TURN OVER

SECTION A (40Marks)

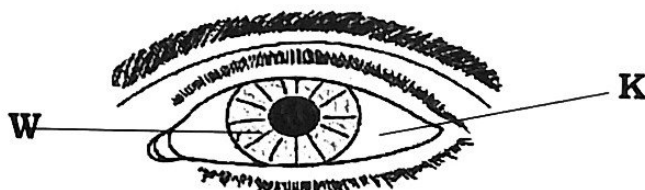

1. Identify any **one** natural source of sound.

2. Name any **one** vector that spreads germs without biting.

3. State any **one** method that can be used to preserve skin from animals.

4. Give any **one** way a school cook can prevent contamination of food in the kitchen.

The diagram below shows the front view of the human eye. Use it to answer questions 5 and 6.

5. Name the part marked **K**.

6. State the function of the part marked **W** on the human eye.

7. Name the process in the stomach that leads to formation of Chyme.

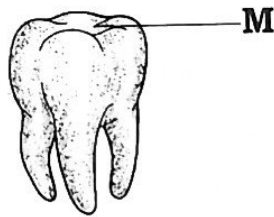

8. Write any **one** activity that promotes healthy lifestyle.

9. Name any **one** element of weather that causes natural disasters.

10. State **one** way in which breathing of a toad is similar to that of a snake.

11. Give a reason why the earth is called a magnet.
12. Give any **one** reason why farmers dock their female sheep.
13. Name any **one** material transported by blood capillaries in the human body.
14. Give any **one** reason why lungs are able to carry out gaseous exchange in the human body.
15. State any **one** way in which yeast is useful during baking.
16. Name the food value that absorbs water from the stool to make it soft in order to prevent constipation in human.

The diagram below shows the structure of human tooth. Use it to answer questions 17 and 18.

17. Name the type of tooth shown in the diagram above.
18. Give the function of the part marked **M**.
19. How does wringing promote quick drying of a cloth after washing?

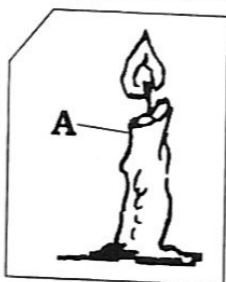

20. State any **one** way of improving on the efficiency of a wheel barrow as a simple machine.

21. Name the group of non-flowering plants that reproduce by means of seeds.

22. Give **one** way in which moulting is important to insects.

23. Name the water borne disease that causes internal bleeding in the body.

The diagram below is a burning candle. Use it to answer questions 24 and 25.

24. What type of change is taking place at point marked **A**?

25. Give a reason for your answer in (24) above.

26. How does high temperature affect the rate of transpiration?

27. Write down any **one** example of a beverage perennial crop.

28. Mention any **one** disease that can be worsened due to tobacco smoking.

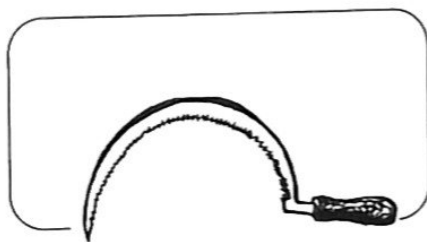

29. State any **one** way in which alcohol is useful in hospitals.

30. In which **one** way are perches useful in a poultry house?

31. Give any **one** disadvantage of decomposition in the environment.

32. Name the body system commonly affected by candidiasis.

The diagram below shows garden tools

33. Give any **one** way in which the garden tool above is important to crop farmers.

34. Give any **one** disorder of the human digestive system.

35. Give **one** reason why heat transfer by conduction is possible in solids.

36. State any **one** way of controlling dust in the classroom.

The diagram below shows a tuber crop. Use it to answer questions 37 and 38.

37. Name the tube crop shown above.

38. State any **one** way in which a farmer processes the tuber crop shown in the diagram above.

39. State any **one** way in which people can re-use polythene bags at home.

40. Why are the youth more vulnerable to contracting HIV/AIDS?

SECTION B: (60marks)

Questions 41 to 51 carry four marks each.

41. a) Name the weather instrument used to measure humidity.

b) Mention any **two** effects of humidity in an area.

i)

ii)

c) State any **one** way in which people use gumboots to manage rainy weather.

42. a) Name the type of food worker bees use to feed the queen bee.

b) State the reason why a worker bee dies soon after stinging a person.

c) Mention any **two** activities a bee keeper can do to prevent honey bees from swarming.

i)

ii)

43. **The diagram below shows equipment used in feeding of babies. Use it to answer the questions that follow.**

a) Name the item in the diagram above.

b) State any **two** conditions under which the kind of feeding may be used.

i)

ii)

c) State any **one** disadvantage of using such equipments to the family.

44. a) Apart from Arachnids, write down any **two** other group of arthropods.

i) _____

ii) _____

b) State any **one** characteristic of Arachnids.

c) Give any **one** example of an arachnid which is a parasite to cattle.

