

KIKUNYU MODERN PRIMARY SCHOOL

PRIMARY SIX MATHEMATICS TOPICAL BREAKDOWN FOR TERM TWO 2025

TOPIC	SUB TOPIC	REMARKS
Fractions	1. Revision: Addition of fractions	
	2. Revision: Subtraction of fractions	
	3. Multiplication of numbers	
	4. Reciprocals of fractions	
	5. Division of fractions	
	6. Mixed operations on numbers (Application of numbers)	
	7. Finding place values and values of decimals	
	8. Rounding off decimals	
	9. Operations on decimals	
	10.Subtracting decimals	

TOPIC	SUB TOPIC	REMARKS
	11.Adding and subtracting decimals	
	12.Multiplying decimals	
	13.Dividing decimals	
	14.Multiplying and dividing decimals	
	15.Working out decimals with mixed operations	
	16.Ratios and proportions	
	17.Expressing fractions as ratios and vice versa	
	18.Increasing quantities using ratios	
	19.Decreasing quantities using ratios	
	20.Applying direct proportions to solve problems	

TOPIC	SUB TOPIC	REMARKS
	21.Applying inverse proportions to solve problems	
	22.Percentages	
	23.Expressing fractions as percentages	
	24.Expressing percentages as fractions	
	25.Expressing decimals as percentages	
	26.Expressing percentages as decimals	
	27.Finding parts of a percentage	
	28.Expressing quantities as percentages	
	29.Increasing quantities by percentage	
	30.Decreasing quantities by percentage	

TOPIC	SUB TOPIC	REMARKS
	31.Finding percentage increase or decrease	
	32.Finding percentage profit or loss	
	33.Finding the relationship between loss, profit and percentage	
	34.Finding simple interest	
	35.Finding amount given principal and S.I	
Money	1. Recognizing Uganda currency and other currencies	
	2. Exchanging Uganda currency for other currencies	
	3. Exchanging other currencies to Uganda currency	
Distance, time and speed	1. Distance Calculating distance when speed and time are given	

TOPIC	SUB TOPIC	REMARKS
	2. Time Calculating time when distance and speed are given	
	3. Word problems involving time	
	4. Speed Calculating speed when distance and time are given	
	5. Changing speed from m/s to km/hr	
	6. Changing speed from km/hr to m/s	
	7. Time graph Interpreting distance and time on a travel graph	
	8. Plotting distance covered and time taken on a graph	
Data Handling	1. Collecting data Collecting and organizing data in tables	

TOPIC	SUB TOPIC	REMARKS
	2. Presentation of data Finding range, mode and median	
	3. Statistics Finding frequency, range and average	
	4. Applying average in daily life	
	5. Interpreting line graphs	
	6. Interpreting data on pie charts	
	7. Pie charts involving the unknown	
	8. Pie charts involving percentages	
	9. Drawing pie charts	
	10.Probability 11.Finding probability	
ABBREVIATIONS USED		
1. WK → week 2. PD → period 3. U.L → Unlock literacy skills 4. I.A → Activities of integration		5. L.S.V → Life Skills and Values 6. L/A → Learning Aids 7. REF → Reference

