

PRIMARY SCHOOL
P.7 CONTINUOUS ASSESSMENT TEST XII
TERM III 2025
INTEGRATED SCIENCE
Time Allowed: 2 hours 15 minutes

Random No.						Personal No.		

Candidate's Name:

Candidate's Signature:

School ID No:

Read the following instructions carefully:

1. Do not write your **school** or **district name** on the paper.
2. This paper has two sections: **A** and **B**. Section **A** has **40** questions and section **B** has **15** questions. The paper has **16** printed pages.
3. Answer **all** questions. **All** working for both sections **A** and **B** must be shown in the spaces provided.
4. **All** answers **must** be written using a **blue** or **black** ball point pen or ink. Any work written in pencil will **not** be marked.
5. Unnecessary **changes** in your work and handwriting that cannot be read easily may lead to **loss of marks**.
6. Do not fill anything in the table indicated: **"For Examiners' use only"** and boxes inside the question paper.

FOR EXAMINERS' USE ONLY

SECTION A: 40 MARKS

Answer **all** questions in this section
Questions **1** to **40** carry **one mark** each.

1. Name the basic unit for measuring mass.
.....
2. State the percentage of nitrogen gas in the atmosphere.
.....
3. Apart from using more energy, name **one** other disadvantage of friction.
.....
4. Give any **one** evidence to show that convection in gases is upwards rather than sideways.
.....
5. Name **one** example of a root tuber crop which grows from stem cuttings.
.....

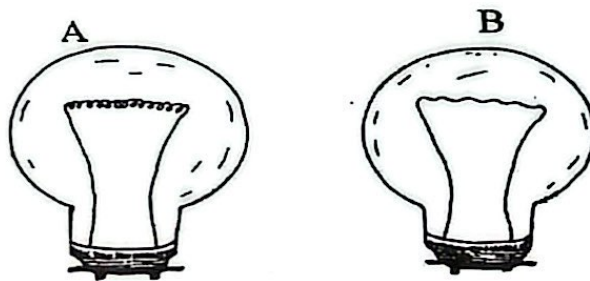

The diagram below shows an leaf. Use it to answer question **6**.

6. State the reason why the above leaf is regarded as a compound leaf.
.....
7. Mention **one** PHC activity which promotes maternal and child care.
.....
8. State any **one** reason for covering the decaying matter in a compost pile.
.....

9. Give the reason why a person suffering from malaria develops anaemia.
.....
10. State the change in state of matter which takes place when water changes to ice.
.....
11. Name the organ in humans where gaseous exchange takes place.
.....
12. State the way in which production of biogas is different from that of solar electricity.
.....
.....
13. Give any **one** first aid you would give to a person who is bleeding from a deep cut on the leg.
.....

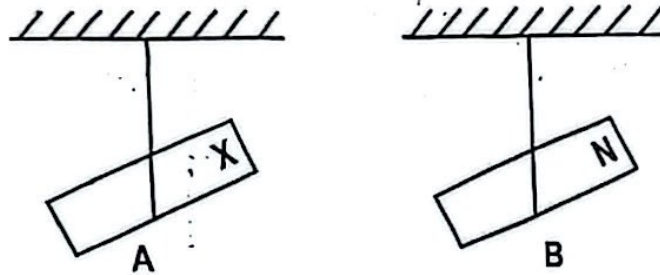

The diagram below shows two electric bulbs. Use it to answer questions **15** and **16**.

14. Identify the electric bulb which gives off more light.
.....
15. State the energy change which takes place in a working electric bulb.
.....

16. Give a reason why plants transpire more on a hot day than a cold day.
.....
17. State **one** way in which conifers are different from other non flowering plants.
.....
18. Name any **one** respiratory disease worsened by tobacco smoking.
.....
19. Name the type of germination which most dicotyledonous plants undergo.
.....
20. Identify **one** common characteristic which enables a tadpole and a fish to be in the same habitat.
.....
21. Apart from getting medical treatment, give any **one** other piece of advice you can give to your friend suffering from Influenza.
.....
22. Give any **one** reason why it is dangerous to use a candle to light up a closed bedroom at night.
.....
23. Name the component of a food chain which gets energy from the sun directly.
.....
24. State the reason why a plastic pen rubbed on hair attracts small pieces of paper.
.....
.....

