CHEMISTRY

Paper 2(Practical)

TIME: 2 Hours

INSTRUCTIONS TO CANDIDATES;

This paper consists of **one compulsory** practical task. All answers should be written in the spaces provided. Use blue or black ink. All working must be clearly shown. Graph paper will be provided if needed.

Only silent non-programmable scientific calculators are permitted.

Do not use reference materials such as textbooks.

Learners are strongly advised to read the item thoroughly, confirm that all apparatus and chemicals are present, and make a proper plan before beginning.

ITEM 1

Akello, whose home is located along a gentle slope 1 km away from a rocky area, collected water from two different sources and stored them in two separate drums for washing clothes and other household items. She started washing using water from the first drum but soon realized that the washing was not effective and lather was difficult to form. This made Akello switch to using water from the second drum. To her surprise, lather formed easily and washing was faster and cleaner. She was happy but could not explain the difference between the two water sources.

The laboratory technician at your school collected samples of water from each of the two drums and labelled them A and B. You have also been provided with soap solution R.

TASK:

As a Chemistry learner under the Competency Based Curriculum:

a)

- i) Design an investigation you will carry out to explain the observed difference in the lather formation for water samples A and B.
- ii) Carry out the experiment and record your observations and results.
- iii) Explain the findings in (i) above using scientific reasoning.

b) What conclusion can Akello draw from your findings to make better decisions for household washing?

c) Suggest two practical ways Akello can treat water sample A so that it can easily form lather like water sample B.

(In your report, ensure to include; aim, variables, hypothesis, procedures of experiment, data analysis and conclusion)

[illegible]

This image shows a full page of white paper with horizontal dotted lines, typical of primary school writing paper. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.