KIKUNYU MODERN PRIMARY SCHOOL

PRIMARY SIX SCHEME OF WORK FOR MATHEMATICS TERM TWO 2025

WK	PD	TOPIC	SUB TOPIC	COMPETENCES		CONTENT	U.L/I.A	METHODS	L.S.V	ACTIVITIES	L/A	REF
				SUBJECT	LANGUAGE							
		Fractions	Revision Addition of fractions	The learner adds fractions correctly	The learner reads, interprets and writes mathematical statements correctly	Addition of fractions Example Work out: $\frac{1}{3} + \frac{1}{2}$ Here, we can use the concept of equivalent fractions or L.C.D	Reading fluency Repeated exposure to the keywords	Guided class discussion Guided discovery	Effective communication Problem solving	Adding fractions	Counters Multiplication tables	P.6 curriculum Set One Page 162 to 165
		Fractions	Revision Subtraction of fractions	The learner subtracts fractions correctly	The learner reads, interprets and writes mathematical statements correctly	Subtraction of fractions Example Work out: $\frac{3}{4} - \frac{1}{3}$	Reading fluency Repeated exposure to the keywords	Guided class discussion Guided discovery	Effective communication Problem solving	Subtracting fractions	Counters Multiplication tables	MK Pri Maths Pupil's Book 6 Page 49
		Fractions	Revision Multiplication of fractions	The learner multiplies fractions correctly	The learner reads, interprets and writes mathematical	Multiplication of fractions Example Work out: $\frac{1}{3} \times \frac{1}{4}$	Reading fluency Repeated exposure	Guided class discussion Guided discovery	Effective communication	Multiplying fractions	Counters Multiplication tables	MK Pri Maths Pupil's Book 6

WK	PD	TOPIC	SUB TOPIC	COMPETENCES		CONTENT	U.L/I.A	METHODS	L.S.V	ACTIVITIES	L/A	REF
				SUBJECT	LANGUAGE							
					statements correctly		to the keywords		Problem solving			Page 50-51
		Fractions	Revision Finding reciprocals of fractions	Finding reciprocals of fractions	The learner reads, interprets and writes mathematical statements correctly	Finding reciprocals of fractions Example 1. What is the reciprocal of $\frac{3}{4}$? 2. What is the reciprocal of $2\frac{1}{5}$? 3. What is the reciprocal of 2?	Reading fluency Repeated exposure to the keywords	Guided class discussion Guided discovery	Effective communication Problem solving	Finding reciprocals of fractions	Counters Multiplication tables	MK Pri Maths Pupil's Book 6 Page 52
		Fractions	Revision Division of fractions	The learner divides fractions correctly	The learner reads, interprets and writes mathematical statements correctly	Division of fractions Example Work out: $\frac{3}{4} \div \frac{1}{2}$	Reading fluency Repeated exposure to the keywords	Guided class discussion Guided discovery	Effective communication Problem solving	Finding reciprocals of a fraction Multiplying numbers	Counters Multiplication tables	MK Pri Maths Pupil's Book 6 Page 53-54
		Fractions	Mixed operations on numbers	The learner applies BODMAS rule	The learner reads, interprets and	Mixed operations on numbers	Reading fluency	Guided class discussion	Effective communication	Applying BODMAS	Counters	MK Pri Maths Pupil's

WK	PD	TOPIC	SUB TOPIC	COMPETENCES		CONTENT	U.L/I.A	METHODS	L.S.V	ACTIVITIES	L/A	REF
				SUBJECT	LANGUAGE							
			(Application of numbers)	to work out fractions with mixed operations	writes mathematical statements correctly	(Application of BODMAS) Example Simplify: $\frac{2}{3}$ of $\frac{3}{4} - \frac{1}{3} + \frac{1}{2}$	Repeated exposure to the keywords	Guided discovery	Problem solving		Multiplication tables	Book 6 Page 55
		Fractions	Decimals Finding place values and values of decimals	The learner describes decimals Finds place values and values of decimals	The learner reads, interprets and writes mathematical statements correctly	Finding place values and values of decimals Example What is the place value of each digit in the number 7.653?	Reading fluency Repeated exposure to the keywords	Guided class discussion Guided discovery	Effective communication Problem solving	Finding place values and values of decimals	Counters Multiplication tables	MK Pri Maths Pupil's Book 6 Page 56
		Fractions	Rounding off decimals	The learner rounds off decimals to the nearest place value as required	The learner reads, interprets and writes mathematical statements correctly	Rounding off decimals Example Round off 17.63 to the nearest whole number	Reading fluency Repeated exposure to the keywords	Guided class discussion Guided discovery	Effective communication Problem solving	Rounding off decimals	Counters Multiplication tables	MK Pri Maths Pupil's Book 6 Page 57-58
		Fractions	Operations on decimals	The learner adds decimals	The learner reads, interprets and writes mathematical	Addition of decimals Example Add: $4.8 + 6.75 + 15.579$	Reading fluency Repeated exposure	Guided class discussion Guided discovery	Effective communication	Adding decimals	Counters Multiplication tables	MK Pri Maths Pupil's Book 6

