.....

SECTION B

(Questions 41 to 55 carry four marks each)

41. Identify the two types of bees found in the bee hive.

i)ii.....

(b)Mention any two factors that lead to swarming in bees.

i.....

ii.....

42. The table below shows the body organs and the digestive juice.
Complete it correctly.

	Body organ	Digestive juice
(i)	Stomach	
(ii)		Salivary juice
(iii)	Liver	
(iv)		Pancreatic juice

43. a)Which diarrhoeal disease involves the passing out of watery stools with blood?

.....

(b) Apart from the diarrhoeal disease mentioned in (a) above, mention any other two diarrhoeal diseases you know.

i).....

ii).....

c) Suggest any one measure taken to control diarrhoeal diseases in the community.

.....

44. The seeds were placed in four test tubes. The findings were recorded in the table below. Study it carefully and use it to answer the questions that follow.

Test tube	A	B	C	D
Conditions				
Water	X	✓	✓	✓
Oxygen	✓	X	✓	✓
Warmth	✓	✓	✓	X

✓ Condition present

X Condition absent

(a). Identify the two conditions which were present in test tube B.

i).....ii).....

(b). Give one reason why the seeds in test tube D did not germinate.

.....

(c). State what happened to seeds in test tube C.

.....

45. The diagram below shows a food facility. Study and use it to answer the questions that follow.

a. Name the farm storage facility shown above.

.....

b. Give the importance of structure marked N.

.....i

c. State any two food crops stored in the storage facility above.

.....

46. (a). What is the body's ability to resist against disease?

.....

(b). Write down any two ways of introducing vaccines in the body.

i

ii

(c). Where does polio vaccine administered?

.....