The diagram below shows two magnets **A** and **B** hanging freely and they moved away from each other. Use it to answer questions **25** and **26**.

25. Name the pole of magnet **A** labeled **X**.
.....
26. Identify the property of magnets shown by the two magnets above.
.....
27. Give any **one** way in which rain can be a disadvantage to a crop farmer.
.....
28. Wasswa shouted loudly in a big room and he heard another similar sound of his voice. Give the name of the similar sound he heard.
.....
29. Give the meaning of the term **self pollination**.
.....
.....

30. Name the type of blood vessels which have structures in their lumen that open in one direction.

.....

31. Give a reason why a rack should be constructed with stands at least one metre above the ground.

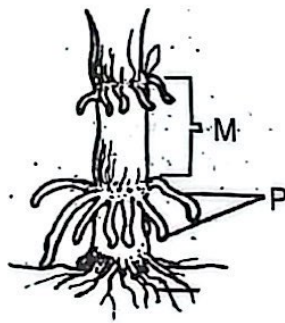

.....

32. State the reason why water is not used to put out petrol fire.

.....

.....

The diagram below shows a part of a maize plant. Use it to answer questions **33** and **34**.

33. Name the part labeled **M**.

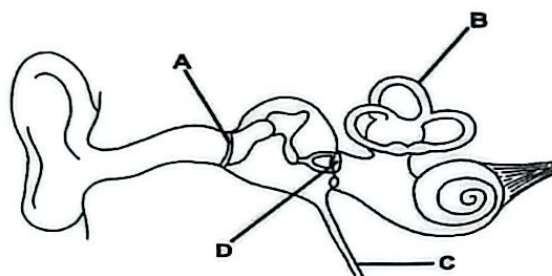

.....

34. Give the function of the false roots marked **P** to the maize plant.

.....

.....

The diagram below shows the human ear. Study and use it to answer questions **35** and **36**.

35. Name the part labeled **C**.

.....

36. State the importance of part labeled **A** in the process of hearing.

.....

37. Give a reason why children should not play near beehives.

.....

38. Mention any **one** health problem caused by stealing as an anti social behaviour.

.....

39. Give the importance of bacteria found in the root nodules of leguminous plants to the soil.

.....

40. State the reason why displacement method is used to find the volume of a stone.

.....

SECTION B: 60 MARKS

Answer **all** questions in this section
Questions **41** to **55** carry four marks each.

41. a) State a reason why it would be dangerous for a boy to try to remove an adult man who is near drowning from water.

.....

- b) Identify any **one** thing the boy can do to save the adult man.

.....

- c) Mention any **two** ways of preventing near drowning.

i)

ii)

42. a). State the meaning of the term **docking** as carried out on a sheep farm.

.....

.....

- b) Give any **two** reasons farmers give for docking sheep.

i)

ii)

- c) Apart from docking, mention **one** other activity on a sheep farm .

.....

43. a) Mention any **two** examples of scratching birds kept at home.

i)

ii)

b) State any **two** characteristics common to scratching birds.

i)

ii)

44. a) Give any **one** importance of air found in the soil.

.....

b) You are provided with the following items: clear glass, water and a lump of dry soil.

Describe how you can use the items to make an experiment to show that dry soil contains air. *(03 marks)*

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

45 a) Write down any **two** causes of air pollution.

i)

ii)

b) Give any **two** reasons why air pollution is dangerous to the environment.

i)

ii)

46. The table below shows common vectors in part **A** and the diseases they spread in part **B**. Study and complete it correctly.

