

# **SMARTLERN**

# **BOOKLET**

## Human Ear

NAME.....

CLASS.....

1. Give two examples of poultry vices  
(Crazy Farmer Eat).
  - Cannibalism.
  - Feather pecking.
  - Egg eating.
2. List two examples of sense organs  
(Every Eagle Needs Tasty Snacks).
  - ✓ Eyes
  - ✓ Ears
  - ✓ Nose
  - ✓ Tongue
  - ✓ Skin
3. identify four types of teeth.  
(I Can Play Matatu).
  - ✓ Incisors
  - ✓ Canines
  - ✓ Premolars
  - ✓ Molars
4. State two functions of the skeleton  
(Strong People Stand Proudly Moving).
  - Support the body
  - Protect the delicate body organs.
  - Give the body shape.
  - Protect blood cell.
  - Help in body movement.
5. List two types of soil.  
(Smart Children Learn).
  - S-Sand soil
  - C-Clay soil
  - L-Loam soil
6. Give two examples of excretory body organs.  
(Kind Lions Love Swimming ).
  - Kidneys
  - Lungs
  - Liver
  - Skin
6. State two parts of a plant .  
(Roots Support Lovely Flowers)
  - R-Roots
  - S-Stem
  - L-Leaves
  - F-Flowers
7. .Mention two examples of blood components.  
(Proud Rabbits Wear Pajamas).
  - ✓ P-Plasm
  - ✓ R-Red blood cells
  - ✓ W-White blood cells

- ✓ P-Platelets
8. List two examples of food nutrients.  
(Clever Pupils Find Very Many Winners)
- ✓ C-Carbohydrates
  - ✓ P-Proteins
  - ✓ F-Fats and oils
  - ✓ V-Vitamins
  - ✓ M-Mineral salts
  - ✓ W-Water
9. Give two examples of moveable joints.  
(Happy Boys Plays Games)
- Hinge joint
  - ball and socket joint
  - Pivot joint
  - Gliding joint
10. Give two methods of waste disposal.  
(Brave Boys Rap)
- ✓ Burning
  - ✓ Burying
  - ✓ Recycling
11. State two methods of seed dispersal  
(Wild Winds And Storm)
- ✓ Wind dispersal
  - ✓ W-Water dispersal
  - ✓ A-Animal dispersal
  - ✓ S-Splitting dispersal
12. State two examples of digestive system organs  
(Many Smart Learner Listen)
- M-Mouth
  - S-Stomach
  - L-Small intestine
  - L-Large intestine
13. Give two forms energy.  
(Happy Lions Sing Elegantly).
- H-Heat energy
  - L-Light energy
  - S-Sound energy
  - E-Electrical energy
14. State two uses of light energy  
(Seeing Security Signals )
- S-Seeing objects
  - S-Security at night
  - S-Signalling
15. Give two characteristics of fish  
(Fish Grow Scale)
- F-Fins
  - G-Gills

- S-Scales

16. Give two parts of a flower

(Smart Pupils Pick Flowers)

- S-Stigma
- P-Pistil
- P-Petal
- F-Filement

17. Give two exotic breeds of rabbits

(DR CLANIC)

- D-Dutch rabbit
- R-Rex rabbits
- C-Chinchilla rabbits
- L-Lop rabbits/Ear lops
- A-Angora rabbits
- N-New Zealand white rabbits
- C-California rabbits

18. Identify two products got from animals.

(Many Mothers Eat Skins)

- ✓ M-Meat
- ✓ M-Milk
- ✓ E-Eggs
- ✓ S-Skins

19. Give two examples of goats kept for milk production

(SAT)

- S-Saanen goats
- A-Alpine goat
- T-Toggenburg goats.

20. Give two examples of weather instruments

(Sister Read Weather Books)

- ✓ S-Six thermometer
- ✓ R-Rain gauge
- ✓ W-Wind vane
- ✓ B-Barometer

21. Mention one example of a road safety rules.

(Look Listen Think Cross)

- Look left and right
- L-Listen for Vehicles
- T-Think before crossing
- C-Cross carefully

22. State two ways of caring for the teeth

(Brush Floss Rinse)

- ✓ B-Brush teeth
- ✓ F-Flossing the teeth
- ✓ R-Rinsing the mouth.

23. List the three small bones found in the ear.

(HAS/MIS)

- ✓ H-Hammer(malleus)

- ✓ A-Anvil (incus)
- ✓ S-Stirrup(staps)

24.Give two conditions needed for seed germination  
(Warm Air Water )OR WOW

- ✓ W-Warmth
- ✓ A-Air(oxygen)
- ✓ W-Water.

25.State two examples of tick-born diseases.  
(HEART)

- ✓ H-Heart water
- ✓ E-East coast fever
- ✓ A-Anaplasmosis
- ✓ R-Red water
- ✓ T-Typhus fever (humans)

26.State two methods of storing sound .  
(PEM)

- Physical methods
- E-Electromagnetic methods
- M-Magnetic method

27.List two diseases that attack the brain.  
(CEC)

- Cerebral Malaria
- E-Epilepsy
- C-Brain cancer

28.Name the first colour of the rain bow.  
(Richard Okello Your Girl Betty is Vomiting)

- R-Red
- O-Orange
- Y-Yellow
- G-Green
- B-Blue
- I-Indigo
- V-Violet

29.Give two ways of controlling tick born diseases in domestic animals  
(Clean Spray Dip)

- C-Cleaning the habitats of animals
- S-Spraying animal using a caricides
- D-Dippng animals.

30.State two characteristic of living things  
(GERMS)

- Grow
- E-Excrete
- R-Reproduce
- M-Move
- S-Stimuli

31.Mention two uses of food in the body .  
(Build Energy Health and Warm)

- Build the body
- E-Provide energy to the body
- H-Keeps the body health
- W-Keeps the body warm.

32. Give two reasons why people eat food.

(5 Hs)

- H-Hospitality
- H-Healthy
- H-Hunger
- H-Happines
- H-Habit

33. Identify one viral poultry disease you know.

(FANG)

- Fowl pox
- A-Avian leucosis /bird flu
- N-Newcastle
- G-Gumboro

34. Give one principle of waste management and environmental conservation.

(5 Rs)

- R-Refuse
- R-Reduce
- R-Reuse
- R-Recycle
- R-Recover

35. Mention one example of vitamin deficiency disease.

(Nice Boy Rarely Buy Pin Shirt).

- N-Night blindness
- B-Beriberi
- R-Rickets
- B-
- P-Pellagra
- S-Scurvy

36. List two types of polluting .

(All Water Lands Noisy)

- ✧ Air pollution
- ✧ W-Water pollution
- ✧ L-Land pollution
- ✧ N-Noise pollution

37. State two examples of livestock animals .

(Pigs Go Stupidly conversing)

- ✧ P-Pig
- ✧ G-Goat
- ✧ S-Sheep
- ✧ C-Cow

38. Give one way of caring for garden tools.

(Clean oil Dry)

- ✧ C-Clean garden tools after use

- ✧ O-Oiling metallic garden tools
  - ✧ D-Keeping garden tools in dry places
- 39.State two examples of magnetic materials.  
(I Can See Now)
- ✧ I-Iron
  - ✧ C-Cobalt
  - ✧ S-Silver
  - ✧ N-Nickel.
- 40.State two functions of the skin .  
(Skin Protects Feel Heat and Sweat)
- ✧ P-Protects body organ.
  - ✧ F-Feel touch ,Heat and pain
  - ✧ H-Help to regulate body temperature
  - ✧ S-Excretes wastes through sweat.
- 41.Mention two function of the ear.  
(Hear And Balance)
- ✧ H-Hearing
  - ✧ B-Body balance.
- 42.State two parts of the respiratory system.  
(Nice Tigers,Love Breathing)
- ✧ N-Nose filters air
  - ✧ T-Trachea (Carries oxygen to the lungs)
  - ✧ L-Lungs( exchanges gases)
  - ✧ B-Bronchi (connects trachea to the lungs.)
- 43.State two methods of food preservation  
(Dry Smoke Freeze Salt)
- ✧ D-Sundrying
  - ✧ S-Smoking
  - ✧ F-Refrigerating
  - ✧ S-Salting
- 44.Mention two ways of controlling the disease without using drugs .  
(Health people Eat Well Exercise And Rest)
- ✧ E-Eat abalanced diet
  - ✧ W-Washing the body .
  - ✧ E-Doing regular physical exercise
  - ✧ R-Having Enough rest.
- 45.State two sources of water  
(Rain, Rivers, Lake Spring Wells)
- ✧ R-Rain
  - ✧ R-River
  - ✧ L-Lakes
  - ✧ S-Springs
  - ✧ W-Wells
- 46.Gives two examples of digestive organs.  
(Many Students Study large lessons)
- ✧ Mouth
  - ✧ S-Stomach

- ✧ S-Small intestine
- ✧ L-Large intestine
- ✧ L-Liver

47.State functions of the livers.

(Liver Detoxifies Bile Stores)

- ✧ D-Detoxifies harmful substances
- ✧ B-Produces bile
- ✧ S-Stores food substances

48.State two uses of water.

(Water Help People Cook Clean Wash And Grow Crops)

- ✧ P-People drink it
- ✧ C-Cooking
- ✧ C-Cleaning the house
- ✧ W-Washing clothes
- ✧ G-Helps crops to grow well

49.Give two examples of primary sex characteristics in boys and girls .

(Voila Please Test The Sugarcane)

- ✧ V-Vagina
- ✧ P-Penis
- ✧ T-Test
- ✧ S-Scrotum

50.Mention two examples of blood vessels.