WK	PD	TOPIC	SUB TOPIC	COMPETENCES		CONTENT	U.L/I.A	METHODS	L.S.V	ACTIVITIES	L/A	REF
				SUBJECT	LANGUAGE							
					statements correctly		to the keywords		Problem solving			Page 59
		Fractions	Subtracting decimals	The learner subtracts decimals	The learner reads, interprets and writes mathematical statements correctly	Subtracting decimals Example Work out: $9.23 - 6.504$	Reading fluency Repeated exposure to the keywords	Guided class discussion Guided discovery	Effective communication Problem solving	Subtracting decimals	Counters Multiplication tables	MK Pri Maths Pupil's Book 6 Page 60
		Fractions	Adding and subtracting decimals	The learner adds and subtracts decimals following the BODMAS rule	The learner reads, interprets and writes mathematical statements correctly	Adding and subtracting decimals Example Work out: $15.1 - 9.24 + 7.35$	Reading fluency Repeated exposure to the keywords	Guided class discussion Guided discovery	Effective communication Problem solving	Adding and subtracting decimals	Counters Multiplication tables	MK Pri Maths Pupil's Book 6 Page 61
		Fractions	Multiplying decimals	The learner multiplies decimals by 10, 100 and 1000 by whole numbers, by decimals.	The learner reads, interprets and writes mathematical statements correctly	Multiplying decimals Examples 1. Work out: 0.06×10 2. Work out: 2.84×3 3. Simplify: 0.8×0.4	Reading fluency Repeated exposure to the keywords	Guided class discussion Guided discovery	Effective communication Problem solving	Multiplying decimals	Counters Multiplication tables	MK Pri Maths Pupil's Book 6 Page 62-64

WK	PD	TOPIC	SUB TOPIC	COMPETENCES SUBJECT LANGUAGE		CONTENT	U.L/I.A	METHODS	L.S.V	ACTIVITIES	L/A	REF
						4. Simplify: 0.17×0.5						
		Fractions	Dividing decimals	The learner divides whole numbers by decimals and vice versa	The learner reads, interprets and writes mathematical statements correctly	Dividing decimals Examples 1. Work out: $10 \div 0.5$ 2. Divide 0.12 by 4 3. Work out: 1.2×0.4	Reading fluency Repeated exposure to the keywords	Guided class discussion Guided discovery	Effective communication Problem solving	Dividing decimals	Counters Multiplication tables	MK Pri Maths Pupil's Book 6 Page 65-67
		Fractions	Multiplying and dividing decimals	The learner multiplies and divides decimals	The learner reads, interprets and writes mathematical statements correctly	Multiplying and dividing decimals Example Simplify: $\frac{0.24 \times 0.3}{0.8}$	Reading fluency Repeated exposure to the keywords	Guided class discussion Guided discovery	Effective communication Problem solving	Multiplying and dividing decimals	Counters Multiplication tables	MK Pri Maths Pupil's Book 6 Page 68
		Fractions	Working out decimals with mixed operations	The learner simplifies decimals with mixed operations	The learner reads, interprets and writes mathematical statements correctly	Working out decimals with mixed operations Example Work out: $0.7 + 0.6 \times 0.4 - 0.5$	Reading fluency Repeated exposure to the keywords	Guided class discussion Guided discovery	Effective communication Problem solving	Working out decimals with mixed operations	Counters Multiplication tables	MK Pri Maths Pupil's Book 6 Page 69

