

SECTION A (40 MARKS)

1. Work out:

$$\begin{array}{r} 273 \\ + 162 \\ \hline \end{array}$$

2. Write 146, 392 in words.

3. Simplify: $-8 - -3$

4. Work out: $(18 \times 23) + (77 \times 18)$

5. Simplify: $\frac{5}{6} - \frac{1}{4} \times \frac{1}{3} =$

6. Describe the shaded region in the figure below.

7. Find the next number in the sequence
 $-15, -13, -9, -3, \underline{\hspace{2cm}}$
8. Express 2m^2 to cm^2
9. Given that $a = 2$, $b = 3$ and $c = -4$, find the value of $b^a - ac$
10. Using a meter and a pair of compasses, construct an angle of 135° in the space below.

11. Round off 6473 to the nearest hundreds.

12. Find the solution set for $6 - 7y < 20$

13. Express 108 as a product of its prime factors

14. Find the area of the figure below

15. A baby slept at 9.30p.m and woke up at 1:15 a.m. For how long was the baby asleep?

16. The number of pupils in a school was 960. This year, the number decreased to 800 pupils. In which ratio did the number of pupils decrease?
17. If a dice is tossed once, find the probability that a composite number will show up.
18. The National ball game competition started on Tuesday and lasted 19 days. On which day did the competition end?
19. A trader bought 4 text books at shs. 84000 and sold them at a profit of shs. 16,000. Find the selling price of each text book.

20. Find the value of n in the figure below.

SECTION B (60 MARKS)

21. The Venn diagram below shows the number of farmers who grow maize (M) and Sorghum(S) in a certain village.

- (a) Given that the number of farmers who grow sorghum is twice those who grow maize only. Find the value of P .

0

- (b) Find the probability of choosing at random a farmer who grows sorghum.

22 (a) Work out:

$$\begin{array}{r} 142_{\text{five}} \\ - 34_{\text{five}} \\ \hline \end{array}$$

(b) Given that $43_k = 113_{\text{four}}$, find the value of K.

23. A dairy farmer collected 69 litres of milk from his farm in three days. On each day, 2 more litres of milk were obtained than the previous day. Find the number of litres of milk the farmer obtained on the third day.

24. A maid went shopping and bought the following items:

3kg of g.nuts at shs. 6,200 per kg.
 2litres of cooking oil each at shs. 8,000
 500gm of sugar at shs. 4,000 per kg.
 2 bars of soap at shs. 12,000

- (a) Find her total expenditure

- (b) If she was given a change of shs. 1,400, find the amount she had at first.

- 25 (a) Express 0.2444.....as a simplified common fraction.

(b) Simplify: $\frac{0.59 - 0.23}{0.7 + 0.5}$

26. A ship sailed 420km from port A on a bearing of 120° to port B. From B, it sailed 560km to port C on a bearing of 230° .

- (a) Draw a sketch showing the above information.

(b) Using a scale of 1cm to represent 70km, draw an accurate figure showing the above information.

(c) Find the shortest distance between town A and C.

27. Sarah is 12 years older than Tom. 8 year ago, Sarah was thrice as old as Tom.

(a) How old is Tom?

(b) Find Sarah's age 8 years ago.

28. One of the exterior angles of a regular polygon is 40° .

(a) Calculate the number of sides of the polygon

(b) Work out its interior angle sum.

29. The table below shows the performance of a P.7 class in a mathematics test. Study it and answer the questions that follow.

Marks scored	75	60	80	m
Number of pupils	2	3	1	4

(a) How many pupils did the test?

(b) If their mean score was 51, find the value of m.

30. A motorist left town A travelling at a speed of 90km/h for 2 hours to town B. He returned to town A at a speed of 60km/h.

(a) Find the distance between the towns A and B.

(b) Work out the motorist's average speed for the whole journey.

31. A flask was $\frac{2}{3}$ full of tea. When $\frac{1}{3}$ of the tea was taken, 2000ml remained, find the capacity of the flask.

32. The two containers A and B hold the same amount of water when completely full.

- (a) Find the volume of container B.

- (b) Find the radius of container A. (Take π as $\frac{22}{7}$)