(VAC)

- ✧ V-Vein
- ✧ A-Artery
- ✧ C-Blood capillaries

51.State two conditions which can change the normal heartbeat.

(Fear Excitement and Vigorous exercise)

- ✧ F-Fear
- ✧ E-Excitement
- ✧ V-Vigorous exercises

52.Give two factors that can lead to smoking.

(BIP)

- ✧ Boredom
- ✧ I-Idleness
- ✧ P-Peer group influence

52.State one dangerous substance found in tobacco smoke

(NTC)

- ✧ Nicotin
- ✧ Tar
- ✧ Carbon monoxide

54.State two characteristics of essential drugs

(CACE)

- ✧ C-Cure diseases
- ✧ Affordable
- ✧ Common
- ✧ Effective

55. Give two examples of skin diseases.

(DR JAB)

- D-Dhobi's itch
- R-Ringworm
- J-Jock itch
- A-Athlete's foot
- B-Barba's itch

56. State three main classes of food values.

3GS

- G-Go food
- G-Grow food
- G-Glow food

56. State two groups of vertebrates

(MR FAB)

- M-Mammals
- R-Reptiles
- F-Fish
- A-Amphibians
- B-Birds

57. Name two blocks of village food path.

(PDF)

- P-Pests and diseases
- D-Drought
- F-Floods

58. Give two examples of amphibians

(FRONTS)

- FRO-Frogs
- Newts
- Toads
- Salamanders

59. Write two parts of male reproductive organ

(SEVEN UP)

- Seminiferous tubules
- E-Epididymis
- V-Vas deferens
- E-Ejaculatory ducts
- N
- U-Urethra
- P-Penis

60. State two uses of oxygen.

(GB2)

- Germination
- Burning
- B-Breathing

61. List two parts of the liver

(How Cute Bile Goes)

- H-Hepatic artery

- C-Central vein
- B-Bile duct
- G-Gall bladder

62. Write groups of invertebrates  
(CAMSEA)

- C-Crustaceans
- Arthropods
- M-Molluscs
- S-Sponges
- E-Echinoderms

63. State two examples of noble gases  
(HAN)

- Helium
- Argon
- Neon

64. Give two examples of heart diseases  
(Han and Harriet Have Candida)

- H-Heart failure
- H-Heart attack
- H-Heart valve disease
- C-Cardiac arrest

65. State two parts of female reproductive organ  
(U Might Visit Over the Fallopian Cities)

- U-Uterus
- Muscular wall
- V-Vagina
- O-Ovaries
- F-Fallopian tubes
- C-Cervix

66. Name two parts of human eye  
(Cryng In Rain Cause Angry Viruses Losing Strength)

- C-Cornea
- Iris
- R-Retina
- Ciliary body
- Aqueous humour
- V-Vitreous humour
- Lens
- Sclera

67. State two parts of the kidney  
(Cranky People Make Ugly Ninjas)

- C-Cortex
- P-Pelvis
- M-Medulla
- U-Ureter
- N-Nephron

68. State two characteristics of arthropods

(JESM)

- Jointed legs
- E-Exo skeleton
- S-Segmented bodies
- M-Moult

69. Give two factors that affect speed of sound

(WHAT)

- W-Wind
- H-Humidity
- A-Altitude
- T-Temperature

Give two examples of enzymes in the small intestines

(SMELL)

S-Sucrase

M-Maltase

E-Erpsin

L-Lipase

List two examples of skin layers

(Every Dog Hurried eat)

E-Epidermis

D-Dermis

H-Hypodermis

Name one example of pelvic bone(hip bones)

(Peter Isolates Isaac)

P-Pubis

I-Ischium

J-Ilium

Mention two disorders of the digestive system

(BIVIC)

B-Bloating

I-Indigestion

E-Vomiting

I-Intestinal obstruction

C-Constipation

## **VECTORS AND DISEASES THEY SPREAD.**

| Vectors  | Diseases    | Germes          |
|----------|-------------|-----------------|
| Housefly | ✓ Cholera   | Bacteria        |
|          | ✓ Typhoid   | Bacteria        |
|          | ✓ Diarrhoea | Bacteria/ Virus |
|          | ✓ Dysentery | Bacteria/Amoeba |

|                           |                                                    |                                                        |
|---------------------------|----------------------------------------------------|--------------------------------------------------------|
| Cockroach                 | ✓ Polio<br>✓ Cholera<br>✓ Diarrhoea<br>✓ Dysentery | Virus<br>Bacteria<br>Bacteria/Virus<br>Bacteria/Amoeba |
| Jinja fly/Blackfly        | ✓ Riverblindness                                   | Filaria worm                                           |
| Infected dogs/cats        | ✓ Rabies                                           | Virus                                                  |
| Ticks                     | ✓ Typhus fever                                     | Protozoa                                               |
| Water snail               | ✓ Bilharziasis                                     |                                                        |
| Female anopheles mosquito | ✓ Malaria                                          | plasmodia                                              |
| Rats fleas                | Bubonic plague                                     | Bacteria                                               |

## **HOW DIFFERENT ANIMALS PROTECT THEMSELVES**

| <b>Animals</b>   | <b>Ways of protection</b>                                    |
|------------------|--------------------------------------------------------------|
| Dog              | By barking/biting                                            |
| Kangaroo         | By running fast                                              |
| Ostrich          | By running fast/kicking                                      |
| Hedgehog         | By using Spines                                              |
| Porcupine        | By using Spines                                              |
| Tortoise         | By hiding itself in the hard shell                           |
| Crocodiles       | By using their strong tails and sharp teeth                  |
| Chameleon        | By changing colour                                           |
| Millipede        | By rolling itself                                            |
| Skunk            | By spraying oily liquids                                     |
| Poisonous snakes | By using fangs                                               |
| Pangolin         | By using its scales as armor<br>By rolling into a spiky ball |
| Bed bug          | By producing a bad smell                                     |
| Octopus          | By changing its body shape and colour                        |
| Fish             | By using its slippery body                                   |

## **SCIENCE ABBREVIATIONS IN FULL**

### **1. PHC**

Primary Health Care.

**2. SSS**

Salt Sugar Solution.

**3. ORS**

Oral Rehydration Solution

**4. PIASCY**

Presidential Initiative on AID's Strategy Communication to Youth.

**5. HIV**

Human Immunodeficiency Virus.

**6. 3Ds**

Diarrhoea Dehydration Death.

**7. 4Fs**

Faeces Flies Food Finger.

**8. DPT**

Diphtheria Pertusis Tetanus.

**9. NID**

National Immunization Day.

**10. OPV**

Oral Polio Virus.

**11. WHO**

World Health Organization

**12. UNICEF**

United Nations Children's Fund

**13. UNEPI**

Uganda National Expanded Programme on Immunization

**14. SCF**

Save Children Funds

**15. MCT**

Mother to Child Transmission of HIV

**16. PMCT**

Prevention of Mother to Child Transmission of HIV

**ANIMALS AND THEIR HOMES**

| <b>Animals</b> | <b>Homes</b> |
|----------------|--------------|
| Birds          | Nest         |
| Dog            | Kennel       |
| Lion           | Den          |
| Rabbit         | Hutch        |
| Spider         | Web          |
| Cow            | Shed         |
| Monkey         | Tree         |

|     |      |
|-----|------|
| Rat | Hole |
| Pig | Sty  |

## SPELLING BEE

### Words which are commonly misspelled

| Wrong spelling | Correct spelling |
|----------------|------------------|
| chlorophyl     | chlorophyll      |
| feaces         | faeces           |
| hairly         | hairly           |
| tetenus        | tetanus          |
| vaccum         | vacuum           |
| guage          | gauge            |
| radical        | radicle          |
| diptheria      | diphtheria       |
| ligtning       | lightning        |
| parralel       | parallel         |
| lollypop       | lollipop         |
| seperate       | separate         |
| Cirrhosis      | cirrhosis        |
| waterly        | watery           |
| referred       | referred         |
| foriegn        | foreign          |
| sence          | sense            |
| recieve        | receive          |
| untill         | until            |
| occassion      | occasion         |
| truely         | truly            |

### LARVA STAGES OF DIFFERENT INSECTS

| INSECTS    | LARVA STAGE |
|------------|-------------|
| Housefly   | Maggot      |
| Butterfly  | Caterpillar |
| Bees       | Grub        |
| Mosquitoes | Wringgler   |
| Cockroach  | Nymph       |

### SOME SCIENCE FACTS

1) Arachnids use booklungs for breathing

- 2) A bat is the only flying mammal
- 3) Digestion of food begins from the mouth and ends in the ileum
- 4) Displacement method is the method used to measure the volume of irregular objects
- 5) Floating objects float on water because they are less dense than water
- 6) Objects weigh less in water due to upthrust force
- 7) Fish die when removed from water due to lack of dissolved oxygen in water
- 8) Pouched mammals use the pouch;  
To carry their young ones  
To keep their young ones for further growth

## **HOW TO APPROACH SCIENCE QUESTIONS**

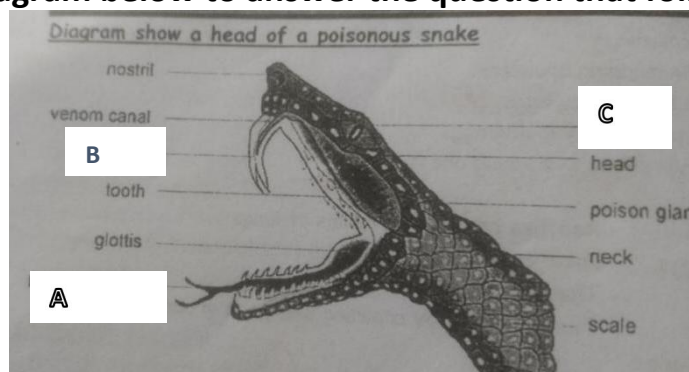

| <b>Question setting</b>                                          | <b>Answering approach</b>                                                                                                                                    |
|------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------|
| How<br>By what<br>----ways-----                                  | By or Through e.g<br>By what process does sound move<br>Through sound waves                                                                                  |
| What is<br>Define<br>Explain the meaning<br>Describe the meaning | Start with the term given in the question                                                                                                                    |
| ---reasons---<br>Why<br>----importance----                       | To/ It/For eg<br>Give two reasons why we eat food<br>To kill hunger<br>To be happy                                                                           |
| Adaptations                                                      | It is/has PART which helps it to/for function<br>Example<br>How is the fish adapted to living in water<br>It has fins which prevent it from rolling in water |

Examples  
Methods  
Activities

-Give direct answers e.g  
State two methods of food  
preservation  
Salting  
Smoking

## COMMON DIAGRAMS IN SCIENCE PAPERS

1. Use the diagram below to answer the question that follow

1. Name parts marked with letters

A. ....

B. ....

C. ....

b. State function of the forked tongue to the snake

.....

c. Give two characteristics of poisonous snakes

.....