WK	PD	TOPIC	SUB TOPIC	COMPETENCES		CONTENT	U.L/I.A	METHODS	L.S.V	ACTIVITIES	L/A	REF
				SUBJECT	LANGUAGE							
		Fractions	Ratios and proportions	The learner compares quantities using ratios	The learner reads, interprets and writes mathematical statements correctly	Ratios and proportions Comparing quantities using ratios A ratio is a comparison of two or more quantities by division. Example What is the ratio of 15 minutes to one hour?	Reading fluency Repeated exposure to the keywords	Guided class discussion Guided discovery	Effective communication Problem solving	Comparing quantities using ratios	Counters Multiplication tables	MK Pri Maths Pupil's Book 6 Page 70
		Fractions	Expressing fractions as ratios and vice versa	The learner expresses fractions as ratios and vice versa	The learner reads, interprets and writes mathematical statements correctly	Expressing fractions as ratios and vice versa Example Nankinga served $\frac{3}{5}$ of her birthday cake. Express the part served as a ratio.	Reading fluency Repeated exposure to the keywords	Guided class discussion Guided discovery	Effective communication Problem solving	Expressing fractions as ratios and vice versa	Counters Multiplication tables	MK Pri Maths Pupil's Book 6 Page 71
		Fractions	Increasing quantities using ratios	The learner increases quantities using ratios	The learner reads, interprets and writes mathematical	Increasing quantities using ratios Example	Reading fluency Repeated exposure	Guided class discussion Guided discovery	Effective communication Problem solving	Increasing quantities using ratios	Counters Multiplication tables	MK Pri Maths Pupil's Book 6

WK	PD	TOPIC	SUB TOPIC	COMPETENCES		CONTENT	U.L/I.A	METHODS	L.S.V	ACTIVITIES	L/A	REF
				SUBJECT	LANGUAGE							
					statements correctly	Increase Sh.200 in the ratio of 5:4	to the keywords					Page 72
		Fractions	Decreasing quantities using ratios	The learner reduces quantities using ratios	The learner reads, interprets and writes mathematical statements correctly	Decreasing quantities using ratios Example Decrease 600 in the ratio of 2:3	Reading fluency Repeated exposure to the keywords	Guided class discussion Guided discovery	Effective communication Problem solving	Decreasing quantities using ratios	Counters Multiplication tables	MK Pri Maths Pupil's Book 6 Page 73
		Fractions	Applying direct proportions to solve problems	The learner applies direct proportions to solve problems	The learner reads, interprets and writes mathematical statements correctly	Applying direct proportions to solve problems Example The cost of 3kg of sugar is Sh.9,000. What is the cost of 5kg of sugar?	Reading fluency Repeated exposure to the keywords	Guided class discussion Guided discovery	Effective communication Problem solving	Applying direct proportions to solve problems	Counters Multiplication tables	MK Pri Maths Pupil's Book 6 Page 74
		Fractions	Applying inverse proportions to solve problems	The learner applies inverse proportions to solve problems	The learner reads, interprets and writes mathematical	Applying inverse proportions to solve problems Example 5 builders take 4 days to build a wall. How many	Reading fluency Repeated exposure to the keywords	Guided class discussion Guided discovery	Effective communication Problem solving	Applying inverse proportions to solve problems	Counters Multiplication tables	MK Pri Maths Pupil's Book 6 Page 75

