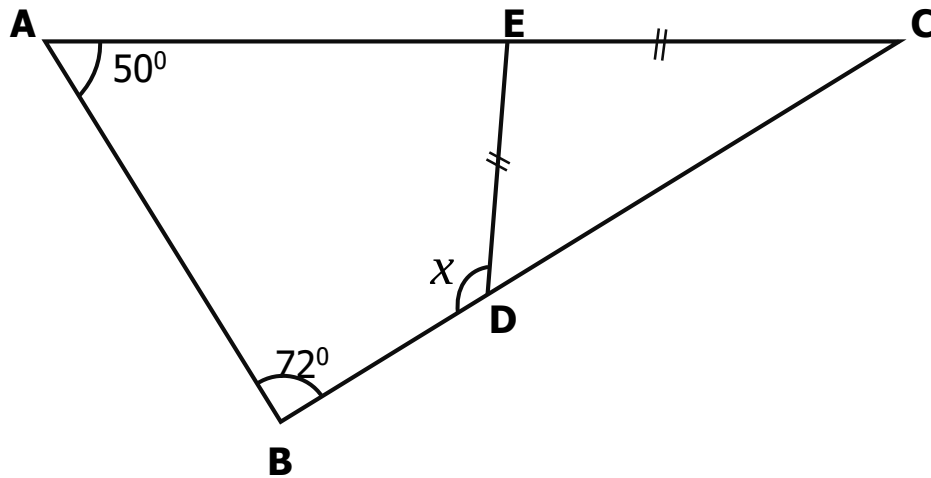

27. Two bells **A** and **B** were rung together for the first time at 7:30 a.m and for the third time at 11:30 a.m. Bells **A** rung 8 times and **B** 6 times during the period after 7:30 a.m.

(a) Find the intervals in minutes at which bells **A** and **B** had been ring. *(03 marks)*

(b) Calculate the time when the two bells ring together for the second time? *(02 marks)*

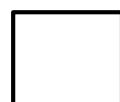

- 28.** In the figure below lines EC and ED are equal. Angle CAB = 50° , angle ABC = 72° and triangle ECD is an Isosceles triangle as shown below.

Study and use the figure to answer the questions that follow.

- (a) Find the value of x (03 marks)

- (b) Calculate the size of angle AED. (02 marks)

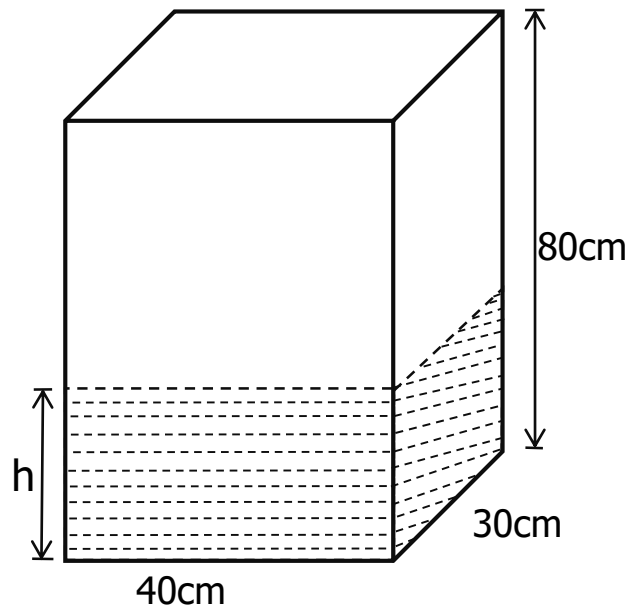

- 29.** In a market, the cost of a mango is two thirds the cost of a pawpaw. The cost of a pineapple is sh 2,000 more than the cost of mango. Otyeno paid a total of sh 6,800 for two pineapples and a pawpaw, find the cost of a pineapple. *(04 marks)*

- 30.** Three farmers; Amos, John and Peter harvested maize and packed it in bags of 100kg each. The ratio of bags of maize harvested by the farmers was 2:3:5 respectively. The mean number of bags harvested by the three farmers was 60 bags. If each kilogram of maize was sold at sh 800. Calculate how much more money Amos and Peter altogether got than John. *(06 marks)*

- 31.** The rectangular tank below contains 72 litres full of fuel. Use it to answer questions that follow.

- (a) Find the value of h . (02 marks)

- (b) Calculate the amount of fuel needed to fill the tank. (03 marks)

- 32.** Using a ruler, a pencil and a pair of compasses only. Construct a rhombus TDMS in which $DM=6\text{cm}$ and angle $SMD=105^\circ$.
(04 mark)

(b) Measure the diagonal TM.

(01 marks)