.....

d. Why do some constrictor snakes give birth to live young ones

.....

e. Give two examples of non poisonous snakes

.....

.....

f. Where does a poisonous snake store its poison

.....

g. Why are snakes grouped under reptiles

.....

h. How do most snakes reproduce

.....

i. Why do snakes moult

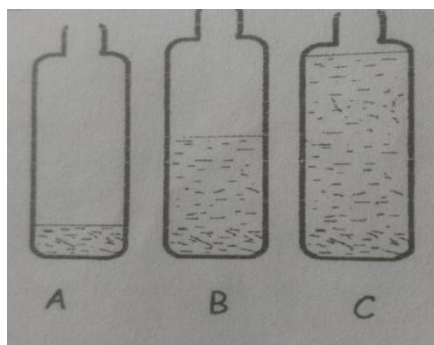

.....

j. What the first aid for a snake bite

.....

2. Use the diagram to answer the questions that follow.

A. Which of the bottles will produce the highest pitch of sound

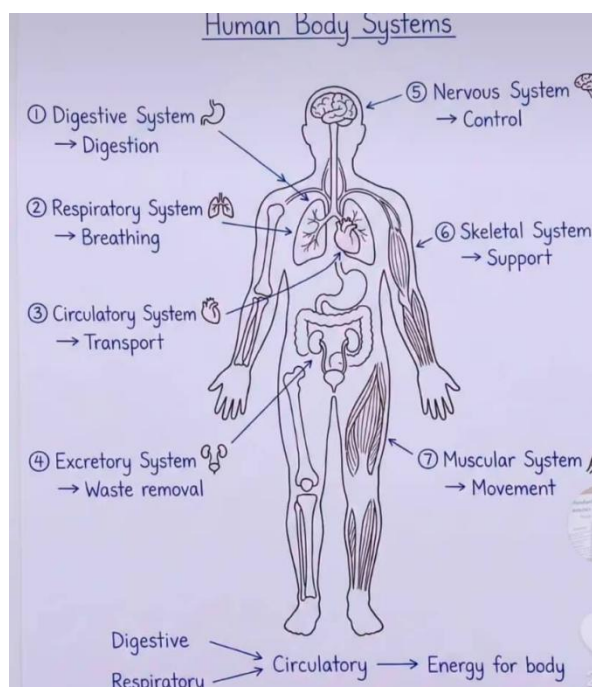

B. Give a reason to support your answer in the number above

C. State two factors that affect pitch of sound

D. Which bottle will produce low pitch of sound

E. State the reason your answer in the number above

3. Use the diagram below to answer the questions that follow

A. What is a body organ

.....  
.....  
**B.Give two examples of body organs**  
.....  
.....

**C.State one function of each of the following body organs**

**i) The brain**  
.....

**ii)The kidney**  
.....

**II) Lungs**  
.....

**Identity the biggest;**

**I) internal body organ**  
.....

**li)external body organ**  
.....

**D.What is a body system**  
.....

**E.Mention two examples of body systems**  
.....  
.....

**F.To which body systems do the following organs belong**

**A) Lungs**  
.....

**B) Stomach**  
.....

**C) Kidney**  
.....

**G.State the functions of the following body systems**

**I) Skeletal system**  
.....

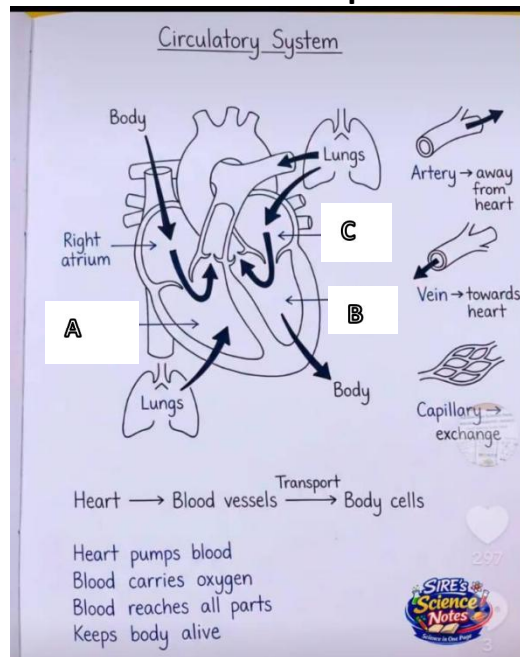

**li)Digestive system**  
.....

**H.Mention two diseases that attack the following body systems**

**A) Respiratory system**  
.....  
.....

**B) Skeletal system**

4. Use the diagram below to answer the question that follow

A. Name the body organ above

B. Identify the parts marked ;

- A. ....  
 B. ....  
 C. ....

C. State the functions of the following parts

A) Aorta

B) Septum

D. How is the above organ adapted to its function (two ways)

E. Why is the left side of the organ above thick walled

Identify the main;

- A) Artery.....  
 B) Vein.....

F. Give two differences between veins and arteries

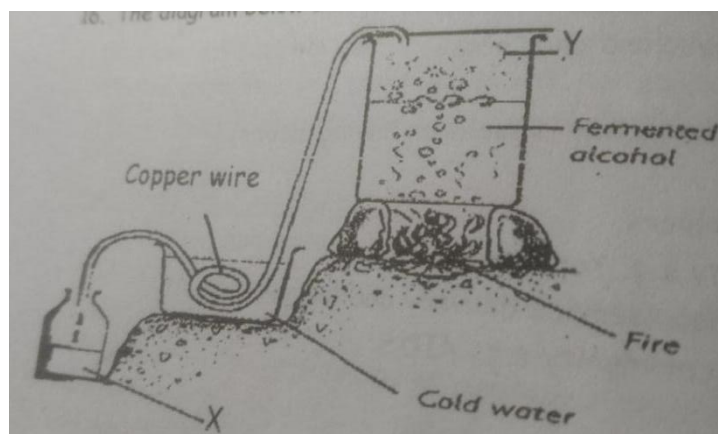

G. How are veins similar to arteries

.....  
**H.Why does blood go to the brain**  
.....

**I.Give one reason why vena cava grouped under veins**  
.....

**J.Mention two diseases that attack the organ above**  
.....

**5.Use the diagram below answer the question that follow**

**A.Name the liquid marked X**  
.....

**B.Identify the method of making alcohol shown above**  
.....

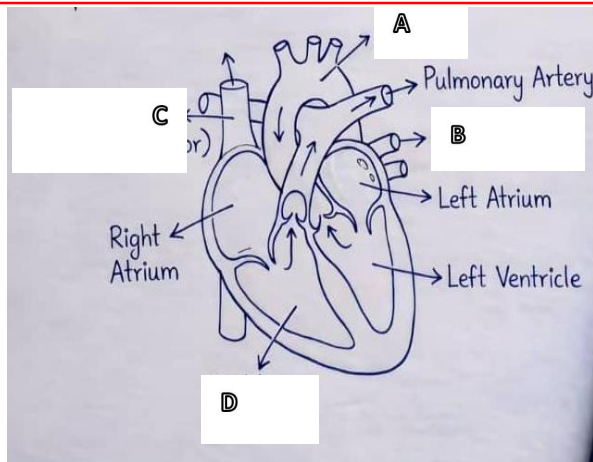

**C.Name the process that take place in cold water**  
.....

**D.State the process marked Y**  
.....

**E.How is water cycle similar to the above method**  
.....  
.....

**F.State the importance of cold water in diagram above**  
.....

**6.Use the diagram of the human heart to answer the questions that follow it**

**A. Name parts marked**

- A. ....
- B. ....
- C. ....
- D. ....

**B. State the function of valves in the heart**

.....

**C. Identify the main artery**

.....

**D. Why does blood go to the lungs**

.....

**Why is the left side of the heart thick walled**

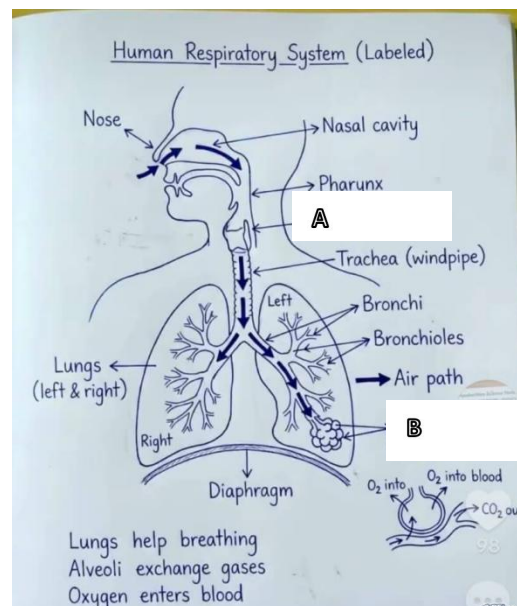

.....