WK	PD	TOPIC	SUB TOPIC	COMPETENCES		CONTENT	U.L/I.A	METHODS	L.S.V	ACTIVITIES	L/A	REF
				SUBJECT	LANGUAGE							
					statements correctly	builders will 10 builders take?						
		Fractions	Percentages	The learner explains the meaning of percentages	The learner reads, interprets and writes mathematical statements correctly	Percentages Meaning of percentages 10 out of 100 means $\frac{10}{100}$ or 10%. The symbol for percentage is %	Reading fluency Repeated exposure to the keywords	Guided class discussion Guided discovery	Effective communication Problem solving	Telling the meaning of percentages	Counters Multiplication tables	MK Pri Maths Pupil's Book 6 Page 76
		Fractions	Expressing fractions as percentages	The learner expresses fractions as percentages	The learner reads, interprets and writes mathematical statements correctly	Expressing fractions as percentages Example Change $\frac{2}{5}$ to a percentage	Reading fluency Repeated exposure to the keywords	Guided class discussion Guided discovery	Effective communication Problem solving	Expressing fractions as percentages	Counters Multiplication tables	MK Pri Maths Pupil's Book 6 Page 77
		Fractions	Expressing percentages as fractions	The learner expresses percentages as fractions	The learner reads, interprets and writes mathematical statements correctly	Expressing percentages as fractions Example Change 20% to a fraction in its lowest terms	Reading fluency Repeated exposure to the keywords	Guided class discussion Guided discovery	Effective communication Problem solving	Expressing percentages as fractions	Counters Multiplication tables	MK Pri Maths Pupil's Book 6 Page 78

WK	PD	TOPIC	SUB TOPIC	COMPETENCES		CONTENT	U.L/I.A	METHODS	L.S.V	ACTIVITIES	L/A	REF
				SUBJECT	LANGUAGE							
		Fractions	Expressing decimals as percentages	The learner expresses decimals as percentages	The learner reads, interprets and writes mathematical statements correctly	Expressing decimals as percentages Example Express 0.4 as a percentage	Reading fluency Repeated exposure to the keywords	Guided class discussion Guided discovery	Effective communication Problem solving	Expressing decimals as percentages	Counters Multiplication tables	MK Pri Maths Pupil's Book 6 Page 79
		Fractions	Expressing percentages as decimals	The learner expresses percentages as decimals	The learner reads, interprets and writes mathematical statements correctly	Expressing percentages as decimals Example Express 20% as a decimal	Reading fluency Repeated exposure to the keywords	Guided class discussion Guided discovery	Effective communication Problem solving	Expressing percentages as decimals	Counters Multiplication tables	MK Pri Maths Pupil's Book 6 Page 79
		Fractions	Finding parts of a percentage	The learner finds parts of a percentage	The learner reads, interprets and writes mathematical statements correctly	Finding parts of a percentage Example If 80% of a class are boys, what percentage are girls?	Reading fluency Repeated exposure to the keywords	Guided class discussion Guided discovery	Effective communication Problem solving	Finding parts of a percentage	Counters Multiplication tables	MK Pri Maths Pupil's Book 6 Page 80

WK	PD	TOPIC	SUB TOPIC	COMPETENCES		CONTENT	U.L/I.A	METHODS	L.S.V	ACTIVITIES	L/A	REF
				SUBJECT	LANGUAGE							
		Fractions	Expressing quantities as percentages	The learner expresses quantities as percentages	The learner reads, interprets and writes mathematical statements correctly	Expressing quantities as percentages Example Express 500g as a percentage of 1kg.	Reading fluency Repeated exposure to the keywords	Guided class discussion Guided discovery	Effective communication Problem solving	Expressing quantities as percentages	Counters Multiplication tables	MK Pri Maths Pupil's Book 6 Page 81
		Fractions	Increasing quantities by percentage	The learner increases quantities by percentages	The learner reads, interprets and writes mathematical statements correctly	Increasing quantities by percentage Example Increase 600 by 10%	Reading fluency Repeated exposure to the keywords	Guided class discussion Guided discovery	Effective communication Problem solving	Increasing quantities by percentage	Counters Multiplication tables	MK Pri Maths Pupil's Book 6 Page 82
		Fractions	Decreasing quantities by percentage	The learner reduces quantities by percentage	The learner reads, interprets and writes mathematical statements correctly	Decreasing quantities by percentage Example Decrease 600 by 20%	Reading fluency Repeated exposure to the keywords	Guided class discussion Guided discovery	Effective communication Problem solving	Decreasing quantities by percentage	Counters Multiplication tables	MK Pri Maths Pupil's Book 6 Page 83
		Fractions	Finding percentage	The learner finds percentage	The learner reads, interprets and writes	Finding percentage increase or decrease	Reading fluency	Guided class discussion	Effective communication	Finding percentage	Counters	MK Pri Maths Pupil's Book 6