Part A: Vectors	Part B: Diseases they spread
Dog	
.....	Plague
Tsetse fly	
.....	Scabies

47. a) Name any **one** example of each of the following groups of diseases associated with water.

i) Water cleaned diseases

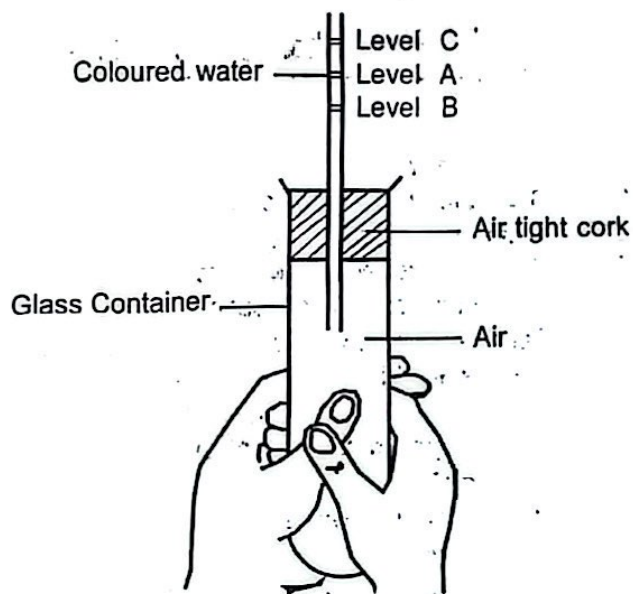

ii) Water contact diseases.....

b) Mention any **two** ways of preventing the spread of such diseases.

i)

ii)

48. Laura, a primary five class pupil rubbed her hands hard for sometime, then immediately held a thin walled glass container as shown in the diagram below. The level of the coloured water in the small tube fell from level **A** to level **B** and then rose to level **C**. Study and use it to answer the questions that follow.

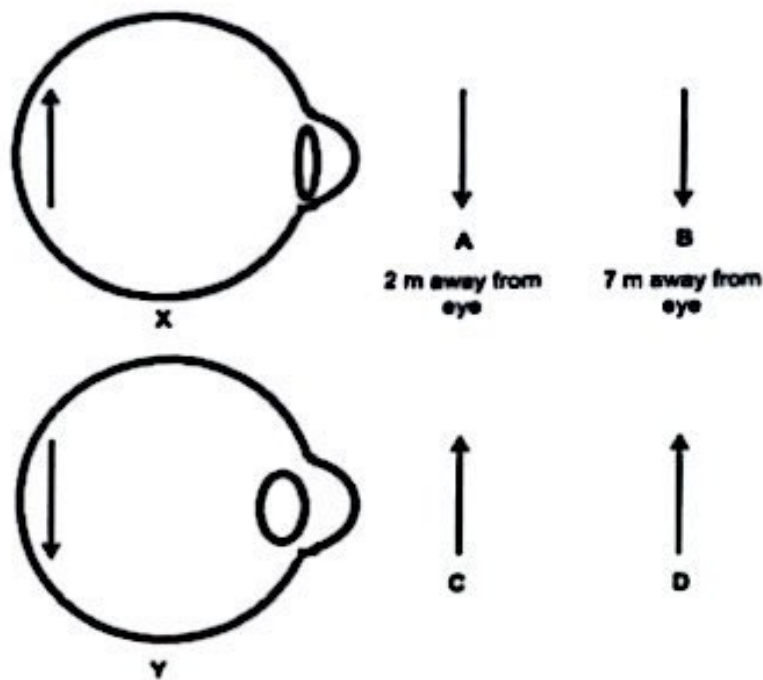

- a) State the aim of her experiment.
-
- b) Name the form of energy produced by the action of rubbing the hands.
-
- c) State the reason why the level of coloured water;
- (i) First fell from level **A** to level **B**.
-
- (ii) Finally rose to level **C**.
-

- 49 a) Name any **two** components of the urinary system.
- i)
- ii)
- b) Give any **two** ways of promoting the proper functioning of the urinary system.
- i)
- ii)

- 50 A farmer used a garden for planting maize only for three consecutive planting seasons. During the harvest in the third season, he noticed a drop in the maize yields.
- a) Give a reason for the drop in the maize yields.
-
- b) State any **two** ways in which the farmer can improve his maize yields in the same garden without using fertilizers.
- (i)
- (ii)
- c) Apart from the above, give **one** other farming practice which can result into a drop in the yield of crops.
-

51. The diagram below shows two eyes (X and Y) focused on objects (represented by arrows) at different distances from the eye. Objects A and C were 2 metres away from the eye. Objects B and D were 7 metres away from the eye.