.....

**E. How is the heart adapted to its function**

.....

.....

7.Name the parts marked with letter

A. ....

B. ....

B.Where does the exchange of gases takes place

.....

C.Why is the wind pipe made of rings of cartilage

.....

D.Give two diseases that attack the organ above

.....

.....

E.State one function of the bronchi

.....

F.Give two ways of caring for organ above

.....

.....

G.Identify the main function of the lungs

.....

H.What happens to the diaphragm during the following

(i) Inhalation of air

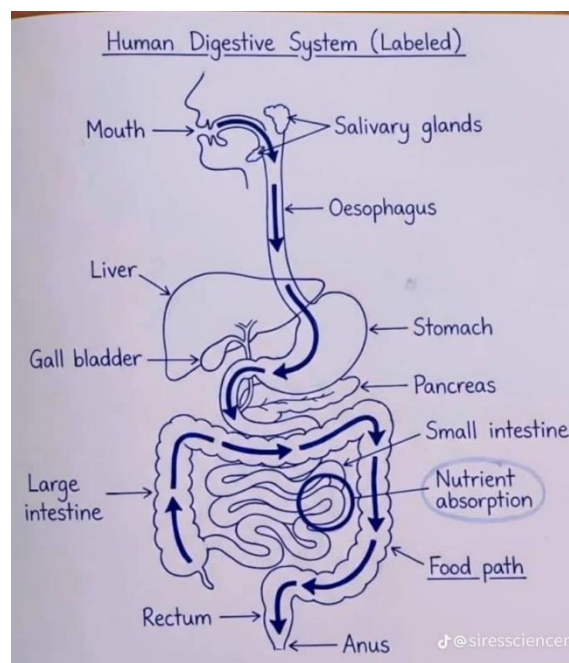

.....

(ii)Exhalation of air

.....

.....

8.The diagram below shows a digestive system,use it to answer the questions

**A.What is digestion**

.....  
.....

**B.Mention two organs of the digestive system**

.....  
.....

**C.Define the term alimentary canal**

.....

**D.List two parts of alimentary canal**

.....  
.....

**F.Mention two examples of digestive juices**

.....  
.....

**G.Suggest two disorders of the digestive system**

.....  
.....

**H.Mention one way of controlling constipation**

.....

**I.How is the ileum adapted to its function**

.....

**J.List two 3 enzymes found in the ileum**

.....  
.....

**K.Why are the walls of the stomach covered with mucus**

.....

**L.Under which condion does pepsin works**

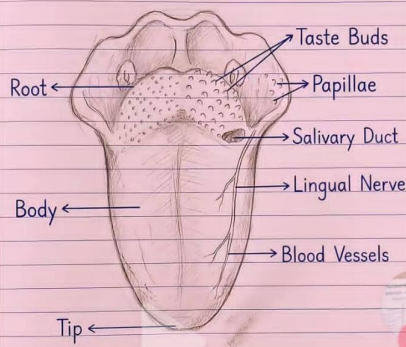

.....

**M.How does chemical digestion depend on mechanical digestion**

.....  
.....

**9.Use the diagram below to the questions that follow .**

### Structure of the Tongue

#### Functions of Tongue:

- Helps in tasting food.
- Helps in swallowing.
- Assists in speaking.
- Mixes food with saliva.

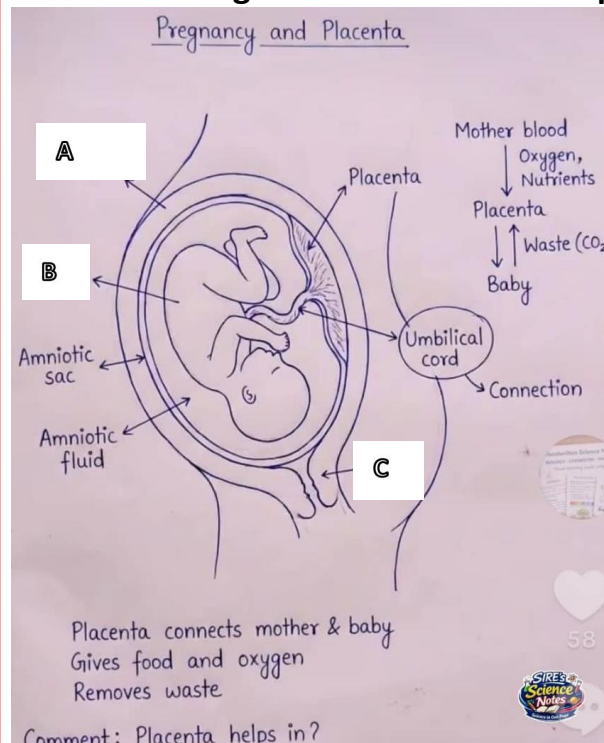

**A.To which body system does the above organ belong**

**B.State two importance of the tongue**

**C.Mention two ways of caring for the organ above**

**10.Use the diagram to answer to the questions that follow**

**A.Name the part marked**

**A. ....**

B. ....

C. ....

**B.State two functions of the placenta**

.....

.....

**C.How is the amniotic fluids important to foetus**

.....

**D.Define the following terms**

**i) Implantation**

.....

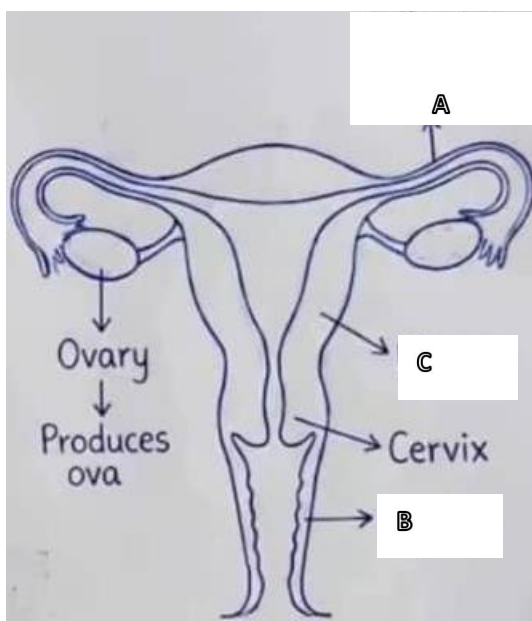

**ii)Ovulation**

.....

**iii)Pregnancy**

.....

**11.Below is the female reproductive organ use it to answer the question that follow**

**A.Name the part marked**

A. ....

B. ....

C. ....

**B.State the function of oviduct**

.....

... , .....

**C.List two diseases that attack organ above**

.....  
.....

**D.State two ways of caring for the organ above**

.....  
.....

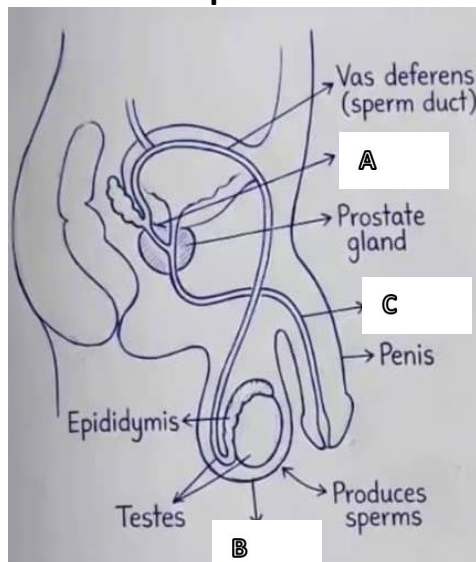

**E.To which system of the does the organ above belong**

.....

**F.State the importance of the ovaries**

.....

**12.Study diagram below of the male reproductive organ and use it to answer the questions that follow**

**A.Name the part marked**

**A.** .....

**B.** .....

**C.** .....

**B.Give the function of following**

**(i) Testes**.....

**(ii)Scrotum**.....

**(I) Urethra**.....

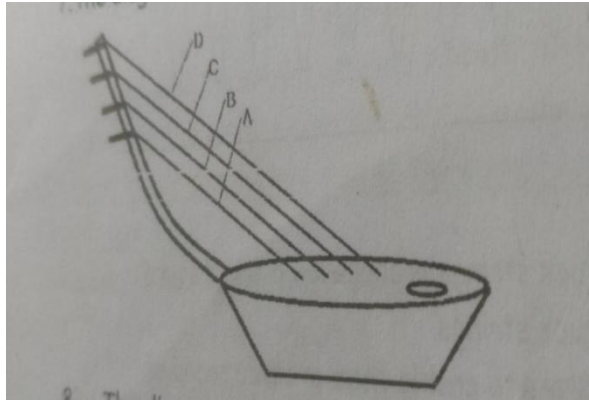

**C.To-which system of the body does the organ above belong**

.....  
.....

**D.Mention two ways of caring for the above organ**

.....  
.....

**13.Use diagram below to answer the questions that follow**

**A.Name the musical instrument above**

.....

**B.How can one increase the pitch of the musical instrument above**

.....

**C.Which string will produce the**

**(I) Highest pitch of**

**sound.....**

**(ii)lowest pitch of sound.....**

**D.Name the musical instrument above**

.....

**E.State the importance the sound box on the diagram above**

.....

