The printers of the HIGHWAY EXAMINATIONS, Holiday packages, Homework, book covers, Topical questions and Teachers' workshops. Located at Nansana Municipality Kampala

SECTION A

Answer *all* questions in this section.

Questions 1 to 20 carry two marks each.

1. Work out: $\frac{1}{3} \times 12$

2. Convert 6.64 kilograms to grams.

3. Round off 76475 to the nearest thousands.

4. On a school assembly, Gertrude is in the 13th position from either side of the P.5 girls' line. How many girls were in P.5?

5. Work out: $312_{\text{five}} - 14_{\text{five}}$.

6. At the forex bureau, the cost of each Tanzania shilling (TZs) is Ugsh.30.
How many Tanzania shillings can be obtained from Ugsh.3600?

7. At St. Kizito Primary School, P.3 and P.4 have 60 and 80 pupils respectively.
Find the highest number of pupils the class teachers can put to sit on each desk.

8. The sum of two numbers is 18. If the first number is twice the second number, find the numbers.

9. If $b = -6$, $c = 10$. Find the value of $b^3 + c$.

10. Write the scientific notation form of 0.0045.

11. The temperature on top of Mt. Elgon rose from -14°C to 9°C . By how many degrees did it rise?

12. A canteen woman sells 3 pancakes at sh.1200. How many pancakes does she sell at sh.18000?

13. Using a ruler, a pencil and a pair of compasses only, construct the supplementary angle of 105° .

14. Write the value of 7 in the number 45.437.

15. Given that $M = \{p, e, n, t\}$. Find the number of proper subsets of set M.

16. Write the next two equivalent fractions for $\frac{3}{7}$.

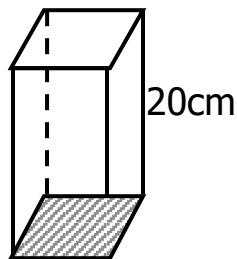

17. It takes Betty 35 minutes to clean the classroom. If she starts at 2:25p.m, at what time will she finish cleaning the room?

18. Using distributive property, simplify: $(14.8 \times 64) + (14.8 \times 36)$

19. Write 7070020 in words.

.....
.....

20. Calculate the volume of the rectangular tank drawn below whose base area is 30cm^2 .

SECTION B

Answer *all* questions in this section.

Marks for each question are indicated in the brackets

21. (a) Express 13_{ten} to binary base. (2 marks)

(b) Given that $31_p = 41_{\text{six}}$. Find the value of p . (3 marks)

22. The table below shows the buying and selling rates of different currencies in Bank of Uganda.

Currency	Buying rate (Ug.sh)	Selling rate (Ug.sh)
1 Us dollars (\$)	3500	3600
1 K.sh	29	30
1 R.F	35	4

- (a) A tourist entered the bank with 40,000 Rwanda francs and 15,000 Kenya shillings. How much in Uganda shillings would he receive from the bank? (3 marks)

- (b) A missionary has 700 dollars to exchange. How much would he get in Rwanda Francs? (2 marks)

23. Using a ruler, a pencil and a pair of compasses only,

- (a) Construct a triangle JKL where $JK = 6.5\text{cm}$ angle $\angle J = 30^\circ$ and angle $\angle K = 120^\circ$. (4 marks)

- (b) Measure the length LK cm (1 mark)

24. You are provided with the number, 7254 on a card. Use it to answer the questions that follow.

- (a) Write the numeral above in expanded form using exponents. (2 marks)

- (b) Work out the number that can be added to the above numeral in order to make 7400. (2 marks)

- (c) Find the value of the digit in the hundreds position of the number above. (2 marks)

25. (a) Work out: $\frac{0.54 \times 0.21}{0.7 \times 0.9}$ (3 marks)