- Identify the object whose image is formed in;
 - Eye X
 - Eye Y.....
- Using the diagram above, show with the use of arrows how the image in eye Y is formed.
- State the principle on which the human eye works.

.....

.....

52. a) State any **two** ways in which plants with weak stems climb others.

i).....

ii).....

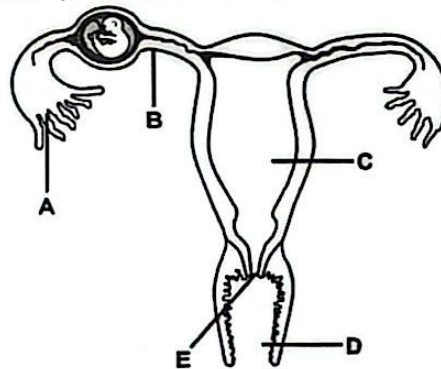

b) Identify any **two** functions of stems to plants.

i)

ii)

53. The diagram below shows the female reproductive system. Study and use it to answer the questions that follow.

a) Name the part labeled **C**.

.....

b) Name the disorder of the female reproductive system shown in the diagram above.

.....

c) State any **one** function of the following parts in reproduction.

(i) **E**

(ii) **D**

54. The diagram below shows common crop growing practices in the garden. Study and use it to answer the questions that follow.

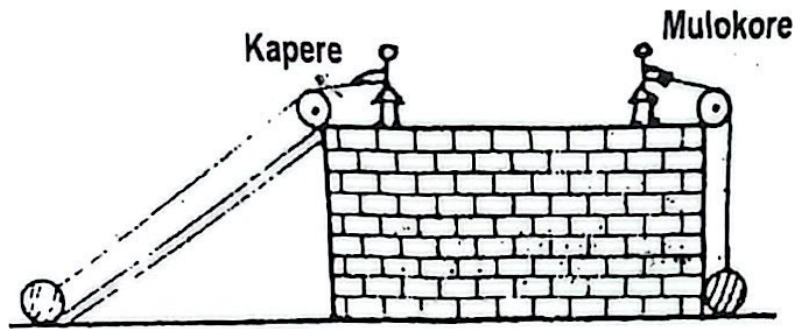

K

L

- a) Name the crop growing practice shown in L.
-
- b) Mention any **two** reasons why farmers carry out the crop growing practice shown in K.
- (i)
- (ii)
- c) Apart from the way shown in the diagram, state **one** other way of carrying out the crop growing practice shown in K.
-

55. a) The diagram below shows two girls, Kapere and Mulokore pulling jerrycans of equal weights up a wall.

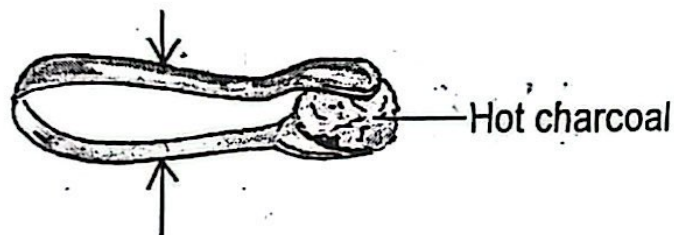

- i) Identify the girl who used less effort to pull the jerrycan.

.....

- ii) Give a reason for your answer in (a) above.

.....

- b) The diagram below shows a simple machine used for picking hot charcoal at home.

- i) Indicate with letter **E** the position of the effort.

- ii) Name the class of levers to which the above machine belongs.

.....