**F.To which group of musical instrument does the above belong**

.....

**G.Give the importance part marked K.**

.....

**H.Give two factors that affect the pitch of sound**

.....

.....

**I.By what means is sound produced**

.....

**J.Why is sound called a form of energy**

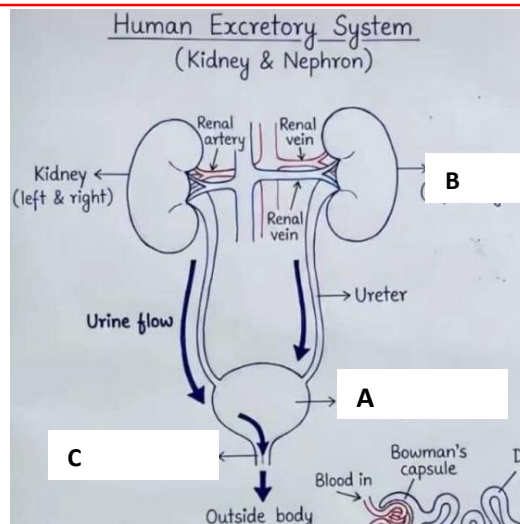

.....

**K.Mention two forms of energy that can be reflected**

.....

.....

**14.Below is a body system use it to answer the questions that follow**

**A.Name the part marked**

- A. ....
- B. ....
- C. ....

**B.State the importance the parts**

Urinary bladder.....` .....

Kidney.....

Ureter.....

**C.Give two diseases of the kidney**

- .....
- .....

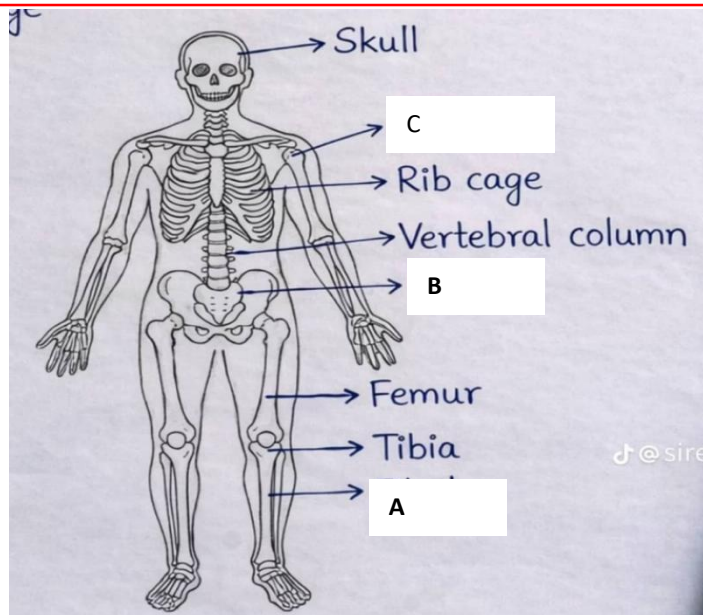

**D.State two ways of caring for the body system above**

- .....
- .....

**E.Name one body organ that help the above body system to function**

- .....
- .....

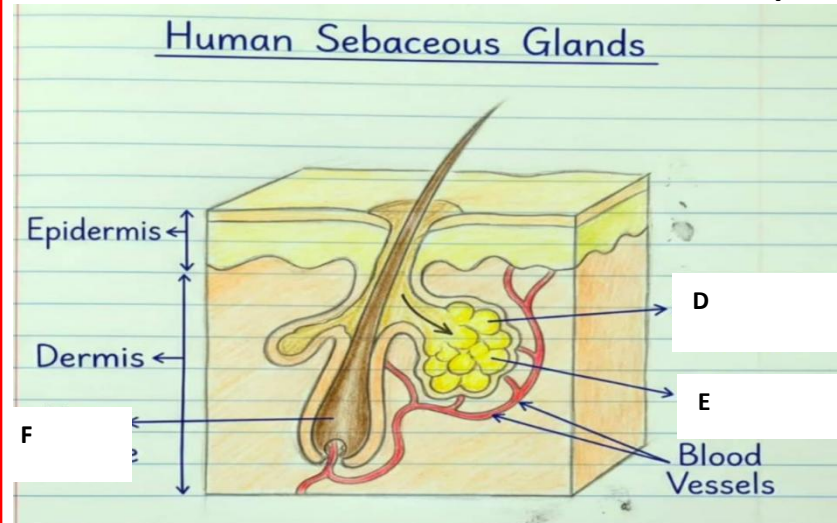

**15.Use the diagram below to answer to questions that follow**

A. Name the parts marked with letters

- A. ....
- B. ....
- C. ....

16. Below is the human skin use it to answer the questions that follow

A. Name the parts marked with letters

- D. ....
- E. ....
- F. ....

B. To which body system does the organ above belong

.....

C. State the function of sweat gland

.....  
**E. Identify the first layer of the skin**  
.....

**F. State two ways how the regulates heat loss**  
.....  
.....

**G. State function of the following parts of the skin**

**A) Hairfollicle**  
.....

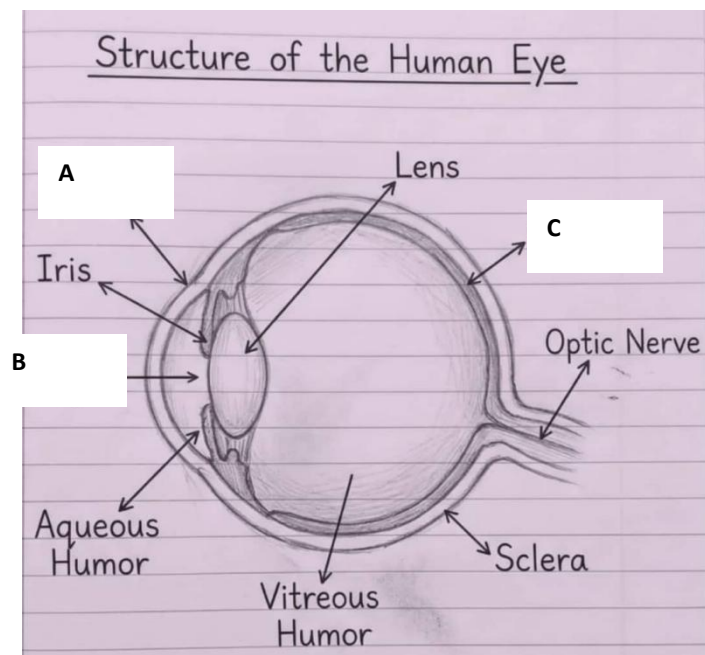

**B) The nerves**  
.....

**C) Sweat duct**  
.....

**H. List diseases that attack the organ above**  
.....  
.....

**I. Give two ways of caring for the skin**  
.....  
.....  
.....

**17. The diagram below is of a human eye use it to answer the question that follow**

**A. Name the parts marked letters**

**A.** .....

**B.** .....

C. ....

B.State functions of following parts of the ear

(I) Optic nerve

.....

(II)Iris

.....

(iii) Retina

.....

(IV)Blind spot

.....

C.State two ways of caring for organ above

.....

.....

D.List two diseases that attack the organ above

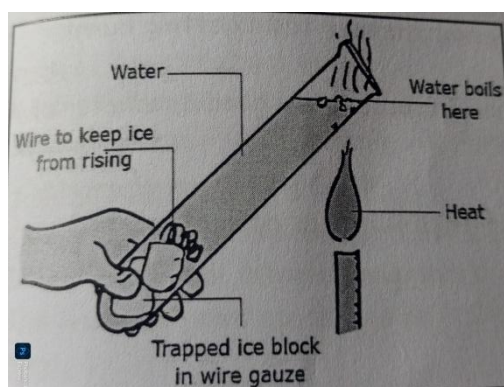

.....

.....

E.Which part of the eye regulates the amount of light entering in it

.....

18.Below is an experiment organized by P.5 members use it to the questions that follow

A.What will happen to the ice cubes after water boiling

.....

B.State the importance heat in the experiment above

.....

C.State importance of wrapping ice block in a wire gauze

.....

D.Give two other materials that can be used instead of ice

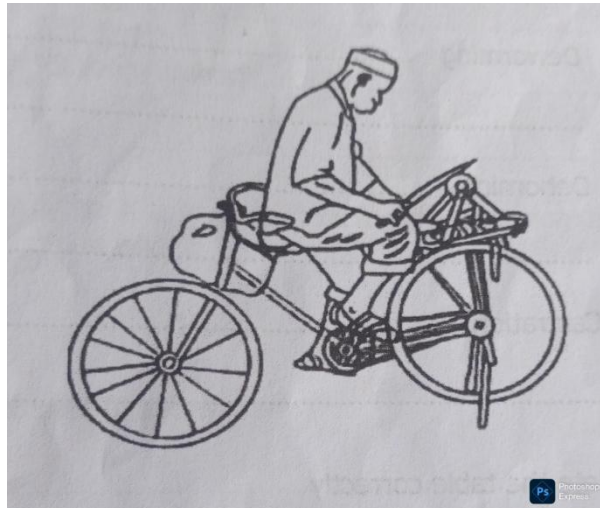

.....

.....

E.State the reason why P.5 member organized the experiment above

.....

**19.The picture below is of Mzee Kirunda sharpening a knife.Use it to answer the question that follow**

**A.Which force enables Mzee Kirunda to sharpen the knife**

.....

**B.Apart from sharpening,give any other two uses of the force named above**

.....

**C.State two dangers of the force above**

.....