WK	PD	TOPIC	SUB TOPIC	COMPETENCES SUBJECT LANGUAGE		CONTENT	U.L/I.A	METHODS	L.S.V	ACTIVITIES	L/A	REF
			increase or decrease	increase or decrease	mathematical statements correctly	$\%age \uparrow se = \frac{\text{increase}}{\text{original number}} \times 100\%$ $\%age \downarrow se = \frac{\text{decrease}}{\text{original number}} \times 100\%$	Repeated exposure to the keywords	Guided discovery	Problem solving	increase or decrease	Multiplication tables	Page 84
		Fractions	Finding percentage profit or loss	The learner finds percentage profit or loss	The learner reads, interprets and writes mathematical statements correctly	Finding percentage profit or loss $\%age \text{ profit} = \frac{\text{Difference in profit}}{\text{original amount}} \times 100\%$ $\%age \text{ loss} = \frac{\text{Difference in loss}}{\text{original amount}} \times 100\%$	Reading fluency Repeated exposure to the keywords	Guided class discussion Guided discovery	Effective communication Problem solving	Finding percentage profit or loss	Counters Multiplication tables	MK Pri Maths Pupil's Book 6 Page 85
		Fractions	Finding the relationship between loss, profit and percentage	The learner finds the relationship between loss, profit and percentage	The learner reads, interprets and writes mathematical statements correctly	Finding the relationship between loss, profit and percentage Example A shirt costs Sh.18,000. At what price should it be	Reading fluency Repeated exposure to the keywords	Guided class discussion Guided discovery	Effective communication Problem solving	Finding the relationship between loss, profit and percentage	Counters Multiplication tables	MK Pri Maths Pupil's Book 6 Page 86

				SUBJECT	LANGUAGE							
						sold to make a profit of 30%?						
		Fractions	Finding simple interest	The learner finds simple interest	The learner reads, interprets and writes mathematical statements correctly	Finding simple interest Interest means the extra money that you pay back when you borrow money or that you receive when you invest money. Simple interest = Principal x Rate x Time	Reading fluency Repeated exposure to the keywords	Guided class discussion Guided discovery	Effective communication Problem solving	Finding simple interest	Counters Multiplication tables	MK Pri Maths Pupil's Book 6 Page 87
		Fractions	Finding amount	The learner finds the amount of money paid back together with interest	The learner reads, interprets and writes mathematical statements correctly	Finding amount To find amount, add simple interest to the principal. Example Calculate the amount on Sh.20,000 borrowed for 2 years at 8% per year	Reading fluency Repeated exposure to the keywords	Guided class discussion Guided discovery	Effective communication Problem solving	Finding amount	Counters Multiplication tables	MK Pri Maths Pupil's Book 6 Page 88