45. **The table below shows the parts of the flower and the function of each. Complete the table correctly.**

<u>Part</u>	<u>Function</u>
Sepal	_____
_____	Attracts pollinators
Stigma	_____
_____	Produces pollen grains

46. a) Name the method used to separate;

i) beans from stones.

ii) clean water and muddy water

b) State any **two** effects of heat on liquids.

i) _____

ii) _____

47. A primary five pupil wanted to demonstrate the weight of the stone in water and air. He did the activities as shown

i) In spring balance 1: The stone was dipped in water.

ii) In spring balance 2: The stone was swinging in Air.

After he observed to find the actual weight of the stone from the spring balance.

a) Given the two media, water and air, which of the two made the stone to weigh less?

b) Give any **one** reason for your answer in (a) above.

c) State any **one** factor that affected the weight of the stone in the media.

d) Name the units in which a primary five pupil measured the weight of the stone.

48. a) Under which group of simple machines do the following belong

i) A Lamp

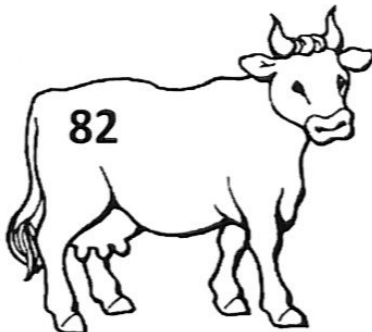

ii) A car steering

b) State any **two** ways in which the efficiency of machine can be increased.

i)

ii)

49. **The diagram below shows one of the ways a farmer identifies the animals in a farm;**

a) Name the cattle management practice on a farm shown above.

b) Give any **two** reasons why cattle farmers carryout the practice in 49 (a) above.

i) _____

ii) _____

c) State **one** danger that farmers face in the above cattle management practice.

50. a) Name the disease spread to humans by:

i) Infected dog

ii) Louse

b) How is the Larva stage of a housefly useful in the pit latrine?

c) State any **one** way in which the breeding of houseflies can be controlled.

51. a) Name the biological change in plants that;

i) Reduces transpiration:

ii) Requires oxygen to take place:

b) State any **two** ways of managing biological body changes in human beings.

i) _____

ii) _____

52. a) Mention any **two** poor health habits that can affect one's health.

i) _____

ii) _____

b) Give any **two** ways you can keep your body healthy.

i) _____

ii) _____
53. a) Name the component of air that occupies the greatest percentage in the atmosphere.

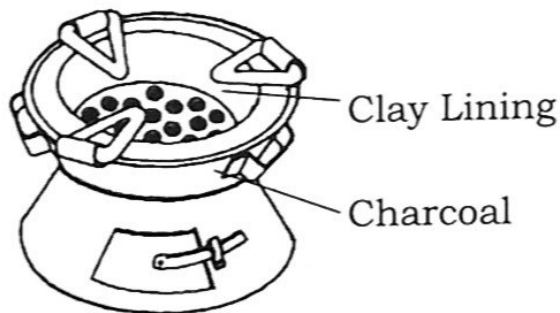

b) Give any **one** way in which air is useful to people.

c) State any **two** human activities that degrade the quality of air in the environment.

i) _____

ii) _____

54. **A diagram below shows an energy saving stove. Use it and answer questions.**

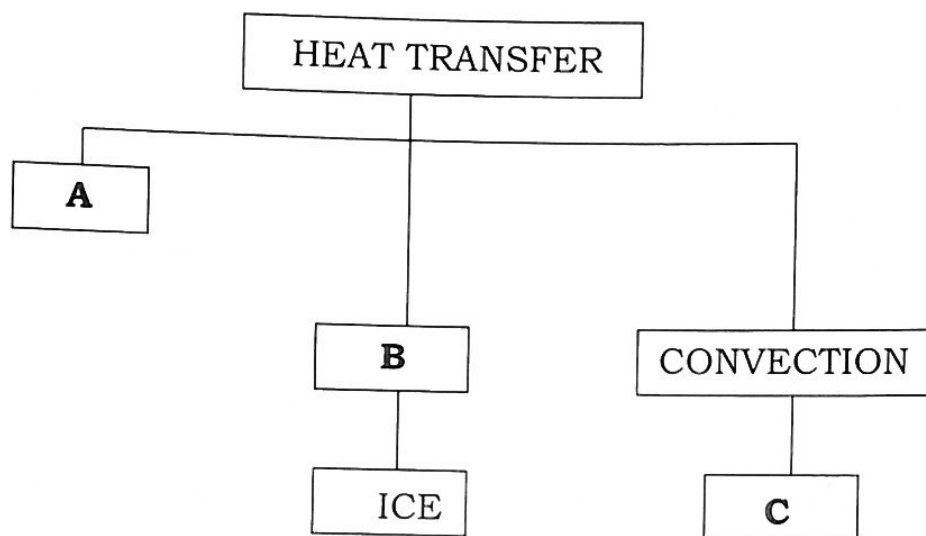

a) Mention the form of energy stored in charcoal.

b) Why does energy saving stove use less charcoal.

c) Apart from fire wood and charcoal, give any **one** example of wood fuel.

d) State the energy change that takes place when wood burns to Ash.

55. The table below shows a method of heat transfer. Study and use it to answer the questions that follow.

- a) Mention the methods of heat transfer marked **A** and **B**.

A _____

B _____

- b) Give any **one** state of matter that can be put at **C**.

- c) State any **one** way in which the method of heat transfer at **B** is important to people.