**D.Give two ways of reducing the force above**

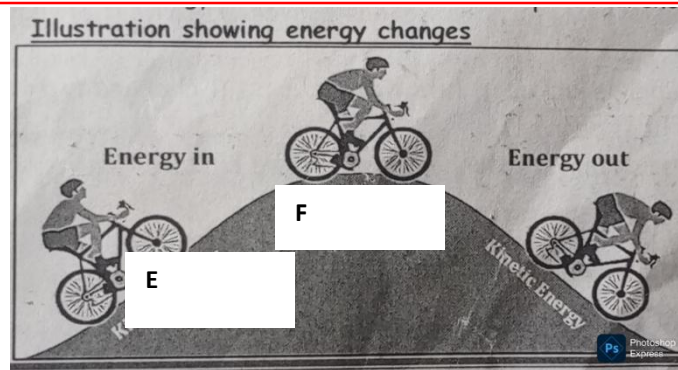

.....

**E.Find the work done by a man who pushed a wheelbarrow using a force of 80kg through a distance of 9 meters**

.....

**20.The diagram shows the different types of energy use it to answer the question that follow**

**A.Name the type of energy at E**

**B.State two forms produced by the object at F**

**C.What is energy**

**D.Why is heat regarded to a form of energy**

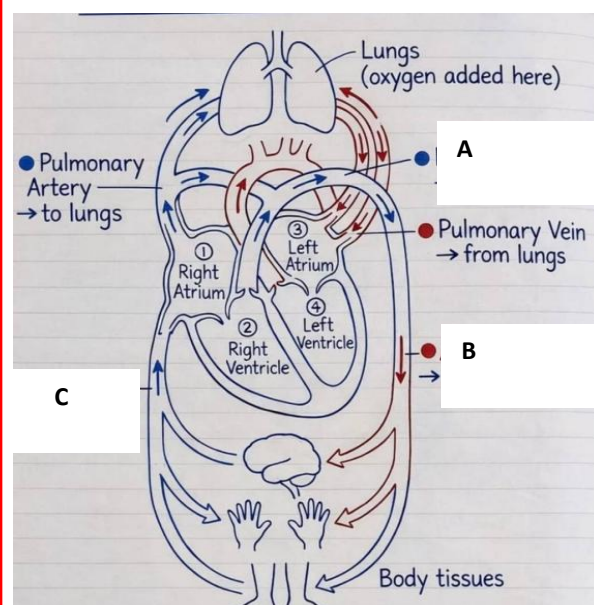

**F.Name the type of energy possessed by the following objects**

**A) A book on the table**

**B) Boiling water**

**C) A boy running**

**21.Below is a circulatory use it to answer the question that follow**

**A.Name the blood vessels**

- A. ....
- B. ....
- C. ....
- .....

**B.State two organs of circulatory system**

.....

.....

**C.List two organs related to the circulatory system**

.....

.....

**D.What is the function of the human heart.**

.....

**E.Identify the main;**

**(i) .Artery.....**

**(ii)Vein.....**

**F.Why do arteries lack valves**

.....

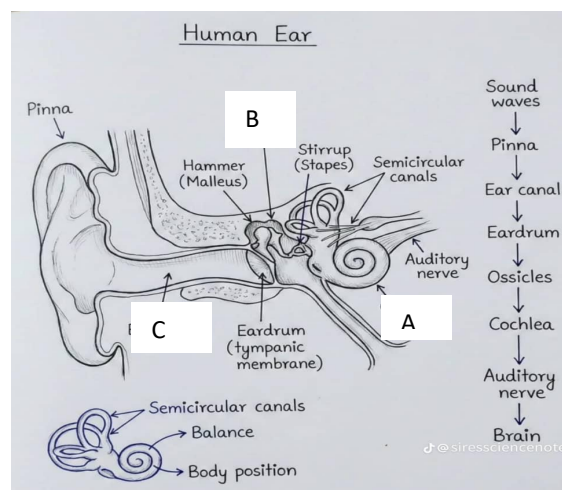

**G.How are arteries different from veins**

.....

**H.Why is left side of the heart thick walled**

.....

**22.The diagram below is of the human ear use it to the question that follow**

**A.Name parts marked ;**

A. ....

B. ....

C. ....

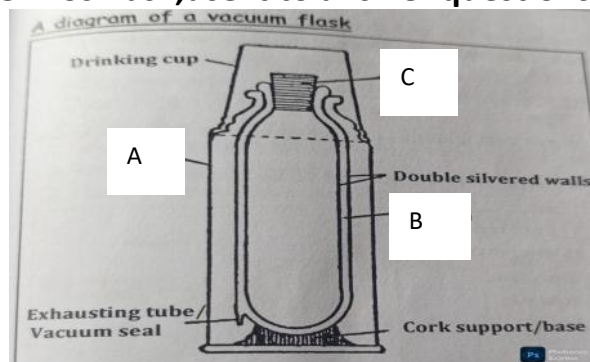

**B. Identify the part of the ear that balance the body**

**C. How is the ear adapted to its mode of functioning**

**D. Name two parts that make up the inner ear**

**E. Mention the 3 main parts of the ear**

**23. Below is a thermos flask, use it to answer questions that follow.**

**a) Name the parts marked,**

**A. ....**

**B. ....**

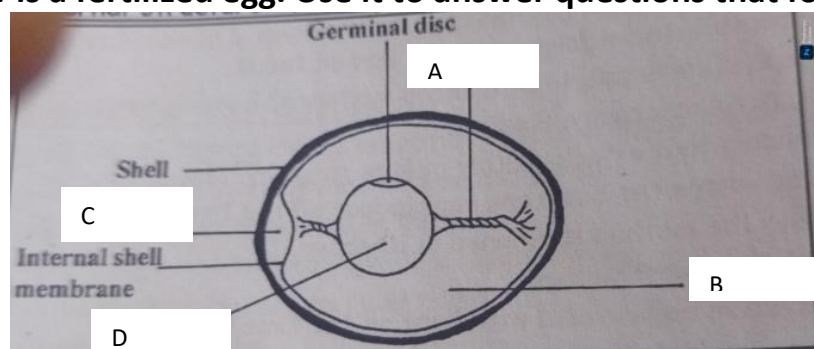

**C. ....**

**b) How does part C prevent heat loss the flask?**

**c) Why is a cork commonly made of plastic or wood?**

**d) Give one reason why part C in a thermos flask above prevent heat loss by convection and conduction.**

**24. Below is a fertilized egg. Use it to answer questions that follow.**

**a) Name the parts marked ,**

- A. ....
- B. ....
- C. ....
- D. ....

b)Why is the egg shell porous?

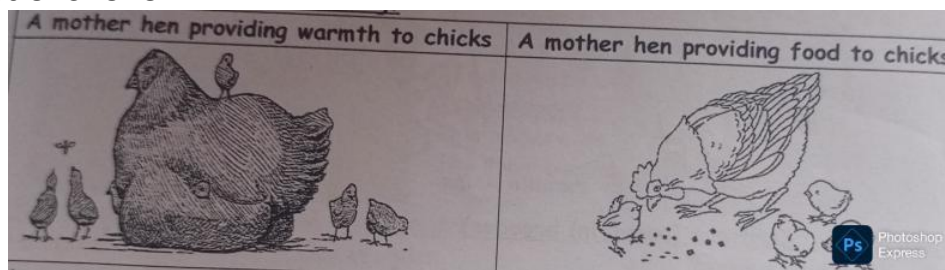

c)Name the mineral salt that helps in the hardening of egg shells.

d)Mention three egg abnormalities.

e)State the importance of D in an egg.

f)Sate what a germinal disk develop into after fertilization taking place in an egg.

25.The diagram below shows a type of brooding use it to answer the questions follow

A) What is brooding

B) Identify the type of brooding shown above

C) State two advantages of the above type of brooding

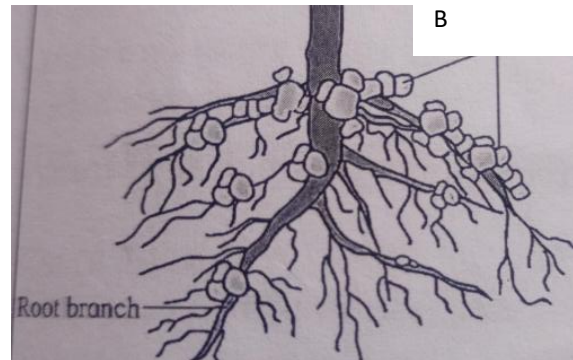

D) Identify two disadvantages of the type of brooding

C.What are vermins

D.Give two examples of vermins

.....  
.....  
**E.Which type of brooding can be used for commercial farming**  
.....

**26.Below is a root of a leguminous plant use it to answer the questions that follow**

**A.Name the part marked B**  
.....

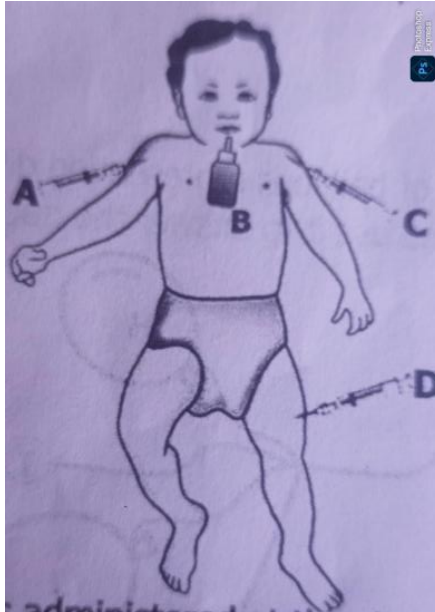

**B.State the function of part B**  
.....

**C.Name the of bacteria found in part B**  
.....

**D.Of what importance is the bacteria named above**  
.....

**E.State two crops with such a root**  
.....  
.....

**27.The diagram below shows the different body immunization sites use it to answer the questions that follow**

**A.Name the vaccines administered at the following sites**

- A).....  
 B).....  
 C).....