WK	PD	TOPIC	SUB TOPIC	COMPETENCES		CONTENT	U.L/I.A	METHODS	L.S.V	ACTIVITIES	L/A	REF
				SUBJECT	LANGUAGE							
		Money	Exchange rates Recognizing Uganda currency and other currencies	The learner recognizes Uganda currency and other currencies	The learner reads, interprets and writes mathematical statements correctly	Exchange rates Recognizing Uganda currency and other currencies (i) Uganda shilling notes and coins (UGX) (ii) British pound sterling and coins(GBP) (iii) United states dollar notes and coins(USD) e.t.c	Reading fluency Repeated exposure to the keywords	Guided class discussion Guided discovery	Effective communication Problem solving	Recognizing Uganda currency and other currencies	Counters Multiplication tables	P.6 curriculum Set One Page 168 to 170
		Money	Conversion of currency 1. Exchanging Uganda currency for other currencies	The learner exchanges Uganda currency for other currencies	The learner reads, interprets and writes mathematical statements correctly	Conversion of currency Exchanging Uganda currency for other currencies Example If 1 USD costs Ugx.3,800, convert Ugx.186,000 to United States Dollars.	Reading fluency Repeated exposure to the keywords	Guided class discussion Guided discovery	Effective communication Interpersonal relationships Problem solving	Exchanging Uganda currency for other currencies	Counters Multiplication tables	MK Pri Maths Pupil's Book 6 Page 112-113

WK	PD	TOPIC	SUB TOPIC	COMPETENCES		CONTENT	U.L/I.A	METHODS	L.S.V	ACTIVITIES	L/A	REF
				SUBJECT	LANGUAGE							
		Money	2. Exchanging other currencies to Uganda currency	The learner exchanges other currencies to Uganda currency	The learner reads, interprets and writes mathematical statements correctly	Exchanging other currencies to Uganda currency Example Kalema has to raise USD 780 for an air ticket to Dubai. How much is he supposed to get in Uganda shillings if each USD costs Sh.3,800?	Reading fluency Repeated exposure to the keywords	Guided class discussion Guided discovery	Effective communication Interpersonal relationships Problem solving	Exchanging other currencies to Uganda currency	Counters Multiplication tables	MK Pri Maths Pupil's Book 6 Page 114-115
		Distance, Time and Speed	Distance 1. Calculating distance when speed and time are given	The learner calculates Calculating distance when speed and time are given	The learner reads, interprets and writes mathematical statements correctly	Calculating distance when speed and time are given Distance = Speed x Time Example John took 4 hours to cover a distance at a speed of 30km/hr. what distance did he cover?	Reading fluency Repeated exposure to the keywords	Guided class discussion Guided discovery	Effective communication Interpersonal relationships Problem solving	Calculating distance when speed and time are given	Counters Multiplication tables	P.6 curriculum Set One Page 171-173

WK	PD	TOPIC	SUB TOPIC	COMPETENCES		CONTENT	U.L/I.A	METHODS	L.S.V	ACTIVITIES	L/A	REF
				SUBJECT	LANGUAGE							
		Distance, Time and Speed	Time 1. Calculating time when distance and speed are given	The learner calculates time when distance and speed are given	The learner reads, interprets and writes mathematical statements correctly	Time Calculating time when distance and speed are given $\text{Time} = \frac{\text{Distance}}{\text{Speed}}$ Example How long will a car take to cover a distance of 120km at a speed of 40km/hr?	Reading fluency Repeated exposure to the keywords	Guided class discussion Guided discovery	Effective communication Interpersonal relationships Problem solving	Calculating time when distance and speed are given	Counters Multiplication tables	MK Pri Maths Pupil's Book 6 Page 118
		Distance, Time and Speed	2. Word problems involving time	The learner solves word problems involving time and distance	The learner reads, interprets and writes mathematical statements correctly	Word problems involving time Example A car travelling at a speed of 50km/hr left town M at 7:30a.m. Another car travelling at 80km/hr followed after 1 hour. When did the second car overtake the first car?	Reading fluency Repeated exposure to the keywords	Guided class discussion Guided discovery	Effective communication Problem solving	Solving word problems involving time	Counters Multiplication tables	MK Pri Maths Pupil's Book 6 Page 119