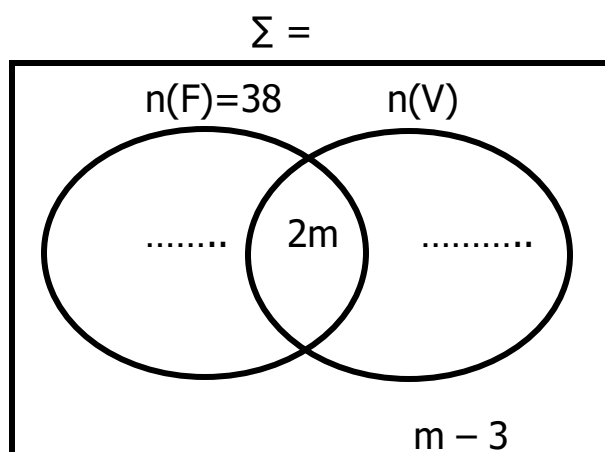

(b) Simplify: $16.6 - 30.6 + 18.4$

(2 marks)

26. Primary five class at Greenhill Academy has 64 boys. 38 of them can play football (F), $(M - 5)$ can play only volleyball (V), $2m$ can play both games while $(m - 3)$ do not play any of the two games.

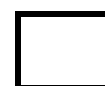

(a) Use the above information to complete the Venn diagram below.

(2 marks)

(b) Find the number of boys in the class who are not footballers.

(3 marks)

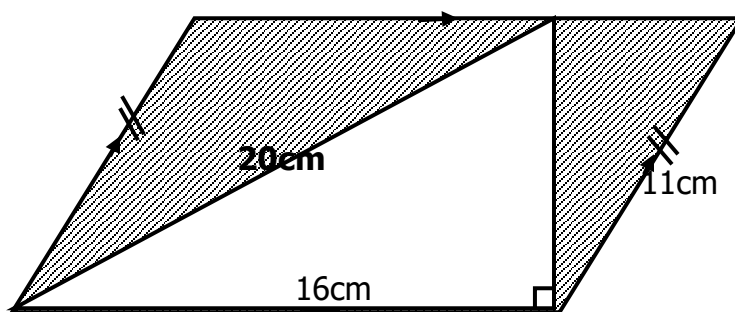

27. Nalweyiso, Akanji and Ochan shared books in the ratio of 3:4:5 respectively. If Nalweyiso and Akanji shared 21 books altogether;
- (a) How many books did they share altogether? (3 marks)
- (b) If sh.1600 was used to buy 4 books, how much money was spent on the books they shared altogether? (2 marks)
28. In a mathematics pre-mock exam, 2 pupils scored 80 marks each, 3 pupils scored 60 marks each, 4 pupils scored a total of 240 marks while 1 pupil scored 90 marks.
- (a) Find the marks scored by each of the four pupils in the exam. (2 marks)

(b) What was the most frequent mark in the exam? (1 mark)

(c) Work out the mean mark. (3 marks)

29. Work out the area of the shaded part in the figure below. (5 marks)

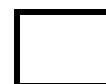

30. (a) Solve: $\frac{5t - 6}{2} = t + 12$

(2 marks)

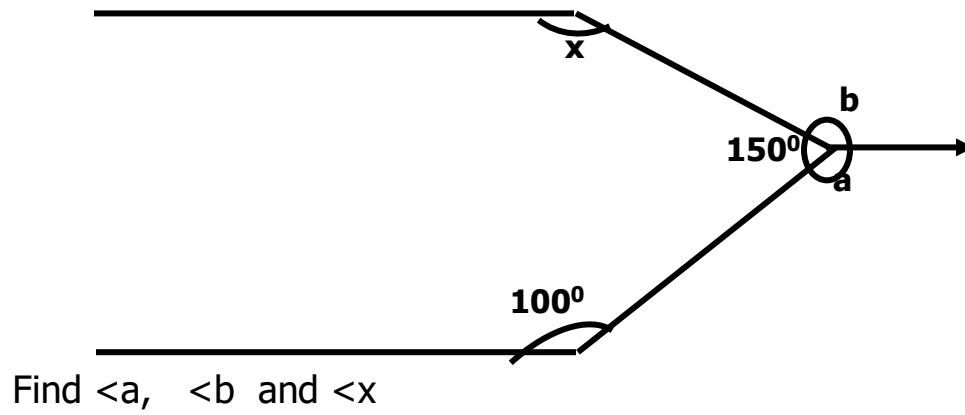

2

(b) Subtract: $(2m - 3)$ from $(5m + 2)$.

(2 marks)

31. Study the figure below and use it to answer questions.

32. The sum of three consecutive counting numbers is 78. If the middle number is k , find the numbers. (4 marks)

END