**B.Identify two vaccines which are given by injection method**

.....  
 .....

**C.At what age vaccine C given to babies**

.....

**D.Give one reason for immunizing children**

.....

**E.State one immunizable disease that affects the brain**

.....

**F.Why is polio vaccine administered many times**

.....

**G.Why is polio vaccine given orally**

.....

**H.Give one tool used in the cold chain**

.....

**I.Define cold chain**

.....

.....

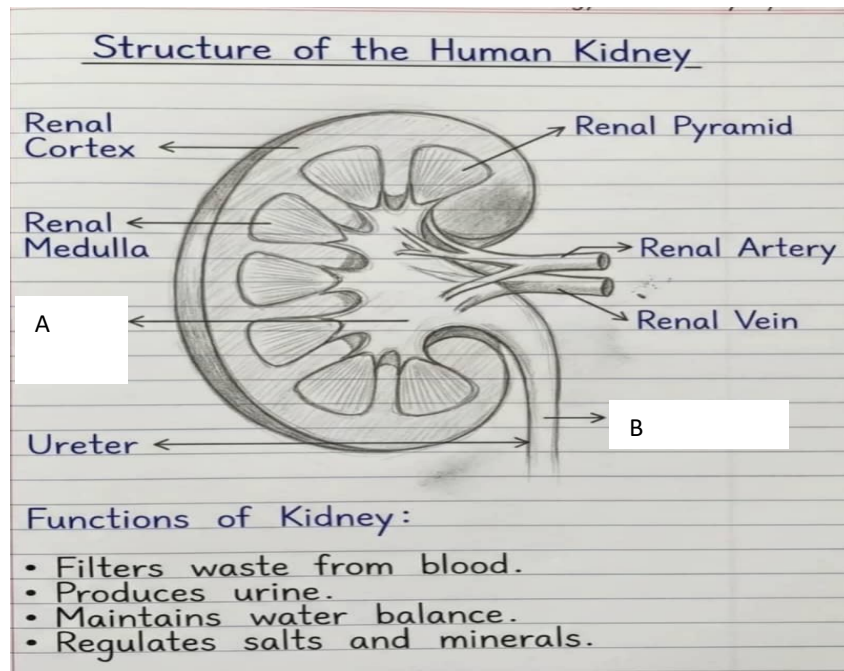

**J.Why is immunization free of charge in Uganda**

.....

**K.Give two ways how hepatitis B spread**

.....

**28.Below is the human kidney use it to answer to questions that follow**

**A.State the main function of the kidney**

.....

**B.Name the parts marked with letters;**

A. ....

B. ....

**C.Give the functions of the parts;**

**A) Medulla**

.....

**B) Renal artery**

.....

**D.List two disease of the organ above**

.....

.....

**E.State two ways of caring for the above organ**

.....

.....

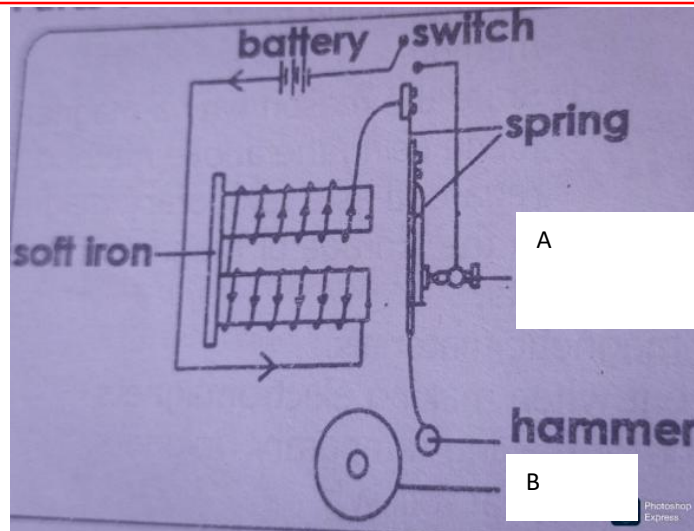

**F.State one body organ which is related to the above organ**

.....

**G.To which body system does the above organ belong**

.....

**29.Use the diagram below to answer the questions that follow**

**A.Name the electrical instrument above**

.....

**B.Name the parts;**

A) .....

B) .....

**C.State the function of the parts;**

A) Hammer

.....

B) Spring

.....

C) Battery

.....

.....

**D.What happens to the gong when the switch is closed**

.....

**E.Give two uses of the above device in our daily life**

.....

.....

**F.What is a magnet**

.....

.....

**G.Give two methods of making magnets**

.....

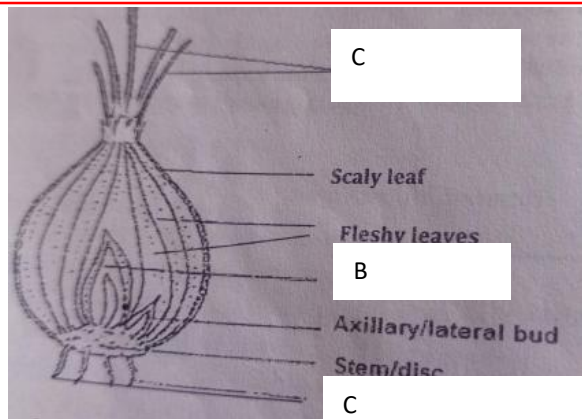

.....

**H.Why is the earth called a magnet**

.....

**30.Below is an onion use it to answer the questions that follow**

**A.Name parts marked**

- A. ....
- B. ....
- C. ....

**B.How is part B important an onion plant**

.....

**C.In which part of a plant does an onion plant store its food**

.....

**D.Give the function of scally leaves to an onion plant**

.....

**E.How is an onion plant propagated**

.....

**31.The diagram below is of a mushroom use it to answer the questions that follow**

**A.Name the parts marked**

- D. ....
- E. ....

**B.Give the functions of the following parts of a mushroom**

- I) Ring.....
- II) Cap.....
- III)Gills.....

**C.Give one way in which sunlight is important to mushrooms**

.....

**D.How do mushrooms reproduce**

**E.State one importance of mushrooms to people**

**F.Name the food value got from eating mushrooms**

**G.How are the gills important to a mushroom**

**H.Why is a mushroom grouped under non flowering plants**

**I.Apart from a mushroom, give two other examples of fungi**

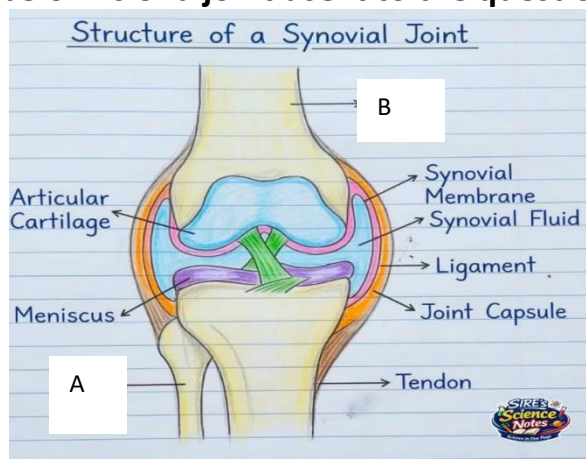

**J.Give two examples of poisonous fungi**

**K.How do fungi feed**

**L.Mention two places where mushrooms mostly grow**

**M.To which group of non flowering plants does a mushroom belong**

**32.The diagram below is of a joint use it to the questions that follow**

**A.Name the bones;**

**A. ....**

**B. ....**

**B.State the importance of the following parts**

**I) Synovial fluid**

.....  
**li)Ligament**  
.....

.....  
**II) Cartilage**  
.....

.....  
**Iv)Tendon**  
.....

.....  
**C.Name the type of joint shown above**  
.....

.....  
**D.What is a joint**  
.....

.....  
**E.State 2 types of joints**  
.....  
.....

.....  
**F.Mention two examples of immovable joints**  
.....  
.....

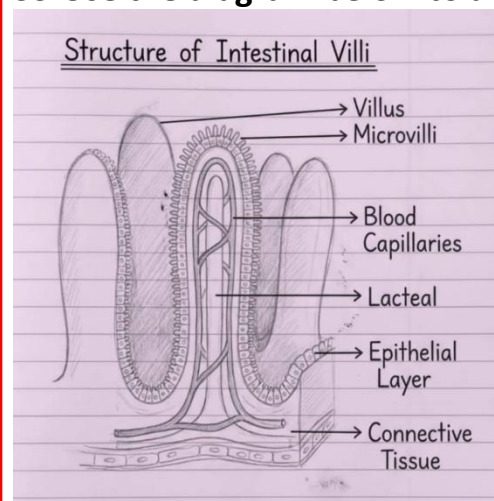

.....  
**G.Name the structure that joins the following;**

**.A) A bone to abone**  
.....

.....  
**C) A bone to a muscle**  
.....

.....  
**H.Name the longest bone found in the a above diagram**  
.....