WK	PD	TOPIC	SUB TOPIC	COMPETENCES		CONTENT	U.L/I.A	METHODS	L.S.V	ACTIVITIES	L/A	REF
				SUBJECT	LANGUAGE							
		Distance, Time and Speed	Speed 1. Calculating speed when distance and time are given	Calculating speed when distance and time are given	The learner reads, interprets and writes mathematical statements correctly	Speed Calculating speed when distance and time are given $\text{Speed} = \frac{\text{Distance}}{\text{Time}}$ Example Nakato took 2 hours to cover a distance of 36km on her bicycle. At what speed was she riding?	Reading fluency Repeated exposure to the keywords	Guided class discussion Guided discovery	Effective communication Problem solving	Calculating speed when distance and time are given	Counters Multiplication tables	MK Pri Maths Pupil's Book 6 Page 120
		Distance, Time and Speed	2. Changing speed from m/s to km/hr	Changing speed from m/s to km/hr	The learner reads, interprets and writes mathematical statements correctly	Changing speed from m/s to km/hr Example 1. Change 5m/s to km/hr. 2. A cyclist covers a distance of 30 meters in 2 seconds. Find his speed in kilometers per hour.	Reading fluency Repeated exposure to the keywords	Guided class discussion Guided discovery	Effective communication Problem solving	Changing speed from m/s to km/hr	Counters Multiplication tables	MK Pri Maths Pupil's Book 6 Page 121

WK	PD	TOPIC	SUB TOPIC	COMPETENCES SUBJECT LANGUAGE		CONTENT	U.L/I.A	METHODS	L.S.V	ACTIVITIES	L/A	REF
		Distance, Time and Speed	3. Changing speed from km/hr to m/s	The learner changes speed from km/hr to m/s	The learner reads, interprets and writes mathematical statements correctly	Changing speed from km/hr to m/s Example 1. Express 90km/hr to m/s. 2. Express 180km covered in 2 hours as meters per second.	Reading fluency Repeated exposure to the keywords	Guided class discussion Guided discovery	Effective communication Problem solving	Changing speed from km/hr to m/s	Counters Multiplication tables	MK Pri Maths Pupil's Book 6 Page 122
		Distance, Time and Speed	Time graph 1. Interpreting distance and time on a travel graph	The learner interprets distance and time on a travel graph	The learner reads, interprets and writes mathematical statements correctly	Time graph Interpreting distance and time on a travel graph	Reading fluency Repeated exposure to the keywords	Guided class discussion Guided discovery	Effective communication Problem solving	Interpreting distance and time on a travel graph	Counters Multiplication tables	MK Pri Maths Pupil's Book 6 Page 123-124
		Distance, Time and Speed	2. Plotting distance covered and time taken on a graph	The learner plots distance covered and time taken on a graph	The learner reads, interprets and writes mathematical statements correctly	Plotting distance covered and time taken on a graph	Reading fluency Repeated exposure to the keywords	Guided class discussion Guided discovery	Effective communication Problem solving	Plotting distance covered and time taken on a graph	Counters Multiplication tables	MK Pri Maths Pupil's Book 6 Page 125

						sector out of 100 and multiply by 360°.						
		Data Handling	Drawing pie charts	The learner draws pie charts	The learner reads, interprets and writes mathematical statements correctly	Drawing pie charts Multiply each given fraction by 360° to get the value of each sector. Draw a circle and then measure each sector.	Reading fluency Repeated exposure to the keywords	Guided class discussion Guided discovery	Effective communication Problem solving	Drawing pie charts	Counters Multiplication tables	MK Pri Maths Pupil's Book 6 Page 104-105
		Data Handling	Probability Finding probability	The learner finds probability	The learner reads, interprets and writes mathematical statements correctly	Probability Finding probability Probability $= \frac{\text{No.of expected outcomes}}{\text{Total No of possible outcomes}}$	Reading fluency Repeated exposure to the keywords	Guided class discussion Guided discovery	Effective communication Problem solving	Finding probability	Counters Multiplication tables	MK Pri Maths Pupil's Book 6 Page 106-108
