CHEMISTRY PRACTICAL INSTRUCTIONS
P525/2 Inst. Sch

CONFIDENTIAL:
This information is given only to facilitate preparation of examinations.

Great care should be taken that the information given below does not reach the candidates either directly or indirectly.

INSTRUCTIONS FOR PREPARING CHEMICALS AND APPARATUS
The head teacher must ensure that the teacher responsible for preparing chemicals and apparatus hands in his/her trial results properly sealed in a separate envelope and firmly attached [fastened] to the candidates' scripts envelope(s)

1. The description of the chemicals and reagents specified below does not necessarily correspond with the description in the question paper. Candidates must not be informed of the differences.

2. Candidates are not allowed to use the reference books [i.e. textbooks, booklets on qualitative analysis etc.] during the examinations.

3. In addition to the fittings and substances ordinarily contained in a chemistry laboratory, each candidate will require the following.

Reagents:

70 cm^3 of a ***0.1M*** Hydrochloric acid solution labelled **FA1**

*50cm^3 of hydrogen peroxide labelled **FA2***

*250cm^3 of sodium of a **0.1M** sodium hydroxide solution.*

*60cm3 of a 0.1M oxalic acid (**$H_2C_2O_4 .2H_2O$**)*

*2.0g of solid **Z***

*2.0g of Solid **Q***

*Substance **R***

Distilled water.

***FA 1** is prepared by dissolving*

FA2 is prepared by

*Substance **R** is Propan-2-ol*

*Substance **Z** is a mixture of **$BaCl_2$. $2H_2O$ and $ZnCO_3$** in a ratio of **1:3** respectively.*

Apparatus.

Conical flask (250cm^3 capacity)

Burette 50cm^3 capacity)

Droppers

8 test tubes

Stop clock (or Stop watch)

Pipette (25cm^3 or 20cm^3 capacity)

Glass Beakers (250cm^3) at least 2

Measuring cylinder (10cm^3 capacity)

Volumetric Flask (250cm^3 capacity)

Retort stands with clamp

Litmus papers

1 1 filter paper

Easy Access to

Weighing scale

*Phenolphthalein indicator **(freshly prepared)***

All Chemistry Laboratory Reagents commonly used for identifying gases, cations, anions, and organic compounds.

Heat source:

This form MUST be completed and returned in a separate envelope firmly attached to the script's envelope.

Section 1.

Any information which the teacher responsible for preparing the apparatus thinks may be useful to the scores should be given on this sheet. The teacher must try the items and submit his/her results in the space provided below to guide the examiners about the apparatus and concentrations of the chemicals used.

NB: Teachers who do not submit their trials results will be held responsible for the candidates' performance.

.....

Section 2.

The Invigilator, in consultation with the teacher responsible for preparing the apparatus, should give details below of any difficulties experienced by particular candidates, giving their names and personal numbers. These should include references.

(a) Difficulties due to faulty apparatus

.....
.....
.....

(b) Accidents to apparatus or material used.

.....
.....

(c) Physical handicaps of candidates

.....
.....
.....

(d) Any other information

.....
.....
.....

Other cases of hardships like illness, disability, should be reported directly to **KAMTEC EXAMINATIONS BOARD** in the usual way.

A plan of work benches, giving details by personal numbers of the places occupied by the candidate for each shift, must be enclosed with the scripts

DO NOT STAMP ANYWHERE ON THIS DOCUMENT

Invigilator's Name.....Signature.....

Signature of the teacher responsible for preparing the apparatus.....

Signature of the head teacher.....

Code number .....