.....  
**33.Use the diagram below to answer the question that follow**

**A.Name the process that takes place in the villi**  
.....

.....  
**B.How is the ileum adapted to its function**

.....  
.....  
**C.Name the digestive juice produced by the walls of the ileum**

.....  
**D.List two enzymes found the ileum**

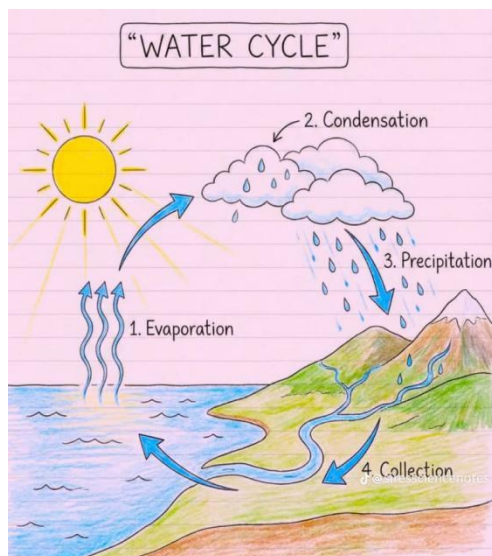

.....  
**E.Which type of blood carries digested food**

.....  
**F.Where does the digestion of food in man ;**

**A) Begines from.....**

**B) End .....**

**34.The diagram below is of a water cycle use it to answer the questions that follow**

**A.What is the importance of the following in the above diagram**

**i) The sun**

.....  
**li)Water body**

.....  
**B.Mention two processes involved in the water cycle**

.....  
**C.What is the other name to mean water cycle**

.....  
**D.State two importance of water cycle in the environment**

.....  
**F.Name the processes that help in the formation of the following**

A) Clouds

B) Water vapour

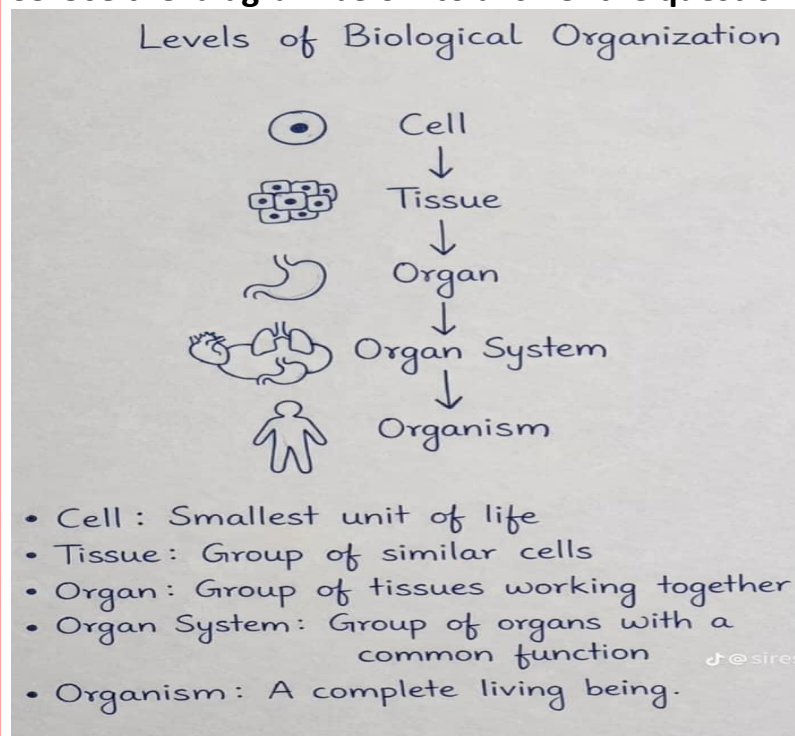

G.State two importance of transpiration in plant

H.What is transpiration

I.In which one way is transpiration dangerous to plants

J.Name the instrument used for measuring densities of different liquids

35.Use the diagram below to answer the questions that follow

A.Define the following terms

A) A cell

B) A tissue

C) An organ

D) Organ system/body system

E) An organism

B.Mention two examples of each of the following

I) Body organs

II) Body systems

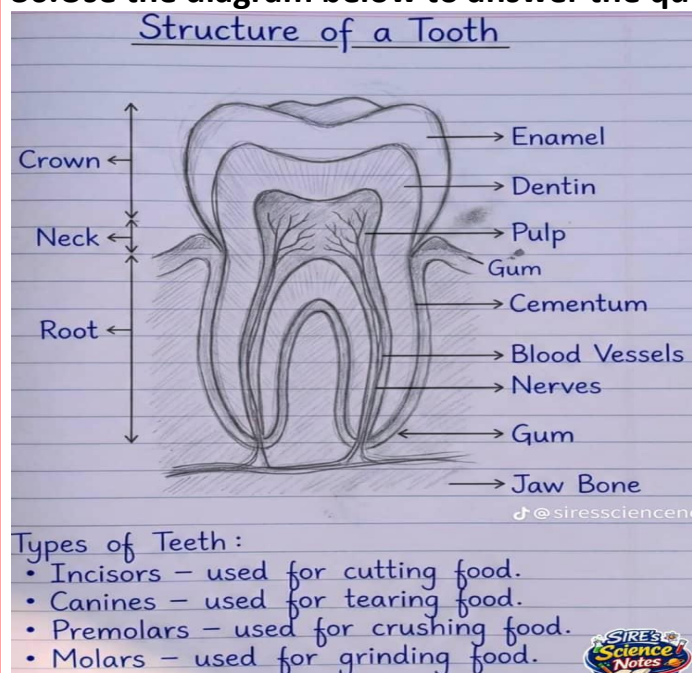

C.To which body system do the following organs belong

I) Stomach

II) Skin

III)Kidney

36.Use the diagram below to answer the question that follow it

A.Name the first type of teeth in human beings

B.How are following types of teeth adapted to their mode of functioning

I) Canines

II) Incisors

III)Premolars

C.Name the following parts of a tooth

A) Hardest part

.....

B) Living part

.....

D.Mention the two mineral salts that make up the enamel

.....

.....

E.List two activities that can damage the teeth

.....

.....

F.Give two diseases of the teeth

.....

.....

G.Identify two ways of caring for the teeth

.....

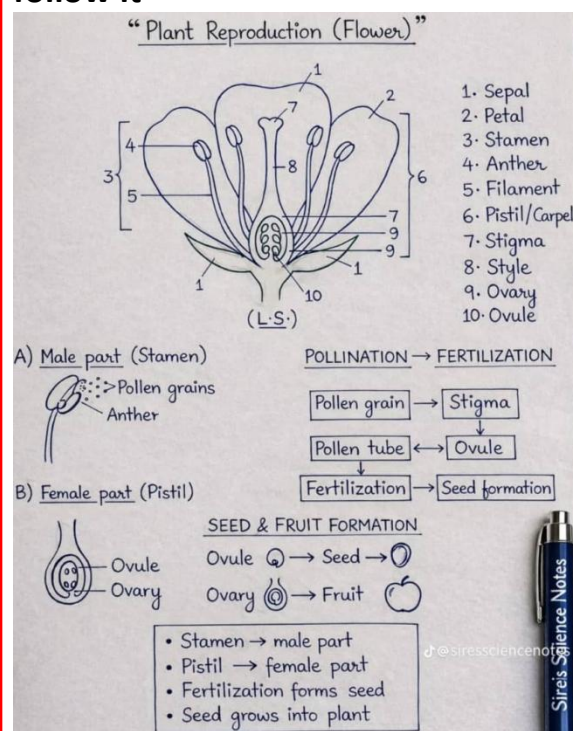

.....

H.List two disorders of the teeth

.....

.....

37.The diagram below is of a flower use it to answer the questions that follow it

A.What is a flower

.....

**B.How do flowering plants reproduce**

.....

**C.What happens when pollen grains reach the stigma**

.....

**D.Where does fertilization take place in a flower**

.....

**E.Which part of a flower receives pollen grains**

.....

**F.State the importance of the following parts of a flower;**

**A) Petals**

.....

**B) Sepals**

.....

**C) Anthers**

.....

**D) Ovary**

.....

**G.Name the;**

**A) Male part of a flower**

.....

**B) Female part of a flower**

.....

**H.State one difference between insect and wind pollinated flowers**

.....

.....

**I.Why do bees visit flowers**

.....

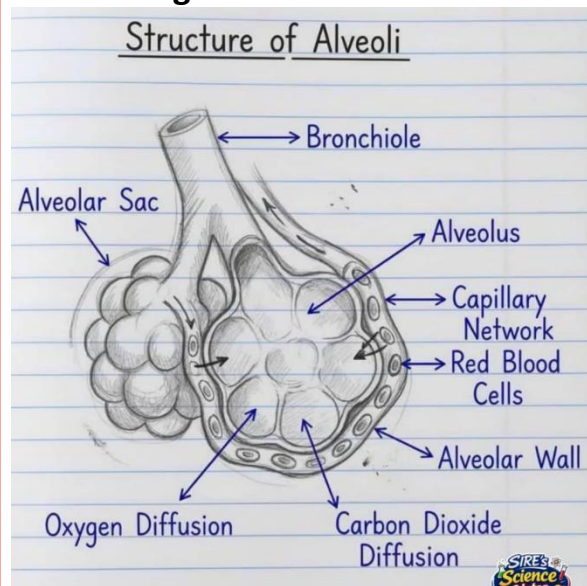

**J.Mention two agents of pollination**

.....

.....

38. Use diagram below to answer the questions that follow

A. Suggest any three importance of air sacs

.....

.....

.....

B. How are air sacs able to do their work effectively

.....

C. Name the type of blood that is diffused from the lungs

.....

D. Name the body system to which the above diagram belongs

.....

E. Give the importance of the following parts;

A) Alveolus

.....

B) Capillary network

C) .....

F. Point out any one reason why blood move to the lungs

.....

G. Name the body system where the following belong;

A) Lungs

.....

B) The Heart

.....

H. Give another name to mean air sacs

☐ .....
